Associate Degrees and Technical Programs

CATALOG 2011-2012
IMPORTANT NOTES:

Universidad del Turabo Catalog is published for informational purposes and should not be considered as a contract between a student and the Institution. Information contained herein supersedes that previously published and is subject to change.

The Ana G. Méndez University System and its institutions do not exclude from participation, nor deny benefits to, nor discriminate against, any person on the basis of race, sex, color, national origin, social status, physical or mental impediment, nor on the basis of an individual’s political, religious or social creed.

At Universidad del Turabo (UT), every effort is made to provide accurate and up-to-date information. However, the University reserves the right to change without notice statements in the catalog concerning rules, policies, fees, curricula, courses, or other matters when necessary. Changes may apply to current and former students.

Universidad del Turabo reserves the right to make changes in course offerings, curricula, and other policies affecting its programs. In the specific case of a curriculum revision, current students will be moved horizontally to the new curriculum. Students will be required to take new courses at a level higher than that at which the student is currently enrolled but never courses at a level below. All current and former students enrolled in the Institution are subject to these conditions.

In addition, UT is currently reviewing and restructuring many of our academic programs in an effort to enhance their quality and improve our efficiency. In that process, some of the programs and courses mentioned in this catalogue may be modified, consolidated with other programs or courses, or eliminated. If you have questions about a particular program or course, you should contact the appropriate university school or department. In case that a program is eliminated, the program director will prepare a course schedule to assure the graduation of those students enrolled in the program.

It is the student’s responsibility to know and comply with the rules expressed herein, which coincide with current bylaws and regulations of the University, the administrative resolutions and the federal laws on civil rights.

ASSOCIATE DEGREES & TECHNICAL PROGRAMS

OUR PROFILE
Universidad del Turabo is a nonprofit institution of higher education located 15 miles southeast of San Juan, Puerto Rico, within easy reach of the entire east-central part of the island. Its 140-acre suburban campus and its fifteen buildings provide an ideal atmosphere for the learning experience. The university also has centers in Yabucoa, Cayey, Naguabo, Isabela, Ponce, and Orlando (in the state of Florida).

It is a professionally oriented institution with a variety of offerings, from technical certificates to doctoral degrees. The institution serves a diversified student body mostly from the surrounding communities, with a variety of economic and educational backgrounds.

Founded in 1972, Universidad del Turabo has continued to grow in the new millennium. The student population of more than 15,000 is composed of young adults and professionals.

The academic staff consists of more than one hundred seventy-six (176) full-time faculty members and two hundred (200) adjunct professors. The full-time faculty members hold doctorates and master’s degrees in their fields of expertise. Nearly fifty-five (55) percent of Universidad del Turabo’s full-time faculty are professors or associate professors, and forty-five (45) percent are assistant professors or instructors.

The gender distribution of the faculty is equally divided. Universidad del Turabo is a member of the Ana G. Méndez University System.

The academic offerings of the institution are organized into six main areas: Engineering, Science and Technology, Health Sciences, Education, Business Administration, and Human and Social Sciences.

VISION
The vision of Universidad del Turabo is to be a high quality learning community dedicated to enhancing education among its student population and promoting advanced technology with an international orientation.

MISSION
The mission of Universidad del Turabo is to enhance knowledge through excellence in teaching, and to foster research, innovation, and the internationalization of its programs.

The University is committed to graduating well-educated, professionally competent students who can think critically and are technologically literate. The institution also promotes the development of ethical principles and values that will allow our graduates to contribute to the well-being of the community through their knowledge of social systems and their role as responsible citizens.

VALUES
Universidad del Turabo is committed to:

- Freedom of thought and expression.
- Recognition of and respect for diversity.
- Respect for the dignity of the individual.
- Excellence in teaching and the generation, dissemination and application of knowledge.
- Promotion of ethical, social, and cultural values.
- Excellence in planning, operations and service.
- Respect for nature and the environment.
- Promotion of human and esthetic sensibility.

INSTITUTIONAL GOALS
To accomplish its mission, the institution recruits and develops quality human resources to excel in academic affairs, community involvement, cultural development, international collaboration, and sports. Universidad del Turabo will:

- Maintain a flexible admissions policy in which each academic school establishes requirements for its programs.
- Provide services to a diversified student body to help them achieve their academic and personal goals.
- Foster research to strengthen the teaching and learning processes as well as to improve the quality of life in the surrounding communities.
- Promote the internationalization of its academic programs through strategic alliances.
- Develop and implement a systematic faculty development plan to improve academic credentials, pedagogical competencies and instructional technology skills.
- Recruit and develop quality human resources.
- Provide academic skills and career-oriented activities to precollege students, as well as opportunities for continuing education, thus fulfilling the needs of the community.
- Promote the use of innovative and nontraditional teaching methodologies.
- Promote ethical values that will allow students to exert their professional judgment and performance responsibly.
- Foster the preservation and dissemination of those values inherent to Puerto Rican culture in a global context.
Establish collaborative partnerships among universities, government, industry, and community organizations. Contribute to students’ awareness of their rights and responsibilities as citizens in a democratic society.

**ACCREDITATION AND AFFILIATIONS**
The Middle States Commission on Higher Education, a regional accrediting agency recognized by the U.S. Department of Education, accredits Universidad del Turabo.

The University is a member of the following organizations:
- College Entrance Examination Board
- American Council of Education
- American Association of Colleges for Teacher Education
- American Library Association
- Hispanic Association of Colleges and Universities
- American Assembly of Collegiate Schools of Business
- National Universities and Continuing Education Association

Universidad del Turabo is accredited by:
- Middle States Association of Colleges and Schools
- Council on Higher Education of Puerto Rico

Universidad del Turabo has established Memorandums of Understanding (MOUs) with several institutions in engineering and science. The affiliations include:
- New Mexico State University
- Georgia Institute of Technology
- Science and Technology Alliance: a consortium of Sandia National Laboratories, Oak Ridge National Laboratory, Los Alamos National Laboratory, New Mexico Highlands University, North Carolina A&T, and the Ana G. Méndez University System
- Rensselaer Polytechnic Institute
- Lawrence Berkeley Laboratories
- University of New Mexico
- Consortium for Minorities in Teaching Careers

Universidad del Turabo has extended its outreach through collaborative agreements on an international scale, promoting the exchange of students and professors with institutions such as:
- Universidad Andrés Bello in Chile
- Universidad Sergio Arboleda in Colombia
- Universidad Nacional Pedro Henríquez Ureña in the Dominican Republic

**STATEMENT OF LICENSURE**
Licensed by the Council of Higher Education of Puerto Rico. Licensed by the State of Pennsylvania to offer the master’s degree in education in the teaching of English as a second language.

**CENTRAL ADMINISTRATION AND BOARD OF DIRECTORS**
Universidad del Turabo is a member of the Ana G. Méndez University System. A fifteen (15) -member board of trustees governs the System. Of these, five (5) are permanent and the board appoints ten (10) for four-year terms. The board is composed of distinguished educators, experienced executives, and civic and community leaders.

The executive officers of the System are: the President, the Vice President for Academic Affairs, the Vice President for Administrative Affairs, the Vice President for Human Resources, the Vice President for Planning and Research, the Vice President for Marketing and Student Affairs, the Vice President for Financial Affairs, and the Legal Adviser. They are appointed by the Board of Trustees.

The System’s bylaws define the objectives, powers, officers, committees, meetings and financial affairs of the institutions. They also specify the way in which the bylaws and regulations of each one of the autonomous institutions will be approved.

The Board is the policy-making, legislative and fiscal body of the System. It approves the mission of the System and its institutions, and its annual and special budgets; administers its business; confirms appointments; establishes compensations; approves academic programs and long-range institutional plans; and supervises the distribution of funds.

The Board has four standing committees:
- Executive
- Academic
- Student Affairs
- Finance and Auditing
- Planning and Institutional Advancement

**BOARD OF DIRECTORS**
Mr. Antonio J. Colorado, President of the Board
Dr. Florabel Mullick, Vicepresident & Permanent Member
Mr. José F. Méndez, President of SUAGM & Permanent Member
Mr. José F. Méndez, Jr., Permanent Member
Mr. Rafael Nadal, Esq., Permanent Member
Mr. José Domingo Pérez
Ms. Zoraida Fonalledas, Esq.
Mr. Juan R. Melecio, Esq.
Dr. Víctor Hernández
Dr. Félix Rodríguez Schmidt
Ms. Daneris Fernández
Sr. Héctor Jiménez
S.E. René A. León
Mr. Ramiro Millán
Gloria Castillo, Secretary of the Board
José E. de la Cruz Skerrett, Esq., Legal Advisor

CAMPUS ADMINISTRATION

Office of the Chancellor
Dennis Alicea / Chancellor
Gladys Betancourt / Vice-Chancellor for Administrative Affairs
Iris N. Serrano / Director of Public Relations
Alba Rivera / Assistant Vice-Chancellor of Development
Maricruz Rolón / Alumni Director
Jacqueline Mullen-Hunt / Vice Chancellor of External Resources
Carmen T. Ruiz / Director, Josefina Camacho de la Nuez Musuem and Center for Humanistic Studies
David Méndez / Vice-Chancellor for International Affairs

Office of the Vice Chancellor
Roberto Lorán / Vice-Chancellor
María Del C. Santos / Associate Vice-Chancellor
Edna Orta Anés / Associate Vice-Chancellor for Administrative Affairs
Rafael Lozano / Associate Vice-Chancellor for Retention
José R. Pérez Colón / Assistant Vice-Chancellor for Assessment
René Rodríguez / Assistant Vice-Chancellor for Faculty Evaluation and Development
José R. Pérez Jiménez / Interdisciplinary Research Institute Director
Armando Soto / Webmaster

Doctoral Studies
Sharon A. Cantrell / Dean

School of Business and Entrepreneurship
Marcelino Rivera / Dean
Brunilda Aponte / Associate Dean
Virgin Dones / Associate Dean
Linda S. Miranda / Administrative Director
Marlin Brignoni / Director of Special Projects
Lillian Hernández / Director of Student Services

School of Education
Angela Candelario / Dean
Jorge H. Garófalo / Associate Dean, Physical Education Department
Israel Rodríguez Rivera / Associate Dean
Debbie A. Quintana / Associate Dean
Maritza Oyola / Student Services Director
Carmen D. Rodriguez / Administrative Services Director

School of Engineering
Jack T. Allison / Dean
José R. Deliz / Associate Dean
Oscar A. Sáenz / Director, Industrial Engineering Department
Juan C. Morales / Director, Mechanical Engineering Department

School of Health Sciences
Ángel L. Rivera / Dean
Carmen M. Pérez Velázquez / Associate Dean for Academic Affairs
Nilda I. Boria / Associate Dean for Administrative Affairs
María E. Rosa / Director, Nursing Department
Nydia V. Bou / Director, Health Professions Department
Milva Vega / Director, Naturopathic Medicine Doctoral Program
Carmen Santiago / Nursing Clinical Coordinator
Nelly González / Student Services Officer
Joannie Ortiz / Administrative Affairs Director
Ana D. Serrano / Administrative Affairs Coordinator
Angeliz Pérez / Academic Affairs Coordinator

School of Science and Technology
Teresa Lipsett-Ruíz / Acting Dean & Associate Dean Undergraduate Programs
Fred Schaffner / Associate Dean for Graduate Programs and Research
Carlos J. Olivo / Associate Dean
Griselda Correa / Acting Director, Center for Excellence in Advanced Technologies (CETA)
Ruth Vallejo / Director, Department of Biology
José J. Ducongé / Director, Department of Chemistry and Physics
José Sánchez / Director, Department of Mathematics
Rolando Roque / Director, Institute of Physical and Chemical Applied Research

School of Social and Human Sciences
Marco A. Gil de Lamadrid / Dean
Tomasita Pabón / Associate Dean, Social Sciences Department
Edward Fankhanel / Associate Dean
Félix R. Huertas / Associate Dean, General Studies Department
Phillip Murray / Director, Language Department
Víctor Manuel García / Director, Communications Department
Maria M. Ortiz / Director, Social Work Department
Jessica Velázquez / Director, Psychological Services Clinic

International School of Design
Aurorisa Mateo / Dean
Rosa Musí / Administrative Director

School of Professional Studies
Mildred Y. Rivera / Assistant Vice-President and Dean
José A. Sánchez / Associate Dean

School of Technical Programs
José R. Del Valle / Assistant Vice-President and Dean
Maria E. Flores / Associate Dean

Associate Degrees & Technical Programs Catalog 2011-12
Information Resources

Sarai Lastra / Vice Chancellor of Information Resources and
Director Virtual Library
Luis A. Arroyo / Director, Information Technologies
José Medina / Director, Informatics and Telecommunications
Luisa Torres / Director of the Library
Julie Malavé / Director, Administrative Services

Outreach

Héctor N. Miranda / Vice Chancellor of Outreach

Off-Campus Centers

Glorymary Cruz / Director, Off-Campus Center Naguabo and
Yabucoa
Juan Rosado / Director, Off-Campus Center Cayey
Carmen L. Rivera / Director, Off-Campus Center Isabela
Carlos E. Maldonado / Director Off-Campus Center Ponce

Student Affairs

Ana Ortega / Vice Chancellor of Student Affairs
Juanita Cruz / Associate Vice Chancellor of Student Affairs
María V. Figueroa / Associate Vice Chancellor of Student Affairs
Betsy Vidal / Assistant Vice Chancellor for Wellness and
Quality of Student Life
María del C. Santos Rodríguez / Assistant Vice Chancellor for
Internship and Honor Scholarship Program
Carmen Puliza / Assistant Vice Chancellor, Career and
Placement
Zoraida Ortiz / Registrar
Rosa E. Toledo / Associate Vice-Chancellor of Admission and
Marketing
Carmen J. Rivera López / Director, Financial Aid
Gabriel López / Bursar
Vacant / Director, Health Services
Angel Vázquez / Director, Social and Cultural Activities
Eva Merced / Administrative Director
Nilda L. Toledo / Student Services Officer
Virginia González / Director, Admissions
Anabel Solá / Director, Recruitment

Physical Facilities, Operations and
Maintenance

Mayra Rodríguez / Manager, Physical Facilities and
Operations
Edwin Calderón / Assistant Manager of Physical Facilities
Julio Colón / Director, Administrative Services
José E. Machuca / Director, Security
Rigoberto Dones / Maintenance Supervisor

Non-Discrimination Statement

The Ana G. Méndez University System and its institutions do not discriminate on the basis of race, handicap, national or ethnic origin, creed, color, gender, social condition or political, religious, social or trade union beliefs.

LEGISLATIVE BOARDS

The Administrative Council of Universidad del Turabo is the legislative body of the Institution. Its main function is to establish the institutional policy of the University in accordance with the bylaws of the Ana G. Méndez University System. The Administrative Council includes the chancellor, who chairs it, the vice chancellor, the vice chancellor of student affairs, the manager of physical facilities and operations, the deans of the academic divisions, five (5) faculty representatives, and two (2) student representatives.

The Academic Board recommends the academic policy of the Institution, adopts new academic programs, approves the awarding of degrees and evaluates hiring, contract renewals, promotions, and leaves of absence for faculty members.

The Academic Board consists of the vice chancellor, the library director, six (6) school associate deans, two (2) student representatives, one (1) faculty representative for each school, and as many elected faculty members as needed to provide for their majority on the board. The chancellor is an ex officio member of the Academic Board.

DOCTORAL STUDIES CENTER

Established in 2003, the Doctoral Studies Center (DSC) is an administrative unit whose main responsibility is to provide resources and support services for graduate students who wish to pursue doctoral studies. Through workshops, seminars and conferences, the Center contributes to the University’s image of academic excellence and leadership. The DSC also promotes scholarly research among students and faculty.

The DSC is located in the Science and Technology Building and is directed by the Dean of Doctoral Studies. The Dean interacts with all the UT Schools and their respective coordinators of doctoral programs. In this way, the Doctoral Studies Center and the coordinators work together

Statement of Legal Control

The Ana G. Méndez University System is a private nonprofit corporation registered under the laws of the Commonwealth of Puerto Rico. Its Board of Directors under the system wide bylaws governs the corporation.
to ensure that all doctoral students are well attended and supported.

**MISSION**
The DSC is devoted to the advancement of knowledge through research activities and to the establishment of ideal support conditions for UT doctoral students. The Center also collaborates with the six UT Schools to stimulate and enhance academic and scientific experiences.

**VISION**
The DSC is a key facilitation agent that promotes excellence through academic and leadership opportunities for graduate students by encouraging the development of research activities.

**SUPPORT SERVICES**
The Doctoral Studies Center is actively involved in the recruitment, retention and graduation of doctoral students at UT. To this end, the Center provides assistance from the initial application stages to the completion of a doctoral degree. Hence, the Center supports the following initiatives:

- Academic and career advising
- Professional development seminars
- Group study areas
- Doctoral resources study room
- Doctoral level bibliographical services
- Laptop loan program for doctoral students
- National and international conferences
- Science authors recognition program
- Doctoral studies council
- Doctoral fellowships and scholarships database
- Teaching assistant and research assistant programs

Ultimately, the Doctoral Studies Center is a clearinghouse of information and resources to ensure the graduate students’ successful completion of an advanced degree while enhancing their personal, social, academic and professional experiences.

**MULTIDISCIPLINARY ENTREPRENEURIAL PROGRAM FOR INNOVATION (MEPI)**
The aim of this program is to instill entrepreneurial skills, in order to facilitate graduates’ transition from the academic environment to professional life, and to increase their motivation to start their own businesses. It presents students with the option of a non-traditional learning environment which allows them to apply technical skills long before they would learn about them in traditional lecture classes. This initiative fosters the creation by UT students of small business enterprises, thus providing a pathway toward the diversification of employment in Puerto Rico. It also promotes and encourages a framework of collaboration between the university and industry, contributing in this way to the economic development of Puerto Rico’s East Central region.

Important MEPI activities include an extensive learning environment that is centered on multi-disciplinary, active, discovery-based learning, and the formation of student entrepreneurial work teams that operate using real life private enterprise paradigms.

**Objectives:**
Develop in students an entrepreneurial attitude resulting in the creation of new services and enterprises.
Contribute to Puerto Rico’s economic development

Students must enroll in the MEPI for six continuous semesters. Each student enterprise will be required to address and complete at least two major projects. Over a three-year period, student tasks and responsibilities will vary, contributing different elements as students progress in their levels of technical expertise, maturity and seniority. The MEPI track is registered on the student’s transcript.

The MEPI Option replaces 12 credits of existing courses within the programs. These twelve credits are distributed as follows:

- MEPI 351 New Venture Creation 1
- MEPI 352 Legal Issues of Entrepreneurship 1
- MEPI 353 The Business Plan 1
- MEPI 455 Enterprise Project I 3
- MEPI 456 Enterprise Project II 3
- Elective (to be chosen from a list provided by the school) 3

**RESEARCH INSTITUTES**

**TELECOMMUNICATIONS INSTITUTE (IT+)**
Under the direction of Dr. Jintao Xiong, and Dr. Jeffrey Duffany, The Telecommunications Institute (IT+) of the School of Engineering of the Universidad del Turabo has installed the most advanced technology in the area of convergence of telecommunications technologies and in the critical area of Network Security in Central America.

The Telecommunications and Information Resources Center specializes in the following research areas:

- Design of Convergence Networks
- Network Security Practices and Issues
- Verification, Validation and Certification of Software Products

The installations are divided among three laboratory facilities: the Telecommunications Technologies lab,
Operating Systems lab and the Network Security lab. The main technologies available in these labs are as follows,

- IP Telephony and Digital Telephony
- Layer two and three switches
- Wireless Network
- Windows Servers
- HP-Unix Servers
- Linux Development Environment
- PABX Optic Fiber
- Cisco Routers
- Sun Microsystems Blade Servers
- Computers available: over 100
- Digital and Plasma projection facilities and equipment
- Conference Room
- Windows, Unix and Linux programming environments

**PUERTO RICO ENERGY CENTER (PREC)**

The Plasma and Renewable Energy Center will be an R&D facility in solid waste disposition and renewable energy. The technological areas of the center are plasma gasification and vitrification, photovoltaic solar cells, and fuel cells. The center will be available for demonstrations of potential applications benefiting municipalities, the pharmaceutical industry, and other private and public partners, helping to promote R&D efforts and business development. It will provide education, awareness, and technical assistance activities on renewable energy, with a particular interest in environmentally friendly solid waste treatments.

Under the leadership of Dr. Jack T. Allison, Dean of the School of Engineering, PREC will concentrate its efforts on the implementation of the project’s first phase activities:

- Construction of new PREC facilities
- Development of Cruise Ship Solid Waste Disposal Prototype
- Establishment of initial research activities related to:
  - Residue Composition Analysis
  - Hydrogen Production
  - Fuel Cell Laboratory activities

**INTERNATIONAL CENTER OF ENVIRONMENTAL AND SUSTAINABLE DEVELOPMENT STUDIES (CIEMADES)**

CIEMADES is an international R & D initiative involving Puerto Rico, the Dominican Republic and Haiti; its purpose is to address environmental and sustainable development issues in these three Caribbean countries. This collaboration is driven by the Caribbean area’s insufficient environmental protection, increasing population density, territorial limitations, lack of social awareness regarding the environment, increasing and urgent economic developments, and the need to strengthen specialized government infrastructures.

Through CIEMADES, these three countries will be able to focus attention on regional issues, share experiences and available resources, and facilitate academic and scientific synergy-related activities. The following initial projects have been proposed to establish this international initiative:
Host a regional conference to discuss environmental and sustainable development issues
Develop a human resources (environment and sustainable development) experts inventory
Characterize environmental and sustainable development parameters
Create a regional environmental resources database to be used as a baseline
Establish a post graduate scholarship program
Develop a formal and informal environmental curriculum

IMPORTANT NOTE:
This catalog contains the major points of the current agreements between the students and Universidad del Turabo. The University limits its agreement to the semester or session in which the student is duly enrolled and for which (s)he has paid the corresponding fee.

It is the student’s responsibility to know and comply with the rules expressed herein, which coincide with current bylaws and regulations of the University, the administrative resolutions and the federal laws on civil rights.

ADMISSIONS

GENERAL ADMISSION REQUIREMENTS

Students wishing to be admitted to Universidad del Turabo technical programs/associate degree programs must meet the following requirements:
File an application with the Admissions Office within the stipulated time limit.
Graduate from an accredited high school or complete studies equivalent to high school and submit the necessary certification.
Submit a $15.00 nonrefundable application fee.
All students who have not completed their certificate and who are interested in continuing their university education must meet the admission requirements for the regular program.
Students who have graduated should apply for reclassification.
All candidates for admission may be subject to an interview with the Admissions Committee.

ADMISSIONS FORMULA

Admissions will be determined by the Admission Index formula. It is computed using the results of the following areas of the College Entrance Examination Board: verbal aptitude, mathematics aptitude and English achievement. The high school grade point average is also considered.

READMISSION

Students must apply for readmission if they interrupted their studies and did not attend the university for one semester or longer. (Summer sessions do not count as interruptions.) Students must complete the required number of credits for their year of study.
Students must comply with the requirements of the study program of their choice as well as other general requirements that may apply.
In order to be readmitted, the period of suspension for academic or disciplinary reasons must have elapsed.
Candidates for readmission may be required to have an interview with the Admissions Committee. It is comprised of the Vice Chancellor of Student Affairs or his representative, the Director of Admissions, the Vice Chancellor for Wellness, the Registrar, the Vice Chancellor or his representative and the dean of the school. In special cases, the Committee will have the final authority to determine admissions.

TRANSFER STUDENTS

Transfer students are considered for admission if they have followed a course of study in an accredited university and have completed no fewer than 12 credits in the institution from which they proceed. Their grade point average (GPA) must be above the institutional minimum requirement. The students must not be under academic or disciplinary sanction in the institution from which they proceed.

In order to be admitted, students wishing to transfer must meet the requirements of the program of their choice. The Admissions Committee can evaluate applications.

COURSE VALIDATION

Transfer students have the option of validating courses taken no more than 12 years prior to admission for equivalent courses offered at Universidad del Turabo. The students must have a minimum grade of C in each course.

ADVANCED PLACEMENT TEST

Credit will be granted for the Advanced Placement Tests of the College Entrance Examination Board if the score obtained is 3 or more, on a scale of 1 to 5.

PRE-COLLEGE COURSES

Credit will be granted to students for courses offered by Universidad del Turabo at the high school level. These courses must be in addition to those required for graduation and must be approved with a grade of A, B or C. The various schools will establish the grades required in the courses to be credited.

The Pre-College Program will keep record of the student’s progress and will send evidence of the completed courses to the Registrar’s Office, after the student is officially admitted to the University. This documentation will become part of the student’s file.
RESIDENCE
All transfer students must observe the following rules to obtain residence at the University in order to qualify for graduation:

1. Complete the last (30) thirty credits of their bachelor’s degree at Universidad del Turabo, (12) of which must be in their major field of study.
2. Successfully complete the last twelve (12) credits of the associate degree at Universidad del Turabo.
3. Twelve (12) credits of residence (set by each program) will be required of students from Off-Campus Centers.

TRANSIENT STUDENTS
Transient students must be authorized by their own university to take courses at Universidad del Turabo for no longer than two academic semesters.

Università del Turabo admits visiting students or auditors. They must apply for admission within the time limit established by the Admissions Office. They must attend their regular courses but will receive no credits or grades. These students are not eligible for financial aid.

Authorization for enrollment of transient students and auditors does not constitute a formal admission into the institution, and it terminates at the end of the academic session for which it was granted. All applications are subject to an interview by the Admissions Committee.

INTERNATIONAL STUDENTS
The Universidad del Turabo accepts foreign students as permitted by immigration laws. Foreign students are subject to the admission, readmission and transfer requirements established by the Universidad del Turabo.

EFFECTIVE DATES
Admission or readmission at Universidad del Turabo will be valid for one semester of the academic year, beginning on the date it is granted. Applications that do not include the required documents, or that do not meet all the established requirements, will be considered provisional. If all documents are not received within 60 days from the first day of class, the institution may invalidate the provisional admission.

Applications forms should be requested from:

UNIVERSIDAD DEL TURABO
ADMISSIONS OFFICE
P O BOX 3030
UNIVERSITY STATION
FINANCIAL AID
Universidad del Turabo makes every effort to help its students obtain government financial aid for those who are unable to begin or continue their university education without such aid. There are three categories of financial aid: scholarships, loans and work-study programs.

SCHOLARSHIPS
Scholarships are granted according to the educational and financial needs of the student. Only undergraduate students are eligible to receive funds through Pell Grants. However, a Free Application for Federal Student Aid (FAFSA) is needed to determine the student’s eligibility for other federal aid programs.

STATE FUNDS
The Council of Higher Education of Puerto Rico provides funds to supplement the cost of graduate education. This aid applies to all students who are eligible according to the student’s eligibility index provided by the FAFSA evaluation.

FAMILY FEDERAL EDUCATIONAL LOANS PROGRAM
The Financial Aid Office will recommend and process the loan directly to the U.S. Education Finance Corporation (USEFC) in its electronic form. This loan must be repaid in cash; the repayment should begin six (6) months after the student graduates or ceases to study. The guaranty agency American Education Services (AES) will pay the interest while the student is enrolled in a recognized post-secondary institution. The interest is variable, but does not exceed 8.25 percent. Borrowers should check the interest rate on their promissory note.

WORK-STUDY PROGRAM
This program provides jobs for undergraduate and graduate students. The Financial Aid Office assigns a specific amount of hours that the student works on campus.

FINANCIAL AID APPLICATION AND RENEWAL
The deadline for application or renewal of financial aid for the academic year is May 2. Applications received after this date will be classified as late applications and will be processed as such after receiving the applications submitted on time. Late applications will be reviewed if funds are available. Students who have participated in the financial aid program during the first term do not need to renew their financial aid program during the same academic year if they comply with the requirements for continuing in the program. Financial aid must be requested through the FAFSA form on the Web, in person at the Financial Aid Office, or by mail at:

Universidad del Turabo
Admissions & Financial Aid
P O Box 3030 University Station
Gurabo, Puerto Rico 00778

The FAFSA includes the list of requirements and documentation necessary to apply for financial aid.

Important Note
The above-mentioned aid is conditioned to the availability of the respective federal, state and institutional funds. It is the student’s responsibility to take the steps necessary to obtain financial aid from the government. Such aid is directed to the student as a citizen and not necessarily to the University. Universidad del Turabo is a private, secular, nonprofit institution, and is independent of any government.

The institution fully complies with the Privacy Rights of Parents and Students Act of 1974 (Title IV of the U.S. Public Law 90-247), as amended, which specifically governs access to records maintained by institutions to which funds are made available under any federal program for which the U.S. Commission of Education has administrative responsibility, and the release of such records. Such institutions must give parents of students access to official records that are directly related to the students and an opportunity for a hearing to challenge such records on the grounds that they are inaccurate, misleading or otherwise inappropriate.

Institutions must obtain the written consent of parents before releasing or relinquishing data with personal identification from the records, except to certain specified parties. (Parents and students must be notified of these rights transfer to students at certain points, and an office and review board has been designated at the federal office of Health, Education and Welfare to investigate and decide on complaints and violations of this law.)

*In order to receive financial aid, students must comply with the Satisfactory Academic Progress Policy.

ACADEMIC REGULATIONS

REGISTRATION FOR COURSES
The Vice Chancellor of Student Affairs establishes the period for the registration process and includes the enrollment period in the calendar. Students are required to register during the period specified in the calendar. The official notification of admission is required to begin the enrollment process. For registration to be official, the bursar must validate the student’s program-receipt.

Students are also required to register during the assigned calendar period, for day or evening sessions, and this information will become part of their academic record. The
institution has the right to change the time, the calendar, or the classrooms of announced courses and to close or eliminate sections or courses from its academic offerings.

CLASSIFICATION OF STUDENTS
Full-time regular students are those who have registered for programs of no less than twelve (12) credit hours and are degree-seeking candidates. Part-time students are those with an academic workload of six (6) to eleven (11) credits hours and are degree-seeking candidates.

ACADEMIC LOAD
Academic load will not exceed twelve (12) credits per term for students with a GPA of 2.00 or less, and eighteen (18) credits per term for students with a GPA of 2.01 to 3.00. An academic load or more than twenty-one (21) credits will require prior approval by the dean of the school.

For summer sessions, academic load will not exceed twelve (12) credits, distributed over two (2) sessions. An academic load or more than twelve (12) credits will require prior approval by the dean of the school and referral by a counselor.

ATTENDANCE
Class attendance is required. Students are responsible for the academic work done in class during their absence. The professor will report to the Office of the Registrar those students who: have not attended three (3) consecutive classes during a semester without a reasonable excuse, or two (2) classes in a summer session. The professor will also refer WN (Non Attendance) will be placed on those students’ academic records at the end of the term.

GRADING SYSTEM
The Office of the Registrar distributes final grades after the end of each term. Students are graded according to the following system of letters and percentage values.

<table>
<thead>
<tr>
<th>Letter</th>
<th>Percentage</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>90-100</td>
<td>excellent</td>
</tr>
<tr>
<td>B</td>
<td>80-89</td>
<td>good</td>
</tr>
<tr>
<td>C</td>
<td>70-79</td>
<td>average</td>
</tr>
<tr>
<td>D</td>
<td>60-69</td>
<td>deficient</td>
</tr>
<tr>
<td>F</td>
<td>0-59</td>
<td>failure</td>
</tr>
</tbody>
</table>

A  4 grade points per credit hour  
B  3 grade points per credit hour  
C  2 grade points per credit hour  
D  1 grade point per credit hour  
F  0 grade points per credit hour

In special cases the following grading system will be used:

W - Official Withdrawal
I - Incomplete Work

IP - To be awarded only with the Registrar’s permission in courses that span more than one term.
P - Passing Grade – Grades of P are not counted toward the grade point average.
NP - Failure
NR - Not Reported
* - Repeated Course
WA - Administrative Withdrawal
WN - Non Attendance – enrolled but did not attend classes.
AU - Audit Course
T - Transfer Credit

GRADE CHANGES
Students who believe that there is an error in one or more grades should notify the Office of the Registrar within the first thirty (30) calendar days of the beginning of the next session. Students who do not receive their grades at the end of any semester should immediately contact the Office of the Registrar.

An instructor may change a previously assigned grade by processing an official change of grade form in the Registrar’s Office. The instructor must request the grade change form, cite the reason for changing the grade, and submit it to the school or program dean(s) for approval. All grade changes must be submitted to the Registrar’s Office no later than the last day of class of the following semester.

GRADE APPEALS
If the student feels that he or she has not been graded fairly, (s)he should first consult the professor. If this proves unsatisfactory, the student should then consult the dean of the school or program. If still unsatisfied, the student may consult the Vice Chancellor and submit an official grade appeal to the Registrar’s Office. A committee hearing will be scheduled.

INCOMPLETE “I” GRADE
The student will receive a provisional grade of INCOMPLETE only in the case of a justifiable absence from the final examination and if there are a minimum of three partial grades required in the course.

The opportunity to make up the examination or final project will be offered only to those students who have a chance of obtaining a minimum final grade of “D”.

It will be the responsibility of the student in question to make the necessary arrangements with the professor or dean of the corresponding area to determine the final project and to change the INCOMPLETE.

The INCOMPLETE (I) status can be changed if the student completes the required work within the first thirty (30) days
of the next academic session, in accordance with the established dates of the academic calendar.

The student who, due to the INCOMPLETE received in one or more courses, does not demonstrate academic progress, will recuperate financial aid once the INCOMPLETE is removed in accordance with institutional norms, providing that this occurs within the deadline established by the federal government for assigning such aid.

For the purpose of evaluating a student’s satisfactory academic progress at the end of the academic year, the (I) will be considered. After the removal of the Incomplete (I), he or she can appeal the institutional decision regarding academic standing.

**REPEATING COURSES**

Students may repeat a course in order to improve their academic average. Credit will be given for the higher grade, which will be used to compute the grade point average. If the grade in the second attempt is the same as the first, only one will be used to calculate the cumulative average.

Students who wish to repeat a course may do so. However, they must repeat all courses required for graduation where a D, F, or W grade was obtained.

The institution will allow students who earned a C, D, F, W or WF, WN in a course to receive financial aid to repeat the course, provided that 150% of the intended courses have not been exceeded.

Students who repeat a course will receive the higher grade. If the grade obtained in a repeated course is the same as the previous grade, it will count for the cumulative average, but will count only once for the graduation GPA.

With respect to practicum courses, the student will have only two opportunities to repeat the course, pending the recommendations and approval of the program dean and practicum supervisor.

A student will not be able to repeat the course until a grade has been posted.

**WITHDRAWALS**

Students wishing to officially withdraw from a course or from the institution must file an application with the Office of the Registrar within the period established in the academic calendar. A reduction in course workload may jeopardize the student’s financial and/or veteran’s benefits.

The academic standing of the student will not be affected by partial or full withdrawals from the institution so long as the withdrawal is carried out before the end of the period specified by the institution for tuition refund eligibility. In the case of full withdrawal from the institution, the student will be considered not to have studied that semester.

Dropping courses or withdrawing from the institution after the end of the above-mentioned specific period will affect the academic standing of the student. The student will be classified in the category in which he or she falls at the end of the period for withdrawal eligible for refund of registration fees.

Repeated courses will be considered when determining students’ academic progress.

**CHANGES IN THE PROGRAM OF STUDIES**

Students can apply for a reclassification in program or major if they comply with the following:

1. Have an interview with the school dean
2. Apply for reclassification at the Office of the Registrar.

Students can apply for only one reclassification during a semester. No applications will be considered during the summer. The applications must be submitted within thirty (30) calendar days after the third week of class of each semester.

Students in Technical/Professional Programs who wish to be reclassified into undergraduate programs should fulfill graduation requirements and apply for graduation.

The admission criteria will consist of the grade point average required for graduation and the grade point average required by the school or program to which the student is applying. In addition, the dean of the school which will admit the student will determine which courses will be accepted as valid.

All enrolled credits and the cumulative average of the previous program will be counted for the purposes of the Satisfactory Progress norm of the program into which the student has been reclassified.

**STANDARDS FOR ACADEMIC PROGRESS**

There are three categories of regular students according to their grade point average and number of courses completed: students with excellent achievement; students with satisfactory achievement; and students on probation.

Students with a satisfactory academic progress are those with a grade point average equal to or higher than the established retention index and who satisfy the percentage of approved credit hours established by the academic norms.

At the end of each academic year, the Registrar will determine the grade point average (GPA) and the credit hours required of each student per academic year. This information will be measured against the established retention standards in order to determine the academic status of the student.

Academic progress of students admitted as transfer students will be evaluated for retention purposes at the end
of their first year; credits and grade point average prior to that year will not be considered.

**ACADEMIC PROBATION**

Students whose academic achievement is below the established retention index or who do not complete the percent of approved credit hours required according to regulations will be placed on academic probation for one (1) year, during which time they will be eligible for economic assistance. For students of Technical Programs, the probation period will be for one (1) semester.

Upon completion of the probation period, students must meet the required percentage of credit hours and grade point average, as established by their academic degree program.

For retention indexes, and percentage of credits required, see Appendix.

**ACADEMIC SUSPENSIONS**

Students will receive a one (1) year academic suspension if the cumulative academic index is lower than the retention index, or if they have not met the percentage of required credit hours upon completion of their probation period.

The University will not accept courses, diplomas or degrees earned by a student during the academic suspension period.

Students who wish to be readmitted upon completion of their academic suspension period must meet the current university readmission requirements.

Students who interrupt their students or program during the probation period will be still considered on probation during the readmission process.

Readmitted students who have completed their one (1) year suspension period will be evaluated by the Admissions Committee of their academic program. Upon readmission, students will be placed on probation for a second period.

If a student does not meet the required retention index and the percentage of approved credit hours during the second probation period, he or she will be suspended academically for a maximum period of two (2) years.

The institution may suspend a student on recommendation of the Disciplinary Committee or the Vice Chancellor of Student Affairs, following the dispositions of the Student Regulations available in the Students’ Rights and Responsibilities Manual.

Under extraordinary conditions, the Academic Suspension Appeals Committee may approve an additional probation period of one (1) year if a student is able to complete all the graduation requirements within that academic year.

**APPEALS**

A student may appeal an institutional decision regarding satisfactory academic progress, if under extenuating or crisis circumstances he or she was not able to meet the requirements or conditions established by the University. The University will consider the following crisis or extenuating circumstances to accept a student’s appeal and to grant an exemption from the Academic Progress Policies: illness of the student or a relative, economic crisis due to illness affecting the a head of household, natural disasters, divorce, death in the immediate family, family problems, legal circumstances, and justified changes in academic objectives which cause an impact on the student’s academic progress.

**APPEALS COMMITTEE**

The Appeals Committee will be composed of one representative from each of the following offices: Dean of the School, Registrar, and Vice Chancellor for Student Affairs or designated representatives.

**APPEALS APPLICATION**

a. Students who meet any of the academic progress appeals criteria must submit all the necessary documentation to justify their request.

b. If a student requests an appeal based on a mathematical or calculation error, and it is corrected by the Office of the Registrar, he or she will not go through the full Appeals process.

**REINSTATEMENT OF FINANCIAL AID**

If a student’s appeal is accepted by the Appeals Committee, he or she will be eligible to receive financial aid as long as he or she meets the federal financial aid deadlines and guidelines.

Appeals decisions are issued in writing by the Office of the Vice Chancellor for Student Affairs. This communication is issued by the Office of Admissions and Financial Aid to reinstate a student’s financial aid package.

If a student meets the conditions regarding his or her academic progress or those related to any academic sanction, he or she will be eligible to receive financial aid during the following enrollment period.

**STUDENT RIGHTS AND RESPONSIBILITIES**

A Students’ Rights and Responsibilities Manual, available to all students, sets forth the rights of students, along with corresponding responsibilities. This document also
addresses issues associated with the relationship between the student and the University. It provides information on protection in academic pursuit and privacy of records; sets forth all the conditions for responsible behavior on the campus; lists the various appeal and grievance procedures available to students; and includes a section on student discipline with control and discipline of college students. This document complies with relevant federal regulations such as the awarding of financial aid, protection of privacy of records, and equal access/equal opportunity.

FAMILY RIGHTS AND PRIVACY ACT INFORMATION STATEMENT
Universidad del Turabo has a longstanding commitment to protect students’ rights and privacy of information. This commitment will continue as a matter of University practice. The University complies with the provisions of the federal Family Rights and Privacy Act. These federal and state requirements relate to accessibility and confidentiality, provide pertinent and detailed information concerning classification of student records, and access and release provisions.

University procedures are available to students, faculty, administration, and staff in the Office of the Vice Chancellor of Students Affairs, as well as in other offices and departments of the campus. In addition, the complete procedures are published in the Student Manual.

RELEASE OF STUDENT INFORMATION
In accordance with Public Law 93-380, FAMILY EDUCATIONAL RIGHTS AND PRIVACY ACT, students at Universidad del Turabo have the right to inspect educational records and to correct such records as warranted. The institution protects students from release of information for inspection and review unless he or she waives this right. The parent(s) of U.S.C.S.s. 152 Internal Revenue Code also has the right to inspect records, which are maintained by the University on behalf of the student.

There are two distinct categories of records: (1) directory information records, and (2) limited access records.

Directory information, which may be made public, includes the student’s name, last known address, telephone number, date and place of birth, major field of study, participation in officially recognized activities and sports, weight and height of members of athletic teams, dates of attendance, degrees and awards received, and the most recent previous educational agency or institution attended by the student. The office of the Vice Chancellor of Student Affairs will only release this information after the petitioner has demonstrated a legitimate need to have such information. Students who do not wish release of “directory information” must complete a statement in the Office of the Registrar no later than the last day of each term; otherwise, directory information may be disclosed by the University for legitimate purposes.

Limited access records pertain to the permanent academic records of the student, disciplinary records, financial information, and testing data. This category also includes all records maintained officially by the institution which do not come under the categories of directory information, or sole possession records. The institution will not release information in limited access records unless it has the written permission of the student or parent.

GRADUATION REQUIREMENTS
Universidad del Turabo students will be eligible to receive academic degrees after meeting the following requirements and procedures:

Students must apply for graduation at the Registrar’s Office during the period established in the academic calendar. Completion of the courses required for the degree as set down by the institution.

Completion of the number of credit hours required for the degree with a minimum grade point average of 2.00.

The minimum grade point average in the major is 2.30.

To compute the grade point average for graduation, only successfully completed courses which were requirements for the degree or certificate will be considered.

All students who enter Universidad del Turabo will be subject to the graduation requirements in force during the year they were admitted. Nevertheless, if the curriculum was modified, the student can choose to graduate under the new curriculum, but not by a combination of both.

Transfer students must complete at Universidad del Turabo at least the last thirty (30) credit hours of a bachelor’s degree and the last twelve (12) credit hours of an associate degree. The student must complete the last twelve (12) credits of its major at Universidad del Turabo.

Students must also settle any debts with the institution. No document certifying graduation will be given until documentation has been presented that there are no outstanding debts.

All students applying for readmission will be subject to the requirements for graduation in effect during the year they are readmitted.

Commencement exercises will be held once a year, at the end of the second academic semester. Students who meet graduation requirements at the end of any term or summer
session may apply to the Office of the Registrar for certification to that effect.

HONOR AWARDS
Students are eligible for the following honor designations according to their cumulative grade point average:

Certificates
- Honors: Average of 3.75 to 3.89
- High Honors: Average of 3.90 to 4.00

Transfer students may graduate with honors if they obtain a minimum of 20 credits and an average of 3.75 or higher.

Associate Degrees
- Cum Laude: Average of 3.50 to 3.69
- Magna Cum Laude: Average of 3.70 to 3.89
- Summa Cum Laude: Average of 3.90 to 4.00

Transfer students may graduate with honors if they obtain a minimum of 60 credits and an average of 3.50 or higher.

COURSE VALIDITY
Credits earned through courses taken at Universidad del Turabo or at an accredited institution will be valid for a maximum of 12 years. After that period the credits will lapse.

STUDENT SERVICES
Universidad del Turabo improves and advances the student experience by streamlining its student services into one centralized location, the Integrated Student Services Center (CISE, from its Spanish acronym). The purpose of this Center is to provide competent professional assistance in two areas: (1) enrollment management services and (2) academic and personal support services. The Vice Chancellor of Student Affairs oversees the development and growth of these areas.

ENROLLMENT MANAGEMENT SERVICES
The Office of Marketing and Recruitment recruits new students, transfers and readmissions. It disseminates information on UT academic offerings, strengths, and services through various promotion and recruitment activities. It coordinates and offers orientation activities to recruit students into doctoral and graduate programs by means of integrated campaigns. The Office develops year-round activities of recruitment with key personnel of the schools.

The Admission and Financial Aid Office offers financial aid orientation, evaluates and processes admission requests, and admits students within the parameters established by each school. It also analyzes documentation and assigns state, federal and institutional funds, while maintaining communication with the student on the status of his/her request for admission and financial aids. Among others essential functions, the Office coordinates the process of interviews and admission of prospective students with the different schools. It also administers and coordinates Title IV programs and processes the funds of proposals, athletic, administrative and honor scholarships.

The Bursar is responsible for applying the fee policies and administering the payment plans that guarantee institutional incomes. This officer notifies and monitors the compliance of the fiscal policy established by the Vice Presidency of Financial Affairs, establishes the process of validation of registration, administers the application of federal funds refund policies and registers the private and public contracts of agencies. It also applies refund processes and the emission of checks to students, registers payments and maintains the collection system of the students’ accounts.

The Office of the Registrar, in addition to handling student registration each term, provides various services for students. This office provides transcripts of students’ academic records, verifies and certifies enrollment status, mails final grade reports, processes grade changes, orders and issues diplomas, processes changes in name, address, and telephone number.

ACADEMIC AND PERSONAL SUPPORT SERVICES
These services are provided in a variety of forms and settings, including individual counseling and educational groups, workshops, seminars, formal classes, as well as the traditional one-on-one tutorial sessions. The Center’s staff has been professionally trained and they are committed to helping students to make the most of their university experience. All services are provided on a strictly confidential basis, and respect the individuality of each student.

Counseling services are available to students with educational, personal, and decision-making concerns. A wide variety of programs, workshops, counseling opportunities and informational materials are provided to help Turabo students meet the challenges of university programs and experiences. There are individual counseling and testing services for occupational and educational assessment. These services are offered by two units, each targeting different needs and special populations: (1) Quality of Life and Student Well-Being Services and (2) Student Development and Retention Services. These services are offered from 8:00 am to 7:00 pm, Monday through Thursday, 8:00 to 5:00 pm on Fridays and from 9:00 to 12:00 on Saturdays.
The Quality of Life and Student Well-Being Office designs, develops, and promotes an extensive system of programs, services and activities that facilitate the integration of multidisciplinary resources to create an atmosphere of respect, welfare and quality of life. The office promotes an ecological model of health, which encourages healthy life styles through activities related to awareness and education on topics such as violence prevention and the use of drugs, alcohol, and cigarettes. The Office encompasses, counseling and multidisciplinary services, a health services program, an education and prevention program (PREVEA), a community connection program, volunteer projects and student organization support. It also serves as a resource center for Internship and practicum students.

In addition, this office coordinates the “Easy Access” Program, which offers special services for disabled students. These services include: parking, educational goal planning, tutoring and other student needs. The students should register with the program at the beginning of their admission process.

The Student Development and Retention Services office is responsible for promoting the integration and adjustment of new students. It articulates the administration of diagnostic tests and carries out the academic orientation and counseling of first and second year students. The Office articulates projects for the improvement of the academic performance and retention in association with the schools and off-campus centers. Individual and group counseling services, tutoring, extra-curricular activities and peer support groups are offered to improve new students’ adjustment processes to university life.

Academic Development and Support Services are available through two complementary programs of the Student Development and Retention Services Office. Their services are developed through funds awarded by the federal Department of Education and by other institutional funds. The Complementary Educational Services Program and the Supplementary Instruction Program promote support services for students with academic difficulties through tutoring, mentorships and supplementary instructional activities.

Career and Placement Services are offered by the Office of the Assistant Vice Chancellor of Career and Placement. This office is responsible for satisfying the employment needs of students, alumni and community members and for improving their employment skills, increasing productivity and competences, thus bringing about the client’s effective placement. The office functions as a “one-stop” career center and through diverse alliances with the government’s Employment Center (Consortium Caguas-Guayama), integrated services are offered, such as counseling, vocational testing, evaluation of employment skills, preparation of résumés and letters of presentation, referrals to governmental agencies and access to Puerto Rico’s Department of Labor updated employment offerings through a technological laboratory of resources.

To assist students in career planning, a career reference library is provided with the center’s printed, audio and videotape materials about specific occupations, skills, and requirements for jobs, educational and career matters. The computerized occupational information system provides current educational and labor market requirements, skills specification and other information to be used in the decision-making process. Consulting services for student, faculty, administration and community members are offered through this unit. An active job placement assistance program maintains continuous communication with employers. A computer database of prospective employers is in use. Students may register for part-time and full-time jobs or seasonal employment while pursuing their academic programs. Vocational counseling services are also offered to high school students from nearby communities.

The services are sponsored by institutional funds and with funds from two federal proposals: Hispanic-Serving Institutions Assisting Communities (HSIAC) Program and AmeriCorps Vista.

The Scholarship and Internship Program provides the opportunity for active students to request special scholarships and permits students to participate in academic-professional and research opportunities in different companies and educational institutions globally. The activities promoted by this office complement the student’s academic development and allow the development of professional abilities and personal skills to be integrated successfully in the work force. It also assists talented high school students in completing their university studies in the SUAGM. This program is funded by corporate, private, public, and institutional funds.

HEALTH SERVICES

Services are located in the CISE building. The health services staff consists of a part-time physician and a registered nurse. Their primary purpose is to provide students with emergency and ambulatory services. The student health services stress the concept of well-being and preventive medicine. Health education and counseling are available as well as treatment for medical problems. The staff is on duty Monday through Thursday from 8:00 a.m. to 8:30 p.m., Friday from 8:00 a.m. to 5:00 p.m. and Saturday from 8:00 a.m. – 12:00 p.m., and is available for emergencies, first aid, referral sources and medical counseling. Basic medical care is provided, but students are ultimately responsible for making arrangements for their own complete health care.
SERVICES FOR DISABLED STUDENTS
Federal and state regulations guarantee disabled students equal opportunity in post-secondary education. The university has created special support services to assist disabled students. These services include, but are not limited to, assistance in registration, counseling, financial aid, readers for the blind, interpreters for the deaf, class notes, as well as individualized classes and/or tutoring. Transportation services are available through a special partnership between Universidad del Turabo and the government’s Department of Vocational Rehabilitation. Services are coordinated in the Quality of Life and Student Well-Being Office.

ARMY, AIR FORCE (ROTC)
A formal agreement has been established between Universidad del Turabo and University of Puerto Rico for cross-enrollment of students in the Army Reserve Officers Training Corps (ROTC) and the Air Force Training Corps.

Students from Universidad del Turabo are authorized to enroll and attend classes in the ROTC Program at the University of Puerto Rico. Those courses will be considered as Universidad del Turabo resident courses. Credit will be granted and students will be entered in the official academic record.

Students will not be charged for courses taken in the ROTC Program. The United States Army and Air force through the University of Puerto Rico will provide ROTC textbooks, military type equipment, uniforms and military training. Students will have equal opportunity to compete for two and three year scholarships on a nationally competitive basis.

Semester credit hours for ROTC courses are as follow (Military Science-MS)

- MSI 2 credit hours (Fall Semester)
  (1 hour classroom; 1 hour Leadership Lab)
- MSI 2 credit hours (Spring Semester)
  (1 hour classroom; 1 hour Leadership Lab)
- MSII 3 credit hours (Fall Semester)
  (2 hours classroom; 1 hour Leadership Lab)
- MSII 3 credit hours (Spring Semester)
  (2 hours classroom; 1 hour Leadership Lab)
- MSIII 4 credit hours (Fall Semester)
  (3 hours classroom; 1 hour Leadership Lab)
- MSIII 4 credit hours (Spring Semester)
  (3 hours classroom; 1 hour Leadership Lab)
- MSIV 4 credit hours (Fall Semester)
  (3 hours classroom; 1 hour Leadership Lab)
- MSIV 4 credit hours (Spring Semester)
  (3 hours classroom; 1 hour Leadership Lab)
- MS 400-01 3 credit hours (Advanced Camp, Fort Riley, Kansas)
- MS 300-01 2 credit hours (Basic Camp, Fort Knox, Kentucky)
- AS 100 2 credit hours (Fall & Spring)
  (1 hour classroom; 1 hour Semester Leadership Lab)
- AS 200 2 credit hours (Fall & Spring)
  (1 hour classroom; 1 hour Semester Leadership Lab)
- AS 300 4 credit hours (Fall & Spring)
  (3 hours classroom; 1 hour Semester Leadership Lab)
- AS 400 4 credit hours (Fall & Spring)
  (3 hours classroom; 1 hour Semester Leadership Lab)

BOOKSTORE
Universidad del Turabo has a bookstore on campus. The store is operated as a service to students, faculty and staff. Textbooks, school and office supplies, and other course-related materials are available. In addition, gift items, stationery, greeting cards, paperbacks, and other articles are in stock.

AUTOMOBILES ON CAMPUS
The security director enforces traffic and parking regulations on and around campus. Traffic tickets may be issued for traffic and parking violations. Student parking stickers are issued to each student upon registration. The cost of parking is $.35 for students and $1.00 for visitors.

DINING SERVICES
The Student Dining Service provides a variety of options for students who wish to dine on-campus. The cafeteria offers breakfast, lunch and dinner, Monday through Saturday. Hot meals and fast food are available. Vending machines for snacks and refreshments are also located throughout the campus.

STUDENT ACTIVITIES
A combination of both extra-curricular and co-curricular activities is available on campus providing opportunities for all students to enhance their educational experience. The Office of Cultural and Social Activities is responsible for the diffusion and promotion of artistic events for the enjoyment and enrichment of the university community, according to its needs and interests. Each year, through the establishment of a visiting artist’s series, outstanding
musicians, singers, artists, dancers, lecturers and other performers share their talents and expertise with students. In addition to on-campus art exhibits, the academic schools present dance programs, musical concerts, athletic competitions, and theatrical productions.

**STUDENT GOVERNMENT**
Through student governing bodies, students have an opportunity for self-government and to participate with the faculty and administration in formulating appropriate policies. Student Council members are elected by secret vote by the members of the Student Government Assembly. The Council meets once a month. Students are represented in the institution’s governing bodies through this Council. Opinions and recommendations are presented to the Vice Chancellor of Students Affairs. Its members participate in academic, discipline, sports, and cultural activities committees.

**STUDENT PUBLICATIONS**
The institutional magazine *El Turabón* is published twice a year by students of the Communications program. It serves as a medium for all institutional activities and as a practicum experience for the students.

**STUDENT ORGANIZATIONS**
According to their interests, students may join religious, social service, academic, professional, and honorary groups. A fair is held at the beginning of each term to help new students get acquainted with and select the group or groups that interest them. All students are encouraged to participate actively in clubs and organizations.

**UNIVERSIDAD DEL TURABO CHOIR**
The Universidad del Turabo choir offers students the opportunity to cultivate their musical abilities and talents and enables them to represent the University in activities on and off campus.

**UNIVERSIDAD DEL TURABO THEATER WORKSHOP**
The theater workshop provides students with the opportunity to develop their abilities in the performing arts. The workshop organizes and produces one play per semester for the enjoyment of the university community and the community at large.

**ATHLETIC AND INTRAMURAL PROGRAMS**
Athletic and Intramural Programs within the Department of Physical Education of the School of Education play an important role in the educational process of Universidad del Turabo. The programs offer a wide range of recreational and intercollegiate competitive sports for all eligible students. Both individual and team sports have brought the university and individuals national recognition. An outstanding staff of administrators, coaches, and expert trainers work in unison to make the campus athletic programs for men and women a first-class endeavor. The university boasts 27 men’s and women’s varsity teams, which have won 102 champion and sub-championships since 1975. These triumphs include the record-setting achievement of winning the Intercollegiate Athletic League track and field championship 10 times since 1987. Universidad del Turabo athletes have also been champions in basketball, weight lifting, decathlon, heptathlon, cross-country, and relays. Each year, the intramural program allows participation of more than 7,000 active and passive students and faculty members. The teams are called the “Tainos” with their orange, black, and white colors. The sports facilities include indoor basketball and volleyball courts, tennis courts, free weight and Hammer machines gym, a 400 meter-track, swimming pool, baseball park, jogging trail and wellness center.

**VETERANS’ SERVICES**
The Veterans Services Office, located in the Registrar’s Office, is primarily concerned with the motivation of veterans and their dependents to effectively exercise their right to an education.

Veterans are assisted in the completion and processing of required documents for the purpose of establishing eligibility, certification of services and academic progress. These services are offered in close coordination with the Veterans Administration Office of Puerto Rico.

Veterans and their beneficiaries must complete their program of studies within the time established by their curriculum. Students who extend their studies beyond the time established by the program cannot continue to receive veterans’ benefits. If the student is a recipient of the Pell Grant, he may resort to the 150% additional time established by the institutional standard for Satisfactory Academic Progress. Veterans will be evaluated utilizing both veterans’ benefits and Pell Grant criteria, if they are beneficiaries of these.

Veteran’s Administration Office will not pay courses repeated in order to raise GPA. It will only pay failed courses (F, NP-Failure) or those that require a minimum approval grade. Veteran’s Administration Office will reduce benefits to the student as of the last day of attendance to a class.

**EDUCATIONAL RESOURCES**
One of the most important features of Universidad del Turabo is the Academic Resources Center, under the Office of the Vice Chancellor of Information Resources. The center is dedicated exclusively to helping students and faculty share a variety of academic resources that support, complement and enrich the teaching and learning
processes. The center is comprised of the following five areas:

INFORMATION RESOURCE CENTER
The Information Resource Center provides library resources, audiovisual material, archives, computer programs, electronic information systems, microcomputers, fax machines, audio and recording studios, graphic arts workshops, audience halls, and a gallery.

LIBRARY SERVICES
The Library Services Division provides printed resources, electronic resources through the virtual library, audiovisual material, and technological systems that facilitate obtaining information. In order to train students in the effective use of the library services and resources, the division maintains a program of bibliographic instruction, given both in the classroom and in the library. Its reference services have the latest in information systems and a wide variety of reference books. Access to resources is gained through an online electronic catalog (OPAC) that allows subject searches in Spanish and English. This electronic catalog provides access to external resources at many institutions in Puerto Rico and the world, through the Internet.

The Center has access to other databases and various full-text databases such as: ProQuest, DIALOG, Books in Print, Literary Market Place, ULRICH, The Engineering Index, ERIC, Cambridge Index, Chemical Abstracts, and HAPI. Local databases available are CONUCO, PCIP, ITS and ADENDI.

COLLECTIONS DEVELOPMENT
The internal collection of Universidad del Turabo totals up to 140,000 volumes. This includes books, journals, documents, microfilms, recordings, films, maps, drafts, plates, photographs, transparencies, slides, models and objects. The Center’s main objective is to develop collections that respond to academic needs, contribute to the humanistic education of the students, facilitate research and ratify accreditation.

COMPUTER RESOURCES
There are 115 computers for student and faculty use at various service points throughout the library. There are eleven computers in the Reference and Periodicals Service Area, two in the Circulation and Reserve Service Area, and eight in the library lobby. In the Electronic Information Room (Open Access Computer Lab), there are 74 computers and the Faculty Development Center has 20 computers available.

EDUCATIONAL TECHNOLOGY
The Educational Technology Division studies teaching methods, styles and strategies, so as to coordinate with the faculty in the creation of programs to improve curriculum, test new teaching methods, and promote educational innovations. This division is also responsible for designing, producing and integrating into the curriculum didactic resources and materials that promote systematic improvement and innovation in university education. The integration of educational resources into the teaching-learning process is aimed at enabling faculty to attain their educational goals and the students to obtain a high level of academic achievement.

DISTANCE EDUCATION
Distance Education is a special program component offered by Universidad del Turabo. Its main objective is to serve as a facilitating unit to support program offerings. It also supports educational and service programs that depend on one of the distance education modalities requiring the transfer of knowledge through the use of technology. At Universidad del Turabo, distance education focuses on four delivery modalities: web-based, web-supplemented, web-enhanced and Instructional Television Fixed Services (ITFS). A master’s degree program in business administration is being offered online by the School of Business Administration. The School of Education is offering courses in education via television media (ITSF). For additional information, please contact the Admissions Office or academic schools.

JOSEFINA CAMACHO DE LA NUEZ MUSEUM AND CENTER FOR HUMANISTIC STUDIES
The Museo y Centro de Estudios Humanísticos Dra. Josefin Camacho de la Nuez of the Universidadd del Turabo has been a museum and center for the study of the humanities at the Universidad del Turabo since 1980’s. Its mission is to collect, preserve, study, and disseminate the artistic and humanistic expressions of the regional and national Puerto Rican culture for the enjoyment and benefit of the university community and the general public. The museum started in one of the wooden historic buildings on campus of the sugar cane plantation Santa Juana. The Museum has a permanent collection of 3,000 objects. It has recently inaugurated a new 25,000 sq. ft. state of the facilities with galleries dedicated to the Archaeology of Punta Candelero, Puerto Rican Folk Arts, Puerto Rican Poster Collection, the History of the Central Oriental Region, Colonial Paintings from Latin America of the Lola and Antonio Roig collection, the Ana G. Méndez historical collection and a rotating exhibition space. It also has an Education Learning Center, the Walter Murray Chiesa Folk Art Archives, a 209-seat auditorium, an interior sculpture garden, a museum store and a café.

EVENING AND SATURDAY PROGRAM
Students may enroll in the regular academic programs offered by the Evening and Weekend College Program. The
evening division operates Monday through Thursday from 12:00 noon to 10:00 p.m., and the Weekend College opens from 12:00 noon to 9:00 p.m. on Friday, and from 7:30 a.m. to 4:30 p.m. on Saturday.

CONTINUING EDUCATION
The Continuing Education Program endeavors to strengthen social structure and to foster and develop academic programs according to the educational needs of the individual. These programs do not necessarily function under traditional academic rules, and their intention is to:
- Update the student’s knowledge.
- Supply educational opportunities for personal growth to people from a variety of educational backgrounds, thus satisfying certain social, personal or occupational needs.
- Implement professional training, both on-campus and in-house, to enhance the occupational advancement and personal development of personnel in the public and private sectors.
- Promote community activities that explore and seek solutions to social, political, and economic problems.
- Organize service programs for people who want to enrich their leisure time.

The program designs seminars, continuing education courses, conferences and life enrichment courses. Industries, government agencies, community institutions and the community in general benefit from this program.

SCHOOL OF PROFESSIONAL STUDIES
AHORA PROGRAM
The mission of the AHORA Program of the School of Professional Studies is to provide an accelerated educational process to adult students. The program differs from traditional methods of instruction in because the professional experience of participants is incorporated into the classroom to create an interactive, challenging and dynamic environment. Faculty members have professional experience and have been specially prepared to work with adults as innovative educational facilitators. AHORA is designed exclusively for the adult student; it offers a professional environment, as well as integrated, personalized and individualized services. To fulfill this mission, the School of Professional Studies intends to:
- Promote adults to value continuous learning and increase their contribution to the world of employment
- Facilitate adult students in attaining their educational goals
- Create a learning community that facilitates building new knowledge which is based on and is applicable to the professional and personal reality of adults
- Provide integrated student services of quality and easy accessibility to adult students
- Recruit and develop staff who knows and are able to meet the needs of adult students effectively
- Integrate technology into the academic, service and administrative processes
- Develop academic offerings that respond to the present needs of the professional and business world
- Establish a continuous process of feedback and assessment of all the processes and services.

DESCRIPTION OF THE ACCELERATED PROGRAM OF STUDIES
The AHORA Program is accelerated because all of its courses are offered in five or eight week sessions. During each session, classes meet once a week for four hours. The accelerated methodology is based on a learning process shared between the professor and the student. Each student receives a module which serves as a study guide and indicates the assignments and activities that must be completed to prepare for class. Our faculty is specially selected and trained to work with adult students through the accelerated mode, facilitating a class environment where learning is built on experiences and the assignments performed by the students. This model of accelerated studies can be applied to the different academic programs of the institution, to new academic programs or any other academic program where adult students participate. The courses are offered evenings and Saturdays (morning and afternoon). The student may take a maximum of two classes per session, completing six credits every five or eight weeks. Registration is continuous, with courses beginning fourteen times a year, and the possibility of completing up to fifty-four credits in an academic year. This way, the program provides greater flexibility for students, since they can accelerate their academic progress or design a class program that conforms to different commitments they may have during the year.

ADMISSIONS REQUIREMENTS
To fulfill its mission and goals, the AHORA Program admits only adult students who meet the following with academic and professional requirements:
- 23 years of age or older
- 3 years of work experience
- 24 credits of academic work at the postsecondary level

ACADEMIC PROGRAMS
Presently, the School of Professional Studies offers accelerated studies in the programs at Universidad del Turabo which are listed below.
Bachelor’s Degree in:
- Management
- Accounting
- Marketing
- Computerized Information Systems
- Office Systems
- Preschool Education (Cayey Off-campus Center)
- Social Sciences: Criminology
Master’s Degree in:
- Marketing
- Human Resources
- Criminal Justice

UT’s School of Business and Entrepreneurship is considered one of the largest and fastest growing in Puerto Rico with an enrollment of almost 4,000 students. Its academic offer ranges from certificates to doctoral studies. Programs that have been designed taking into consideration the needs and requirements of the industrial, entrepreneurial, professional and public sectors in the Island. The general areas of specialization in its academic programs are: Entrepreneurship, Management, Marketing, Accounting, Information Management and International Business. Other academic tracks such as quality, taxation, human resources and materials are offered under the main areas of specialization.

The School has a visiting faculty in the Management and Management Information System programs proceeding from countries such as: Spain, Mexico, India and the United States. Its regular faculty is integrated by 46 highly competitive members, 30 of which have doctoral degrees, 13 are in the process of completing one and 3 have a Master’s degree.

In the interest and objective of providing the student with a global business vision, the School of Business and Entrepreneurship maintains relationships and collaborative agreements with prestigious universities around the world.

Other institutions in process in: Spain, Peru, Brazil, Chile, United States and Costa Rica.

SPECIALIZED ACCREDITATIONS

In April of 2011, the School of Business and Entrepreneurship has earned the specialized accreditation by the “Association to Advance Collegiate Schools of Business” (AACSB, International). The School position itself as the only institution to have that accreditation in Puerto Rico and the Caribbean. AACSB accreditation is the hallmark of excellence in business education, and has been earned by less than 5% of the world’s business schools.

MISSION
“The Mission of the School of Business and Entrepreneurship at the Universidad del Turabo is to develop professionals, leaders and academics with a superior theoretical knowledge and practical skills for the creation and development of new enterprises and effective management of existing business. Our students acquire the skills, values and sense of social responsibility into its business practices through education that is entrepreneurial in spirit, ethical in their approach and global in orientation. Excellence in teaching is enhanced by a faculty committed with professional development, intellectual contributions and service. As a professional school of business, we want to impact positively the society, organizations and the communities in which our students and alumni are a part.”

VISION
The vision of the school is to be the leading School in business education and research in Puerto Rico and the Caribbean and the preferred partner for successful alliances for the government, private sector and non-profit organizations, both national and international.

STAFF

STUDENT ORGANIZATIONS

Association of Office Administration Students
Association of Accounting Students
Association of Administration & Materials Control Students
Association of Information Systems Students
Association of Management Students
Association of Trade Students
Student Chapter of the Chamber of Commerce

The different student associations in the School of Business and Entrepreneurship are created in order to foster unity and communication among the students, professors and professionals in the Business Administration area. Students have the opportunity to express their ideas and to participate in activities promoting their professional development. This gives students the opportunity to demonstrate qualities and characteristics which contribute to the success of all good employees and citizens. Students participate in activities both within and outside the Institution. Thus, students are offered opportunities to visit companies, to attend conventions and to participate in university competitions related to their profession.

CENTER OF TRAINING AND ENTERPRISE DEVELOPMENT
CADE

The Center for Training and Enterprise Development (CADE) is a business unit of the School of Business Administration. Its main goal is to collaborate with industries and with the community in the process of developing and strengthening the managerial and technological skills of professionals. With technology as a main concern, the faculty is at present designing the academic programs required. CADE has up-to-date computer laboratories which respond to the technological demands of the marketplace, thus permitting trainees to have hands-on experience with the latest technology while learning.

MISSION

To foster the creation and dissemination of innovations in administrative sciences using a technological approach for the benefit of the students, faculty, the entrepreneurial community and Puerto Rican society in general.

We promote the idea that a company that is technologically enabled is a company with greater possibilities of success in the global market.

Our courses teach basic skills which will permit the student to assimilate technological advances quickly.

The program emphasizes topics that will increase students' productivity and give them a competitive advantage, among which are:

Computer Area
- Basic course in handling computers
- Windows
- Internet: basic and advanced
- Microsoft Office: basic and advanced
- Microsoft Publisher: basic and advanced
- Desktop Publishing/WordPerfect: basic and advanced
- Desktop Publishing/Word: basic and advanced
- Visual Basic: basic and advanced
- Peachtree (Computerized Accounting)
- Web page design
- Workshop on handling a portable computer

Management Area
- Strategic planning
- Strategic management
- Quality and Total Quality
- Leadership
- Organizational change
- Organizational behavior and development
- Organizational culture
- Effective communication
- Handling of change
- Creativity in the development of work
- Technology Management
- The organization of the future
- Management processes
- Teamwork
- Empowerment
- Self-esteem
- Motivation
- Human relations
- Effective presentations
- Benchmarks
- Measurement of Processes
- Development of teamwork
- Effective meetings
- Interpersonal relations
- Conflict resolution
- Labor legislation
- OSHA regulations
- Supervision of quality
- Associated or Clients
- One-Minute Manager
- English conversation: basic and intermediate
- Public relations
- Business accounting
- Publicity and promotions
- Techniques to establish your own business
- Preparation of federal proposals

ASSOCIATE DEGREE IN EMERGENCY MANAGEMENT AND DISASTERS RECOVERY

The Associate Degree in Emergency Management and Disaster Recovery consists of 48 credits and has specialized tracks in technical areas of responses with management approach. The program combines courses in management and emergency management with a strong theoretical component. The program covers skills and knowledge required by employers and regulatory agencies.

It also includes preparation courses in FEMA (Federal Emergency Management Agency) Certification in Introduction to Incident Command System (ICS), Introduction to National Incident Management System (NIMS), An Introduction to the National Response Framework (NRF) and other special classes that allow professionals to keep updated in the discipline.

One of the advantages offered by this associate degree is that its contents covers all areas of Federal certification required by FEMA (Federal Emergency Management Agency), DHS (Department of Homeland Security) and the Executive Orders issued by the governor of Puerto Rico.

### ASSOCIATE DEGREE IN HOTEL ADMINISTRATION AND TOURISM

The Associate Degree in Hotel Management is proposed to prepare the student with advanced knowledge, strategies and skills to perform efficiently and successfully as a manager in a globalized industry. The skills to be developed and strengthen are: effective communication and writing (both Spanish and English language), integrating the latest and most effective techniques in the area, in addition to the basic skills like mathematics, computer and management, dominion of the most innovative marketing strategies, sales, and leadership applied to the Hotel Industry and Tourism. The degree will encourage the continuous development of the critical thinking and the interpretation of the organizational environment, including trans-cultural approach that allows the future graduates overcome cultural differences and capitalize on them to generate greater customer service and economic benefits for the organization. The student will develop the skills needed to serve in the performance of administrative services in the hotel industry with special emphasis on: customer service, cross-cultural management, reception, reservations, rooms maintenance and food and beverage management in hospitality. It is expected that students develop the necessary skills giving special attention to the English language and the use and management of the computer.

1. The ENGL 151 may require a previous course, according to the score obtained in the placement test or the CEEB English test.
2. The SPAN 151 may require a previous course, according to the score obtained in the placement test or the CEEB Spanish test.
3. COIS courses require to be enrolled in a lab section.
4. The minimum grade point average (GPA) for graduation is 2.30 in major courses and 2.00 in the general GPA.
5. Curriculum changes apply to new students, reinstates and transfers.
6. MATH 199 has a prerequisite (MATH 121) or to approve the placement test.

**COURSE DESCRIPTIONS**

(Courses marked with @ could be offered in both modalities, traditional or on-line.)

**ACCO 101**
**Business Mathematics**
**Three Credits**
Basic mathematics skills prepare students for accounting and finance courses. This course reviews percentages, simple interest, compound interest, discounts, commissions and proportions.

**ACCO 111-112**
**Introduction to Accounting I and II**
**Eight Credits**
Fundamentals of accounting, financial statements, theory of debit and credit, adjustments and principles of business analysis, voucher system and entries, procedure for issuing stock, problems related to corporations and partnerships, practice in handling accounts, fixed assets, obligations and an introduction to cost.

**Requisite:** ACCO 101

**ACCO 295**
**Managerial Accounting**
**Three Credits**
Use and interpretation of financial statements by management in planning and controlling a business. This course provides a sound background for accounting-related decision making. Topics studied include cash budgets, financial reporting, and capital budgeting. It also emphasizes the study and analysis of managerial accounting problems.

**Requisite:** ACCO 112

**ACCO 301-302**
**Intermediate Accounting I and II**
**Eight Credits**
A review of the principles of accounting for corporations, inventory, fixed assets, accounts receivable and payable, theories of income determination.

**Requisite:** ACCO 112

**ACCO 303**
**Cost Accounting**
**Four Credits**
A study of the principles of accounting related to costs and its functions. It includes cost and non-cost systems and methods of determining the basis to cost. Cost classification, preparation of cost reports and fixed standard costs.

**Requisites:** ACCO 201, ACCO 205

**ACCO 304**
**Auditing**
**Three Credits**
A review of accounting theory, auditing procedures, worksheets, internal control and fraud, preparation of financial statements, reports, forms, method and procedures. Attention is given to the nature and purpose of auditing, auditing standards, professional conduct, auditor legal liability and the approach followed in performing audits of financial statements. Special attention is devoted to auditor’s decision processes in internal control, auditing sampling, and accumulative audit evidence.

**Requisites:** ACCO 202, ACCO 205, ACCO 305

**ACCO 305**
**Income Tax for Puerto Rico I**
**Three Credits**
Study of income tax, its history and its purposes. The tax laws of Puerto Rico, inclusions and exclusions, allowable deductions, practice in filing individual, corporate and partnership returns.
Requisite: ACCO 112

ACCO 306
Accounting Information Systems
Three Credits
A study of the concepts, methods and tools used in the design of accounting information systems, and the function of budgeting in the management and control of business activities. Requires laboratory.

Requisite: ACCO 112

ACCO 350
Computerized Accounting Systems
Three Credits
The use of computers and microcomputers to record accounting data. Use of available software in recording transactions in registers and journals and posting to general and subsidiary ledgers. Computer preparations of trial balance, financial statements and payroll. Emphasis on accounting principles in the development of data entry skills. Requires laboratory.

Requisite: ACCO 112

ACCO 405
Income Tax for Puerto Rico II
Three Credits
This course emphasizes the study and analysis of Puerto Rico’s income tax law related to corporations, partnerships and special partnerships. It also includes other tax responsibilities: patents, property taxes, excise taxes and federal taxes applicable to employers in Puerto Rico.

Requisite: ACCO 205

COIS 101
Introduction to Computer-Based Systems
Three Credits
Introduction to computers and electronic data processing. Includes historical development, data organization, storage systems and types of peripheral devices. Data input and output. Also includes an introduction to microcomputer use and applications, word-processing and spreadsheets. Requires laboratory.

COIS 102
Programming Principles
Three Credits
Practical and theoretical introduction to basic programming principles. Includes development of logic, as well as the use of flow charts, structured flow charts and pseudo codes. Students will become familiar with editing and compiling programs.

COIS 106

Business Programming in BASIC
Four Credits
Programming principles emphasizing practical applications in business using BASIC. Structured programming techniques will be developed along with appropriate documentation for the programs, including flowcharts, hierarchy charts, documentation sheets for the program and its modules. Requires laboratory.

Requisite: COIS 102

COIS 107
Programming in COBOL
Four Credits
Introduction to computer programming in a business environment, emphasizing structural design of programs, development, testing implementation and documentation of common business applications in COBOL. Requires laboratory.

Requisite: COIS 102

COIS 201
Data Processing Principles
Three Credits
This introductory course acquaints the student with the organization, functions, capabilities, limitations and applications of modern computer systems in the field of business administration. Analysis and design methods and techniques for information systems and data processing are explained. Includes hands-on experience using word processing and spreadsheet applications on microcomputers. Requires laboratory.

COIS 250
Systems Analysis and Design
Three Credits
Study of the systems development cycle, with emphasis on the present system documentation, using the classic tools and techniques as well as the structured ones. It includes the use of these resources for describing processes, data flow, data structures, forms design for data gathering and reports. It also discusses data gathering activities and information, progress reports, and the transition from analysis to design.

Requisite: COIS 102

COIS 290
Systems Development Workshop
Three Credits
A practice course in which the student is required to develop a project with a real application. Includes analyzing, designing programming and implementing a simple computerized system. Requires laboratory.

Requisite: COIS 250
EMDR 101
Introduction to Emergency Management Mitigation & Preparedness
Three Credits
Accidents and emergency situations have plagued man since the beginning of history and will undoubtedly occur during our conceivable future. Armed with knowledge and skills for managing such occurrences can lessen their impacts on society. This course presents the theories, principles, and approaches to emergency management. The philosophy of Comprehensive Emergency Management will be discussed with the four attendant steps of current FEMA’s strategic model. Legal issues involving emergency management will be presented.

EMDR 102
Introduction to Incident Command System
Three Credits
This course introduces the Incident Command System (ICS), and provides the foundation for higher level ICS training. The course content describes the history, features and principles, and organizational structure of the Incident Command System. It also explains the relationship between ICS and the National Incident Management System (NIMS). ICS orientation is intended for personnel assigned to an incident or event who have a minimum requirement for understanding ICS. This course will review the ICS organization, the basic terminology, and common responsibilities. It will provide enough information about the ICS to enable the student to work in a support role at an incident or event, or to support an incident from an off-site location.

EMDR 201
Emergency Management Planning
Three Credits
This course introduces the basic policies, concepts, and procedures of planning and addresses the various federal and state assistance programs. Emphasis is placed on the coordination of damage assessment, preparing documentation, and recovery procedures. Students will be introduced to the emergency management planning process, planning standards, planning techniques, and the steps in the development of a basic emergency management plan, special events contingency planning, debris management plan, and its functional annexes. This course is designed for emergency management personnel who are involved in developing an effective emergency planning system.

EMDR 203
Occupational Safety and Health
Three Credits
This course offers the student with the rationale of providing an occupationally safe and healthy work environment for employees. These skills are needed to be able to work effectively in the area of human resources and employee development as well as industrial relations since law has provided workers with specific safety and health rights.

EMDR 206
Introduction Emergency Management Response and Disasters Recovery
This course provides an overview of hazards theory, emergency management fundamentals and the science of natural and manmade hazards. Both natural and technological hazards are studied with the perspective of response and recovery focus. Some of the topics include response and recovery to earthquakes, tsunamis, volcanoes, floods, wildfires, terrorism, and hurricanes. An analysis of past disasters will be presented along with their impacts on policy formation leading up to the current FEMA all-hazards approach. The role, duties, and importance of the Emergency Manager will be discussed throughout the semester.

EMDR 240
Emergency Preparedness, Response and Planning for Hazardous Materials
Three Credits
This course utilizes a modular format where an emergency management department may analyze its current level of competency and choose course modules that will provide the skills needed by its hazardous materials team. Training includes offensive procedures for mitigation of hazardous materials spills, leaks, and exposures. Topics include chemistry, detection devices, advanced recognition and identification, pre-incident planning, incident management, scene evaluation and termination, terrorism, toxicology, medical surveillance, emergency care, PPE usage and limitations, and decontamination.

Requisite: EMDR 203

EMDR 245
Weapons of Mass Destruction (WMD)
Three Credits
This course provides an introduction to the issue of weapons development proliferation, a non-proliferation around the world. We will examine the basic technologies and motivations, and impact of the development of nuclear, chemical, and biological weapons and ballistic missiles on the international security. Will discuss the various
international strategies to counter weapons proliferation - treaties, multilateral conventions and informal arrangements. Examine the challenges of weapons proliferation - such as domestic safety, regional stability and security, and transnational terrorism. This will be done through national and regional case studies - where we will discuss actual and potential US and international strategies/response to each case.

Requisites: EMDR 203, EMDR 206

EMDR 250
Disaster Management Plan Development
Three Credits
This course will provide a broad introduction to the critical challenges of disaster management and policy. The central purpose of this course is to examine strategies for reducing the hazards posed by disasters. It will focus on what can be learned from the history of disasters, and on how we can apply those lessons to manage future disasters. This course is designed to student from a research or policy perspective and for those who may be charged with responsibility for on-the-scene intervention. It will conclude by examining organizational and individual behavior in high-stress situations. Throughout the semester, particular attention will be paid to how disaster management efforts can increase the vulnerability of some populations or can promote widespread resilience.

Requisites: EMDR 101

EMDR 260
Internship of Emergency Management I
Three Credits
This course integrates the knowledge acquisition in the Associate Degree courses. It applies the management concepts, principles and practices conducting a project within the students’ specialization area. Methodology on project management, schedule of activities and task control, formal presentations and group dynamics to deal with management problems is emphasized. It includes an emergency management situation in the context of problem diagnostic and analysis, development of alternative solutions, tools development, implementation of alternatives/tools, and the evaluation of implementation. Requires 60 hours on a practice internship.

Requisites: EMDR 250

HOTU 201
Hospitality Management
Three Credits
This course gives the students the industry know-how and the management skills needed to thrive in all aspects of the field, from food service to lodging to tourism. The course offers the most comprehensive and engaging introduction to this exciting field possible. Also students could learn everything from careers to operations to finance. Students should appreciate the organization of the chapters which will help them to understand the relationships between the various topics described before. Finally, students will have gained a strong overview of the industry, where it fits into the broader world, the major career paths, as well as the important issues and challenges that managers face.

HOTU 202
Cross-Cultural Management for Tourism
Three Credits
This course describes the main cultural differences inside the tourism and hospitality areas. So this course will explain the meaning of culture and the way to solve conflicts and misunderstandings among the different cultures. It will analyze the cultures elements, and the student’s understand how to perform and communicate effectively with clients of very different cultural backgrounds. The student will learn how the cross cultural elements can affect the way an individual behaves, and the social elements of the culture, like Trompenaars and Hofstede and with the most relevant knowledge until present time referring to the tourism and hospitality areas.

HOTU 203
Principles of Tourism
Three Credits
This course will be able to know in a general way the different areas of the tourism in the context of the global business. The student will be able to have a tourism’s integral vision (their principles, practice and philosophies), so that way the student will develop and advise functional tourism circuits. This course offer tourism’s theory and practice, with an unparalleled discussion of recreational travel today. This course gives the students the most relevant planning, social policy and marketing issues of the
tourism activity. Finally, it discusses the future that the tourism is taking at a global level.

HOTU 204  
Front Desk Management  
Three Credits  
This course has been designed to prepare the future hotel receptionist and manager in the integration of the diverse technologies in all the aspects of the proper functioning of the reception and the process of reservation in a modern hotel. Including also the competitions to execute the first impressions of the customer, evaluating the specific needs of him, with the intention of enhancing the service giving.

HOTU 205  
Room and Maintenance Management  
Three Credits  
The course includes the knowledge and development of management techniques to use in the maintenance areas of the hotel structure, through a realistic and exhaustive study of the areas of Management, Security and Maintenance. The course will contribute for the training of the students in the search for suitable alternatives to raise the quality of their services. Through a preventive maintenance and security in the hotel structure.

HOTU 206  
Food and Beverage Management  
Three Credits  
The students will learn of the characteristic of the production, to stock up and the preservation of different types of beverages and foods, the service processes, and advising the customers. They will learn rules and hygienic measurements, and healthiness with special attention to the legal responsibility. The students through the internalization of these contents will be able to manage the production process of the beverages and food for the adaptation to the customer needs.

MANA 131  
Human Relations in Business  
Three Credits  
Studies personal and interpersonal relationship in the decision-making process. Analyzes the dynamics of leadership and group behavior through discussion of different cases, examines labor-management relations in production, communication and sales.

MANA 204  
Business Law  
Four Credits  
A study of the legal aspects of common business transactions with emphasis on Puerto Rican legislation. Special attention is given to contracts, sales, marketable securities, transfer of property, deeds and mortgages.

MANA 210  
Management Theory  
Three Credits  
A study of traditional principles of business administration compared to new concepts. Analyzes the management process through discussions of the four basic principles of business administration: planning, organization, administration and control.

MANA 213  
Personnel Administration  
Three Credits  
A study of the theory and application of fundamental principles of human resources management in an enterprise. The dynamic role of the manager and his relationship to personnel. The course also looks at issues in human resources management and their relation to the general objectives of the enterprise.

Requisite: MANA 210

MANA 230  
Organizational Behavior  
Three Credits  
Study of classical and contemporary organization theories; interpersonal and organizational behavior; motivation, communications, and leadership theories; and decision processes in organizations.

MANA 300  
Ethics in Business  
Three credits  
Ethical principles involved in the decision-making process in a business environment. The student will be learning concepts related to moral aspects of human behavior within the whole social system, and particularly in business settings or in groups where the individual operates.

MANA 306  
Government and Business  
Three Credits  
A study of the role of government in the free enterprise system and legislation created to control or regulate commerce.

Requisite: MANA 204
MANA 308
Real Estate Management
Three Credits
Fundamentals of real estate and the essentials of brokerage, financing, mortgages, investments, property administration and appraisals.

Requisites: MANA 210, FINA 202

MANA 316
Small Business Management
Three Credits
Planning, distribution of space and handling of materials, analysis of investments, inventory control, quality control and the analysis of methods to determine employee efficiency, as these apply to small businesses.

Requisites: MANA 210, STAT 201, MANA 340

MANA 321
Supervision and Leadership
Three Credits
This course provides a general view of the concepts, methods and modern supervisory techniques needed to become efficient business managers. Emphasis is on the supervisor’s responsibility and authority; the course highlights the role and functions of the supervisor. Theory is combined with practical observations, so that the student can become aware of all the fiscal, human and psychological resources that the supervisor must use in order to administer efficiently and effectively.

Requisite: MANA 210

MANA 340
Production and Operations Management
Three Credits
Analysis, planning and control of production facilities and operations. Includes the use of techniques and models for decisions related to: demand forecasts, product mix, plant location, quality control, inventory control, and the human factor in the production process.

Requisites: STAT 201

MANA 401
Business Policies
Three Credits
Helps integrate knowledge acquired in the first three years of business administration. Includes a study of business in all its stages, as well as its social and environmental impact.

Requisite: MANA 340

MANA 404 @
Labor Relations
Three credits
A multinational approach to labor relations, giving special attention to Puerto Rico. Analysis of the origins of labor unions in Puerto Rico. Labor laws in Puerto Rico and federal laws related to the island. A study of arbitration and complaint procedures and the selective analysis of current situations in labor.

Requisite: MANA 213

MARK 133
Principles of Marketing
Three Credits
The processes involved in the distribution of goods and services from producer to consumer. Studies the comprehensive system of marketing, including management-controlled variables: product, price, promotion and distribution; and external variables such as government, the economy and society. Also studies consumer behavior, modern marketing trends, market definition, and placement and information systems, among other topics.
José Domingo Pérez School of Engineering Distinguished Professor:

William R. Dawes, Jr., PhD in Physics, University of Arizona

Daisy Román / Administrative Director
Luz Vilches / Director, Engineering Advising Office (EAO) and Student Services
Katia Placeres / Secretary
Dyanissie Medina / Secretary

Recognizing the need for engineering professionals in Puerto Rico’s accelerating economic environment, in August, 1990 the Ana G. Méndez University System (AGMUS) Board of Trustees approved in August, 1990, the establishment of a School of Engineering at the University of Turabo. The José Domingo Pérez (JDP) School of Engineering started with an initial enrollment of 75 students in Academic Year (AY) 1990/91 and currently offers, certificate and associate degrees in technology, Bachelor’s degree programs in Mechanical Engineering, Electrical Engineering, Computer Engineering and Industrial and Management Engineering, and Master of Science degree in Administration of Telecommunications and Network Systems in day and evening sessions. The School is committed to the success of every student and pursues this goal by offering small classes taught by highly qualified faculty, a wide range of student services, modern facilities and equipment, and opportunities for undergraduates to participate in faculty-directed research, special design projects and industrial internships.

The JDP School of Engineering is housed in the modern Sandia National Laboratories Engineering Building, named in recognition of the support provided by the U.S. Department of Energy. This facility includes classrooms, instructional and research laboratories, offices for faculty and staff, meeting and conference rooms, and study rooms. It was occupied in August of 1992. The building was expanded in 1998 to house seven Electrical Engineering laboratories designed for instructional and research use. In April 2010 was inaugurated the third phase by adding four laboratories, two classrooms, faculty, administrative and student associations offices and, as well as a study room.

The JDP School of Engineering has three engineering academic departments:

• Department of Mechanical Engineering
• Department of Electrical and Computer Engineering
• Department of Industrial and Management Engineering

In addition, the José Domingo Pérez School of Engineering (JDPSOE) has two institutes focused on certificate, associate and Master’s degrees in areas of advanced technology

• Institute of Engineering Technology
• Institute of Telecommunications

Engineering Programs Accredited by the EAC commission of ABET are:

B.S. in Mechanical Engineering
B.S. in Electrical Engineering
B.S. in Industrial and Management Engineering

Vision

The vision of the JDP School of Engineering is to become the school of choice for all students interested in a technology or engineering degree, and to be recognized for its excellence in teaching and research.

Mission

The mission of the JDP School of Engineering is:

• To provide our students at all degree levels, certificate, associate, bachelor and graduate, with an excellent education that allows them to become competitive at a national level in their chosen field of expertise, and responsive to the needs of their communities.
• To serve the community through scholarly activities at
the pre-college and college levels, through research
and development, and through programs that serve the
needs of industry.

Technology Curriculum

The JDP School of Engineering offers academic programs
leading to Certificate degrees in Electrical Technology and
Renewable Energy, and Computer Technology and
Networks, Associate degrees in Mechanical Engineering
Technology, Electronic Engineering Technology, Quality
Control Engineering Technology, Plastic Engineering
Technology and Computer Technology and Networks. These
curricula provide the student with the necessary skills
in mathematics, science, and communications to pursue a
technical career successfully.

The full-time associate degrees students who follow the
recommended course schedules can complete the
computer technology or engineering technology curriculum
in 4 semesters (2 years) Students of the certificate in
Computer and Network Technology can complete their
program in a period of eighteen months. While students of
the Certificate Program in Electrical Technology and
Renewable Energy will be able to do it in that one year
Program duration for part-time and transfer students will
vary, based upon course load and previous course work.

Application Process

The School of Engineering uses the same application
procedure as the Universidad del Turabo

Admissions Policy

Freshmen

The goal of the admissions policy for the Certificate and
Associate Degrees Programs of the JDP SOE is to ultimately
admit every student who is motivated to study engineering
technology or technology. Applicants to Engineering
Technology or Technology Programs must satisfy the
following admission requirements:

1. A High School Grade Point Average of not less than 2.0
   (4.0 being the maximum)

2. Students must have taken the Academic Aptitude Test
   offered by the College Entrance Examination Board
   (CEEB).

3. Placement Examination Scores for Mathematics,
   Spanish and English. The mathematics and the
   language programs at UT developed these exams in
   cooperation with the School of Engineering.

Transfer Students

The Director of the Engineering Advising Office (EAO), in
coordination with the Associate Dean, oversees the
admission process into the technology programs. The
Director has established a detailed advising procedure to
guarantee consistency of course sequencing, Requisites,
transference of courses, and other aspects pertaining to
transfer students.

During the initial advising session, the Associate Dean of the
School of Engineering fills in and discusses an advising sheet
with the new student, explaining which courses were
transferred, which courses could not be accepted, and
identifying which courses the student needs to complete
his/her degree requirements. A copy of the advising sheet
is given to the student. The Associate Dean also checks the
student’s records to make sure that he/she is in the proper
major and is eligible for the program.

The requirements for reclassification of students from the
JDP SOE Bachelor’s degree programs or from other
Academic Programs at Universidad del Turabo are the
following:

1. A grade point average (GPA) of not less than 2.0/4.0
   and a minimum grade of C in all courses.

2. During the initial reclassification session, the Associate
   Dean of the School of Engineering fills in and discusses
   an advising sheet with the student, explaining which
courses were validated, which courses could not be
   validated, and identifying which courses the student
   needs to complete his/her degree requirements.

Academic Advising

All technology students are referred to the Engineering
Advising Office to assure proper course sequence with
respect to Requisites. The Technology Advising Sheet
(please refer to the end of the catalog for a copy) is used for
this purpose. As a supplemental activity, all technology
students are encouraged to visit the director of technology
programs to discuss progress, academic goals, career goals
and professional aspects of the technology programs.
Course Policy

Requisites

The JDP School of Engineering enforces the Requisites in its Certificate and Associate degrees curriculum. Students who register for a course for which they do not have the necessary Requisites will be dropped from the course before the end of the term, and will be assigned a grade of WA.

Repeating Courses

Students may repeat a course in order to improve their Grade Point Average. Credit will be given for the higher grade, which will be used to compute the Grade Point Average. If the grade of the second attempt is the same as the first, they will both be used for cumulative average, but only once for the graduation average. Courses with grades of D or F will not count toward graduation and must be repeated. A student in the School of Engineering must complete all courses needed to fulfill graduation requirements (both engineering technology and non-engineering technology) with a grade of C or better.

Students are permitted three attempts to complete any course needed to fulfill graduation requirements (both engineering technology and non-engineering technology) with a grade of C or better. Courses for which a student receives a "W," WA, "WR," or "WN" are not counted as attempts. After two unsuccessful attempts, the student is placed on academic probation. The student must meet with his or her academic advisor to develop a plan to successfully complete the course on the third attempt. If the student does not successfully complete the course on the third attempt, the student is suspended from the JDP School of Engineering but may transfer into another academic program at the University of Turabo. Readmission to the JDP School of Engineering is at the discretion of the Dean of the JDP School of Engineering. Students may not repeat a course until a grade has been given. Students may be eligible for financial aid when repeating a course. Repeated courses will be considered in determining a student’s satisfactory progress.

Withdrawals

See the established university policy.

Graduation Requirements

Students of the JDP School of Engineering will be eligible to receive a Certificate or Associate degree after meeting the following requirements:

1. Completion of all the required course work.
2. Completion of the number of credit hours required for the degree, with a minimum Grade Point Average of 2.00
3. At the least, transfer students must complete the last fifteen (15) credit hours of a Certificate or Associate degree at the JDP School of Engineering.
4. The minimum Grade Point Average in their major is 2.00

Graduating Student Profile

Students that complete any of the technology programs at the Universidad del Turabo develop, as a minimum, the following characteristics:

- An ability to apply knowledge of mathematics, science, and technology
- An ability to repair systems, components, or processes to meet desired needs
- An ability to function on multidisciplinary teams
- An ability to analyze and interpret data
- An understanding of ethical responsibility
- An ability to communicate effectively
- A recognition of the need for, and an ability to engage in life-long learning
- A knowledge of contemporary issues
- An ability to use the techniques, skills, and modern tools necessary for technical practice

INSTITUTE OF ENGINEERING TECHNOLOGY

Nelson Martínez Ortiz, Director
B.S. in Electrical Engineering, Candidate for ME in Manufacturing Engineering

The Institute of Technology is a division of the JDP School of Engineering (JDP SOE) and is supervised by the Dean of Engineering with the aid of a program director. In general, graduates from this program will have a theoretical and practical knowledge of the rapidly changing world of technology. The curriculum also provides for developing the student’s knowledge and skills in data analysis, problem solving, computer applications and effective communication in English and Spanish. Graduates will also have the necessary educational background to continue studies towards a Associate or Bachelor’s degree in a related engineering area.
Vision of the Electronic Engineering Technology Program
To become the number one choice for all motivated students who wish to pursue an electronic engineering technology education in Puerto Rico.

Mission of the Electronic Engineering Technology Program
To prepare electronic engineering technology graduates professionally, so that they will be capable of fulfilling the technological needs of society and excel in the installation, troubleshooting and maintenance of electronic systems.

Objectives of the Electronic Engineering Technology Program
1. To help fulfill the need for technicians in the field of electronic engineering.
2. To deliver instruction using current technology, the most modern equipment, test instruments and computers.
3. To ensure the intellectual development of students enrolled in the program.
4. To develop technicians capable of undertaking leadership roles in professional, civic and social environments.

ELECTRONIC ENGINEERING TECHNOLOGY CURRICULUM

(61 credits; 2 years)
FIRST YEAR
1st Semester (15 credits)
ENGI 101 Introduction to Engineering Technology 3
ENGI 121 Introduction to Computers 3
MATH 121 Intermediate Algebra 3
ENGL 152 Intermediate Communicative English II 3
SPAN 152 Writing Techniques 3

2nd Semester (16 credits)
ENGI 161 Engineering Technology Graphics 3
ENGL 153 Advanced Communicative English 3
SPAN 152 Writing Techniques 3

SECOND YEAR
1st Semester (15 credits)
EETE 210 DC/AC Electronics 4
EETE 212 Digital Electronics 4
MATH 152 Algebra and Trigonometry II 4
PHSC 120 Technical Science 3
EETE 240 Review for License Examination of...
ASSOCIATE DEGREE IN MECHANICAL ENGINEERING TECHNOLOGY

The program emphasizes the analysis, installation, estimating, troubleshooting, and maintenance of new and existing mechanical systems. Graduates will also have the necessary educational background to continue studies towards a Bachelor’s degree in mechanical engineering.

Vision of the Mechanical Engineering Technology Program

To become the first choice for all motivated students who wish to pursue a mechanical engineering technology education in Puerto Rico.

Mission of the Mechanical Engineering Technology Program

To prepare mechanical engineering technology graduates professionally, so that they will be capable of fulfilling the technological needs of society and excel in the installation, troubleshooting and maintenance of mechanical systems.

Objectives of the Mechanical Engineering Technology Program

1. To deliver instruction using current technology, the most modern equipment, test instrument and computers.
2. To help fulfill the need for technicians in the field of mechanical engineering.
3. To ensure the intellectual development of students enrolled in the program.
4. To develop technicians capable of undertaking leadership roles in professional, civic and social environments.

ASSOCIATE DEGREE IN QUALITY CONTROL ENGINEERING TECHNOLOGY

The program focuses on areas of quality assurance for industrial or service environments. Graduates will also have the necessary educational background to continue studies towards a Bachelor’s Degree in Industrial and Management Engineering.

Vision of the Quality Control Engineering Technology Program

To become the number one choice for all motivated students who wish to pursue an education in the field of quality control engineering technology in Puerto Rico.

Mission of the Quality Control Engineering Technology Program

To prepare quality control engineering technology graduates professionally, so that they will be capable of fulfilling the technological needs of society and excel in the maintenance and improvement of quality systems.

Objectives of the Quality Control Engineering Technology Program

1. To deliver instruction using current technology, the most modern equipment, test instruments, and computers.
2. To help fulfill the need for technicians in the fields of quality assurance.
3. To ensure the intellectual development of students enrolled in the program.
4. To develop technicians capable of undertaking leadership roles in professional, civic and social environments.

QUALITY CONTROL ENGINEERING TECHNOLOGY CURRICULUM

ASSOCIATE DEGREE IN COMPUTER TECHNOLOGY & NETWORKS

The program focuses in areas of installation, estimating and maintenance of new and existing computerized systems and network infrastructure. Graduates will also have the necessary educational background to continue studies toward a Bachelor’s Degree in Computer Engineering.

Vision of the Computer Technology and Networks Program

To become the first choice for all motivated students who wish to pursue an education in the field of Computer Technology and Network in Puerto Rico.

Mission of the Computer Technology and Networks Program

To prepare computer technology and networks graduates professionally, so that they will be capable of fulfilling the technological needs of society and excel in the maintenance and improvement of computer systems.

Objectives of the Computer Technology and Networks Program

- To deliver instruction using current technology, the most modern equipment, test instruments and computers.
- To help fulfill the need for technicians in the fields of computer and network installation, maintenance and repair, particularly in the eastern and southeastern region of Puerto Rico.
- To ensure the intellectual development of students enrolled in the program.
- To develop technicians capable of undertaking leadership roles in professional, civic, and social environments.

ASSOCIATE DEGREE IN ELECTRICAL TECHNOLOGY AND RENEWABLE ENERGY

The program focuses on the major areas of Electrical Technology and Renewable Energy. Graduates will also have the necessary educational background to continue studies towards an Associate Degree in Electrical Technology and Renewable Energy.

Vision of the Electrical Technology and Renewable Energy Program

To become the number one choice for all motivated students who wish to pursue technology electrical and renewable energy education in Puerto Rico.

Mission of the Electrical Technology and Renewable Energy Program

To prepare electrical technology and renewable energy graduates professionally, so that they will be capable of fulfilling the technological needs of society and excel in the installation, troubleshooting and maintenance of electrical systems.

Objectives of the Certificate in Electrical Technology and Renewable Energy Program

- Help fulfill the need for technicians in the fields of Electrical Technology and Renewable Energy.
- Provide the knowledge and necessary skills required of the most recent electrical technology and renewable energy.
- Ensure the intellectual development of students enrolled in the program.
- Develop technicians capable of undertaking leadership roles in professional, civic, and social environments.

CURRICULUM

ASSOCIATE DEGREE IN ELECTRICAL TECHNOLOGY AND RENEWABLE ENERGY CURRICULUM

(59 credits; 2 years)

FIRST YEAR

COURSE DESCRIPTIONS

CTEC 200
Computers & Peripherals Installation, Maintenance, and Support
Four Credits
Three lecture hours and one three-hour lab per week. This course covers all components and ancillary systems comprising a PC. It provides an introduction to every component and analyzes its functionalities and weaknesses. It analyzes the role of each component in supporting an application and the user functional goal. It presents the PC as a package of matched components and dissects all of its internals individually and integrally. Some of the
components covered are the CPU, RAM, display apparatus, ROM, fixed disk, USB, network adapter, CD-ROM, CDRs, DVDs, floppy disk, serial and parallel ports, mouse, keyboard and others. The course also covers the most critical peripherals such as printers, scanners, digital imagery equipment, modems, and others.

Requisite: ENGI 121

**CTEC 205**  
**Computers, Peripherals and Operating Systems**  
**Three Credits**

Two lecture hours and one three–hours lab per week. This course covers all components and ancillary systems comprising a personal computer. It provides an introduction to every component and analyses its functionalities and weaknesses. It presents the PC as a package of matched components and dissects all of its internals individually and integrally. Also this course covers all software components comprising a PC. It analyses the role of each component in supporting an application and the user functional goal. Some of the software components are the operating system and its subcomponents. It covers in detail software problems.

Requisite: ENGI 121

**CTEC 210**  
**Operating Systems, Installation & Configuration**  
**Four Credits**

Three hours of lecture and one three-hour lab per week. This course covers all software components comprising a PC. It provides an introduction to every component and analyzes its functionalities and weaknesses. It analyzes the role of each component in supporting an application and the user functional goal. It presents the PC as a package of matched components and dissects all of its internals individually and integrally. Some of the software components are the operating system and its subcomponents, data communications software components, DOS components, peripheral administration components, Windows Systems architecture, disk operating software, essential user applications, memory management software, software upgrades management. It covers in detail the diagnosis, procedures and resolution of software problems. It also deals with virus problems and the most effective software solutions. Finally, it covers networking from a software perspective.

Requisite: ENGI 121

**EE 210**  
**DC/AC Electronics**  
**Four Credits**

Three hours of lecture and one three-hour lab per week. Basic concepts in the theory of electronic circuit analysis; semiconductor theory; the diode; bipolar junction transistors and BJT amplifiers, and field-effect transistors. Also covers frequency response, multistage and operational amplifiers.

Requisite: PHSC 120

**EE 212**  
**Digital Electronics**  
**Four Credits**

Three hours of lecture and one three-hour lab per week. The course covers number systems and codes, digital electronics, signals and switches, logic gates and Boolean algebra, combinational logic circuits, flip-flops and related devices. Digital Arithmetic: operations and circuits. Code converters, multiplexers and demultiplexers.

Requisite: PHSC 120
EETE 214  
**Microprocessors**  
Four Credits  
Three hours of lecture and one three-hour lab per week. Covers an introduction to microprocessor-based systems. Includes the 80X86 microprocessor family, software architecture, programming, and hardware architecture. Advanced topics.  
Requisite: EETE 212

EETE 216  
**Industrial Electronics**  
Four Credits  
Three hours of lecture and one three-hour lab per week. Covers the theory and practice of modern electronic devices that are used in industrial applications. Includes the use of the transistor switch as a decision circuit maker; programmable logic controllers; triacs and thyristors.  
Requisite: EETE 210

EETE 218  
**Communications**  
Four Credits  
Three hours of lecture and one three-hour lab per week. Introductory topics of: amplitude modulation (AM): transmission and reception; single-sideband communications; frequency modulation (FM): transmission and reception; television and communications techniques.  
Requisite: EETE 210

EETE 240  
**Review for License Examination of Electronic Technician**  
One Credit  
Two hours lecture per week. This course takes as an intention to revise all the concepts that are necessary to take the final examination for electronics technician. It will cover the concepts of dc/ac, semiconductors, digital electronics, microprocessors, industrial electronics, communications, and instrumentation. At the end of the course a test will be offered, simulating the final examination for electronics technicians.  
Requisite: All courses with EETE code of the previous semester approved  
Co requisite: EETE 214, EETE 218, ICET 210

ENGI 101  
**Introduction to Engineering Technology**  
Three Credits  
Three hours of lecture/workshop per week. Introductory required course for all first year associate degree students in computer technology or engineering technology program. Introduction to the various specialties within the engineering and technical profession. Basic concepts of engineering design and technical communication. Laws and ethics of the engineering and technical profession.  
Requisite: Admission to Associate Degree Program in Computer Technology or Engineering Technology

ENGI 121  
**Introduction to Computers**  
Three Credits  
Three hours of lecture-lab discussion per week. Introductory required course for all first year associate degree students in computer technology or engineering technology program. Introduction to the history of computers. Familiarization with basic computer software and hardware. Use of software packages such as Word, Excel, Power Point. Design of Internet Web pages.  
Requisite: Admission to Associate Degree Program in Computer Technology or Engineering Technology

ENGI 161  
**Engineering Technology Graphics**  
Three Credits  
Three hours of lecture-lab discussion per week. Includes principles of engineering drawing with sketching and computer graphics (Solid Works), with an introduction to descriptive geometry. The fundamentals of orthographic projections, pictorials, auxiliary views, sectioning, dimensioning, tolerancing, threads, and working drawings are presented.  
Co-Requisite: MATH 151

ETRE 110  
**Fundamentals of Electrical Circuits and Power**  
Five Credits  
Seven Lecture -Lab. hours per week. This course introduces the basic concepts of electrical circuits and electric power. The student will have the opportunity to learn and to apply the knowledge of electrical safety, Ohm’s Law, Kirchhoff’s Law, resistive, capacitive and inductive circuits, magnetism and electromagnetism. In addition the three-phase system, transformers and power factor will be studied. The course will be complemented by a section of laboratory for the application of its theoretical concepts.  
Co-requisite: MATH 107

ETRE 115  
**Introduction to Renewable Energy**  
Two Credits  
Four hours lecture. In this course the student will acquire the basics concepts of renewable energy systems. It will
examine global climate change, energy use and dependence on fossil fuels, sustainable energy and vision of current energy demand and patterns supplied. In addition, the student will know the rules and regulations that govern this technology.

**ETRE 120**  
**Electrical Installations and NEC**  
**Four Credits**  
Seven hours lecture-lab per week. This course uses the National Electrical Code (NEC) and other regulations for development of electrical installations on houses and buildings. The student will discuss the following topics: interior and exterior wiring, electrical panels’ installation, and lighting fixtures. Makes use of electrical plans. The course will be supplemented by a laboratory section for the application of theoretical concepts.

**Requisite:** ETRE 110

**ETRE 125**  
**Fundamentals of Electrical Machinery**  
**Four Credits**  
Seven hours lecture-lab per week. In this course the student will acquire and apply the theoretical knowledge and the necessary skills in the use and handling of electrical machines. They will study functioning, installation, maintenance and troubleshooting of these equipments. Motors, generators and electrical machines will be used in the laboratory practices.

**Requisite:** ETRE 110

**ETRE 130**  
**Photovoltaic System and Installation**  
**Three Credits**  
Four hours lecture-lab per week. In this course the student will acquire the knowledge’s on photovoltaic systems. Will be studied their parts, operation, installation, and maintenance. PV cells, batteries, charge controllers, inverters and other equipment will be used in the laboratory. The rules and regulations governing this technology will be discussed and applied.

**Requisite:** ETRE 110, ETRE 115

**ETRE 140**  
**Supervised Project**  
**Three Credits**  
Seven hours lecture-lab per week. In this course the student will apply knowledge gained in previous courses. Through this project they will develop skills that are needed to work in the field of electrical industry. The student will be assessed by their instructor/mentor in the workshop of the project and their class.

**Requisite:** All courses with ETRE code of the previous semester approved

**ETRE 240**  
**Electronic for Electricians**  
**Two Credits**  
Four hours lecture-lab per week. This course will acquire the basics of electronic circuits. The student will have the opportunity to learn and apply knowledge of diodes, transistors, amplifiers, power supplier, transducers, and integrated circuits. The course will be supplemented by a laboratory section for the application of the theoretical concepts.

**Requisite:** ETRE 110

**ETRE 245**  
**Wind Power System and Installation**  
**Three Credits**  
Three hours lecture- lab per week. In this course the student will acquire knowledge and skills to work with Wind Power Systems. Their parts, operation, installation, and maintenance will be discussed. Wind turbines, anemometer, inverters and other equipments will be used in the laboratory. The rules and regulations governing this technology will be included and applied.

**Requisite:** ETRE 115, ETRE 125

**ETRE 250**  
**Electrical Controls and PLC**  
**Four Credits**  
Four hours lecture- practice per week. This course is designed for the student to acquire knowledge and skills in the use, installation, operation and maintenance of motor controls, electric generators, and other machines. It will study the characteristics of relays, magnetic contactors, solenoids and others electrical controls devise. Also they apply the concepts of Programmable Logic Controllers (PLC). The course will be supplemented by a laboratory section.

**Requisite:** ETRE 125

**ETRE 255**  
**Review for License Examination of Electrician**  
**Three Credits**  
Three hours lecture/lab per week. The basic knowledge and skills of previous courses will be reviewed. The concepts of analysis, application, operation, and maintenance of electrical systems will be discussed again. Problems in electrical installations, machinery, three phase systems and controls are included to provide the student with the knowledge and skills necessary to take the electrician’s licensing exam offered by the government of Puerto Rico.
ICET 210
Fundamentals of Instrumentation and Calibration
Three Credits
Five hours of lecture-lab discussion per week. This course provides the student the basic elements of the instrumentation and the calibration. It discusses the concepts of pressure, temperature, level and flow. The topics are directed to the principles of operation, selection and specifications of different instruments. Also, this course applies the principles of industrials instruments calibration such as: valves, sensors and other components.
Requisite: PHSC 120

MAET 201
Fundamentals of Manufacturing
Three Credits
Three hours of lecture per week. This course covers the basic concepts of the manufacture, its areas, processes and applied technologies. Different manufacturing industries will be discussed and different materials and equipments used for development products will be identified.
Requisite: PHSC 120

METE 220
CAD/CAM Technology
Four Credits
Three hours of lecture and one three-hour laboratory per week. Introduction to CAD/CAM. Students generate working drawings of machine parts and/or products. They learn to create 3-D models of mechanical parts using Solid Works surfacing and solid modeling commands.
Requisite: ENGI 161

METE 222
Properties of Materials
Four Credits
Three hours of lecture and one three-hour laboratory per week. Covers the basics required for successful design of machine members, parts and connections. Selection of materials according to their strength and function based on testing and design.
Requisite: PHSC 120

METE 224
Manufacturing Process Technology
Four Credits
Three hours of lecture and one three-hour laboratory per week. An introduction to manufacturing processes and overview of casting, forming, and metal removal processes. Manufacturing processes of plastics.
Requisite: METE 222

METE 226
Air Conditioning & Refrigeration Technology
Four Credits
Three hours of lecture and one three-hour laboratory per week. Refrigeration and air conditioning systems are covered in detail, along with the safe handling of refrigerants. Study of fans, fan laws, duct layout and sizing as they pertain to air conditioning systems. Techniques for designing air conditioning and refrigeration systems for buildings.
Requisite: PHSC 120

METE 228
Mechanical Measurements Technology
Four Credits
Three hours of lecture and one three-hour of laboratory per week. The study of measurement technology, coordinate measuring machines, surface finish measurements, machine vision, and particle measurement in a clean environment. The monitoring of processes and operations, automatic control and data analysis.
Requisite: METE 220

METE 230
Principles of Pneumatic and Hydraulic Systems
Four Credits
Two hours of lecture and one three-hour of laboratory per week. This course covers the theoretical and practical principles of hydraulics and pneumatics systems. The student acquires the knowledge in the design, installation and repair components such as valves, compressors, actuators regulators and other associates components. Skills in blueprint reading and squematics related with industrial hydraulics and pneumatics field are developed.
Requisite: PHSC 120, ENGI 101, ENGI 121

METE 251
Introduction to Industrial Mechanics
Three Credits
Provide basic mechanical skills and repair techniques common to most fields of industrial maintenance. Includes topics on precision measuring instruments and general safety rules common in industry, including lock-out/tag-out.
Hands on course include troubleshooting and overhaul of mechanical systems such as pumps, assembly lines, conveyors, and associated industrial machinery.

Requisite: BIOT 101

**PHSC 120**  
**Technical Science**  
**Three Credits**

Three hours of lecture and one three-hour lab per week. This is a course designed for technicians who require a working knowledge of the basic principles of physics. The course provides students with an introduction to the basic principles and applications of mechanics, the concepts of rotation, simple harmonic motion, properties of materials, fluids, heat and temperature, and electricity.

Co-requisite: MATH 151

**QETE 230**  
**Quality Management Principles**  
**Three Credits**

Three hours of lecture per week. Focuses on the organizational goal of producing a quality product or service. The meaning and benefits of quality, the cost of quality and problem solving tools for continuous improvement. Topics include overview of quality philosophy; principles of quality, commitment to continuous improvement, customer focus and paradigm shift, understanding process variation and employee involvement.

Requisite: MATH 121

**QETE 232**  
**Quality Improvement Tools**  
**Three Credits**

Three hours of lecture per week. These tools provide the basics for examining processes and systems and making data-based decisions to improve work processes and systems. Covers the 7-step improvement process, includes flow-charting, Pareto charts and cause-effect diagrams.

Requisite: MATH 121

**QETE 234**  
**Statistical Process Control and Metrology**  
**Four Credits**

Three hours of lecture and one three-hour lab per week. Provides the basic concepts and applications of Statistical Process Control (SPC). The course covers control charts; including setting scales, charting, interpreting, and analyzing process capability. Problem-solving techniques are emphasized and laboratory exercises are linked to the implementation of SPC in the workplace.

Requisite: QETE 230

**QETE 236**  
**Process Validation**  
**Three Credits**

Three hours of lecture per week. The course covers validation approaches for characterizing processes, process intermediates and final products emphasizing cost effectiveness while determining what levels of validation are required for different phases of development and process improvement. Includes topics such as validation of water systems, cleaning validation, computer systems validation, equipment validation and recent trends in process validation.

Requisite: QETE 230

**QETE 237**  
**Industrial Regulations and Validations**  
**Four Credits**

Five hours lecture per week. This course cover the study of current Good Manufacturing Practices (CGMP’s) and the series of international quality standards known as ISO 9000 through 9004, ISO 10011, 10012, and ISO 14000. The validation for characterizing processes, intermediates process and final products emphasizing effectiveness cost while determining what levels of validation are required for different phases of development and process improvement also are included. Are discussed topics such as validation of water systems, cleaning validation, computer systems validation, equipment validation and recent trends in process validation.

Requisite: QETE 230

**QETE 238**  
**GMP and ISO Standards**  
**Three Credits**

Three hours of lecture per week. The study of Good Manufacturing Practices (GMPs) and the series of international quality standard s known as ISO 9000 through 9004, ISO 10011, 10012, and ISO 14000. Provides an understanding of documentation system for validation of equipment, utilities, analytical methods and processes in a medical manufacturing environment.

Requisite: QETE 230

**TCOM 300**  
**Introduction to Telecommunications**  
**Four Credits**

Three hours of lecture and one three-hour lab per week. Key concepts of telecommunications and networking. The course provides a solid introduction to networking fundamentals including key acronyms, protocols, and components that are essential to understanding how networks operate today. It covers the basic concepts of
telecommunications such as analog/digital communications, basic encoding, bandwidth and capacity and serves as a foundation for in-depth study of networking. Upon completion, the participant will have a solid understanding of how information travels from a source computer to a destination computer across a complex network.

Requisite: PHSC 120

TCOM 320
Telecommunication and Data Networks
Four Credits
Three hours of lecture and one three-hour lab per week. This course covers the key concepts of telecommunications and networking. It provides a solid introduction to networking fundamentals including key acronyms, protocols, and components that are essential to understanding how networks operate today. It covers the basic concepts of telecommunications such as analog/digital communications, basic encoding, bandwidth and capacity and serves as a solid foundation for in-depth study of networking. It identifies the types of communications networks that have evolved based on the various technological configurations and the internetworking process behind data communications. Upon completion, the participant will have a solid understanding of how information travels from a computer to another computer across a network.

Requisites: PHSC 120, ENGI 121

TCOM 330
Network Infrastructure Management
Four Credits
Three hours of lecture and one 3-hour lab per week. This course concentrates on the Windows/2000 infrastructure management protocol, which is the largest in use on a global scale. Procedures for planning and servicing network infrastructure. The course covers areas such as protocols, services requiring calculation in the light of the organization needs, packet exchange and sequential packet exchange IPX/SPX, integration with Novell netware, TCP/IP. Netbios, WINS, DHCP and DNS maintenance and configuration issues are covered. Routing, remote access and VPNs are also covered from an infrastructure and management perspective.

Requisite: TCOM 320

TDBE 110
Technical Drawing and Blue Print Reading for Electricians
Two Credits
Four hours lecture - lab per week. This course introduces the student to terminology and applications unique levels of the electricity industry. Covered in the basic drawing tools and then acquire skills in the development of views, plans and specifications. In addition they will cover the types of views on a set of construction drawings and clear explanations of their relationships with various electrical installations. It offers a comprehensive and applicable content in the electrical drawing.
The International School of Design (ISD) at UT initiated its operation as an administrative unit in 2006. Its first two degrees will be a Bachelor’s Degree in Design with a concentration in Industrial Design (BDes) and an Associate Degree in Fashion Design (AFD). The Dean will be the Chief Officer of the School, which has become the seventh academic unit of the institution.

MISSION
To prepare leaders and professionals in the design field who are competitive, and are focused toward an international academic perception. In addition, they are critical, and multidisciplinary; they are committed to debate, investigation, the cultural content and the technological merits of the designed object and their production technology.

VISION
The school will be known in Puerto Rico and internationally as a leader in the development of professionals in design with international and multidisciplinary perspectives, and as a school which is oriented toward the needs of the contemporary human being.

GOALS
The proposed program relates to the institutional mission. The Program’s goals are:
Promote ethical and cultural values to enable students to make better use of their judgment, rights, and obligations.
Establish international collaborations.
Graduate students who are well prepared in the area of design
Promote the use of technology for design and production
Establish collaborative relationships between the University and the external community by promoting research and industrial relationships

These goals fulfill the institutional mission.

ASSOCIATE DEGREE IN FASHION DESIGN (AFD)
The Associate degree in Fashion Design will train students to take part as professionals in all aspects of the garment industry, ranging from children’s apparel to men’s ready-to-wear and including couture. Particular attention will be placed on the history of fashion and its recurring interpretations. Students will be asked to see fashion and its recurring interpretations as a reflection and as a component in a continuum that includes ethical practice, manufacturing, marketing, promotion, accessorizing, and disposal. Students will not only be instructed in the areas of fashion concept development, but in the business aspects of the rapidly growing clothing industry. Students may also focus on make-up and costume design for theater, television and film.

The program has several distinct areas of focus:
- General education component
- Core curriculum in design
- Business courses
- Practical experiences in different settings
- Concentration courses
- Close student-faculty interaction, and academic counseling
- Distinguished faculty which has experience as practitioners in the field

GENERAL OBJECTIVES OF ASSOCIATE DEGREE IN FASHION DESIGN PROGRAM
The goals of the Associate Degree in Fashion Design are:
- To provide students with the knowledge to develop their skills and contribute to our society.
- To capacitate designers for a variety of settings.

SPECIFIC OBJECTIVES OF ASSOCIATE DEGREE IN FASHION DESIGN PROGRAM
To develop designers capable of designing innovative garments.
To fulfill the needs of the local industry.
To provide designers capable of developing their own businesses and are sensitive to ethical and integrity issues.

ASSOCIATE DEGREE IN FASHION DESIGN ADMISSION REQUIREMENTS
Students interested in applying for admission to the Associate Degree in Fashion Design will be considered if they fulfill the following criteria:
High school transcripts of credits with the application for admission.
Grade point average of at least 2.0 on a 4.0 scale (30%).
College Entrance Examination Board (15%).
An interview and drawing homework with the Admission Committee (30%). (See attachments No. 2 and No. 3)
Portfolio (25%).
Student must submit a $15.00 nonrefundable application fee. Students must comply with any other requirements as established in the catalog by the UT Academic School.

ADMISSION REQUIREMENTS FOR TRANSFER STUDENTS
Students who have begun studies at other institutions need to complete the following requirements:
Have good academic standing at the previous institution where studies were initiated. Not subjected to any academic or disciplinary sanctions.
Official credit transcript must be submitted with admission application.
Have at least twelve transferable semester credits with a minimum grade of C from another accredited institution.
Fulfill all general admission criteria as stated above.

GRADUATION REQUIREMENTS FOR ASSOCIATE DEGREE IN FASHION DESIGN
Students of the Associate Degree in Fashion Design at Universidad del Turabo will be eligible to receive their degree after meeting the following requirements:
Completion of all courses required for the degree.
Completion of the number of credit hours required for the degree with a minimum Grade Point Average of 2.0. Students should obtain a grade of C or more in core and major courses. Students must comply with the retention standards established at the Institution.
Completion and approval of a Portfolio.
All students who enter Universidad del Turabo will be subject to the graduation requirements in force during the year they are admitted. Nevertheless, if the curriculum is modified, the student must graduate under the new curriculum as it is applied to their study program by the department.
Students must apply for graduation at the Registrar’s office during the period established in the Academic Calendar. Students must also settle any debts with the Institution. No document certifying graduation will be given until documentation has been presented certifying that there are no outstanding debts.
Commencement exercises will be held once a year, at the end of the second academic semester. Students who meet graduation requirements at the end of any term or a summer session may apply to the Registrar’s office for a certification to that effect.

ASSOCIATE DEGREE IN FASHION DESIGN ALUMNI PROFILE
Graduates from the Associate Degree in Fashion Design will:
Have the knowledge to develop their own business.
Have sensibility for ethnological diversities and needs.

ASSOCIATE DEGREE IN WEBDESIGN
The goal is to become a Web Designer, an expert qualified to deal with the Internet’s continuous string of advances, who has the training and skills to define, create, and design them. A web designer configures telecommunications systems to ease people’s access to content and audiovisual information.

ISD Web Design program graduates are qualified to work as:
- Web Designer
- Web Art Director
- Web Creative Director
- Multimedia Designer
- Web Specialist
- Web Information Architect

Course Descriptions
(Courses marked with @ could be offered in both modalities, traditional or on-line.)

ADID 121/021
Computer Aided Drawing I
Four Credits
This is an introductory course in the use of AUTOCAD computer aided drafting software. Students will learn the advantages and disadvantages of using computer graphics as well as fundamental capabilities of the basic program, including drawing and editing entities (lines, circles), plotting drawing, working with layers, working with text and dimensional drawings. Seven hours per week with laboratory.

ADID 231/031
Computer Aided Drawing II
Five Credits
This course studies the advanced AUTOCAD graphic program. It includes dimension, editing, style, tolerance, “GRIPS” editing, and sectional lines. Seven hours per week with laboratory.
ADID 241
Computer Aided Drawing III
Four Credits
This course studies the AUTOCAD graphic program. It includes 3D dimension, editing, style, and tolerance, “grip” editing and sectional lines. Seven hours per week with laboratory.
Requisite: ADID 231

ADID 242/042
Technical Drawing IV
Four Credits
This course prepares the student in the facets of foundations, situation plans and localization, reading topographic maps and additional topics on surveying such as transversal and card calculation. All work is done at a drawing table. The class concludes with a final project in which the student draws the localization of a residence in a plane, according to zoning standards. Nine hours per week with laboratory.
Requisite: ADID 241

CTEC 200
Computers and Peripherals
Four Credits
This course covers all components and ancillary systems comprising a PC. It provides an introduction to every component and analyses its functionalities and weaknesses. It analyses the role of each component in supporting an application and the user functional goal. It presents the PC as a package of matched components and dissects all of its internals individually and integrally. Some of the components covered are the CPU, RAM, Display apparatus, ROM, Fixed Disk, USB, Network Adapter, CD-ROM, CDR's, DVD's, Floppy disk, Serial and Parallel ports, Mouse, Keyboard and others. It also covers the most critical peripherals such as, Printers, Scanners, Digital Imagery equipment, Modems and others.
Requisite: ENGI 121

CTEC 210
Operating Systems, Installation and Configuration
Four Credits
This course covers all software components comprising a PC. It provides an introduction to every component and analyses its functionalities and weaknesses. It analyses the role of each component in supporting an application and the user functional goal. It presents the PC as a package of matched components and dissects all of its internals individually and integrally. Some of the software components covered are: the operating system and its sub-components, data communications software components, DOS components, peripheral administration components, Windows Systems architecture, disk operating software, essential user applications, memory management software, and software upgrades management. The course covers in detail the diagnosis, procedures and resolution of software problems. It also deals with the Virus problem and the most effective software solutions. Finally, it covers Networking from a software perspective.
Requisite: ENGI 121

DESI 105
Freshman Seminar
Three Credits
This course will provide students with activities, techniques and academic experiences in terms of design discipline. Students will able to identify and develop personal and academic skills to improve their performance.
Requisite: Admission to the School

DESI 121
Drawing I
Three Credits
In this studio course students will be introduced to the basic drawing skill required for the representation of objects, figures and spaces. The importance of sketching as a means of recording and demonstrating concepts and processes will be emphasized. Black and white media, in particular pencil,
pen and marker, will be emphasized. The development of fundamental drawing skills will be stressed and standard manual product illustration skills will be introduced.

Requisite: Admission to the School

DESI 255
Core Studio: Concept Development and Realization I
Four Credits
This is a core studio in this program. Students continue to develop their awareness of specific markets within fashion and increase their ability to target their individual styles to a specific market segment. Students create portfolios of original design lines within the categories of the couture and high-priced industry. They apply knowledge of the couture to design, drape, fit, and construct a mini collection for a particular target market. They develop styles and images through fabric sourcing, market research, and inspirational research. Emphasis is placed on continuity of style within design, presentation and trend analysis through the study of collections showing in London, Milan, Paris and New York. Students learn the principles of draping as a method of designing original garments in three-dimensional forms. Draping techniques and construction skills are developed for more advanced structured garments, along with an understanding of silhouette, proportion and current style trends. Students work on developing their strengths in design to ensure establishment of a defined and strong personal design philosophy.

This course expects innovative design solutions from the students that reach beyond popular forecasts. Personal interpretation and risk-taking are emphasized. The collection designed in this course will be basis for production in Construction Techniques I.

DESI 256
Core Studio: Concept Development and Realization II
Four Credits
This is a core studio in this program. It is an introduction to swimwear and intimate apparel design. Students gain a broad working knowledge of swimsuits, intimate apparel and related apparel, such as cover-ups and beach accessories. Original designs are produced using flat pattern and draping techniques and industry specific construction methods and machinery. In this studio students will develop a collection of their own choosing. They will undertake research and develop a concept that they feel expresses their vision and strengths as a designer. These ideas will be applied in the development of a collection of a dozen looks. Men’s wear and children’s apparel will be stressed. The collection designed in this course will be basis for production in Studio Methods and Structures. This course will focus on the economics and production standards of the prêt-à-porter industry.

Requisite: FADE 131

FADE 125
Representing the Body (Manual and Digital)
Four Credits
This course focuses on the human form. Understanding human anatomy will be the point of departure for exercises that employ various media to represent the body in action and repose. In addition to developing research skills, students will focus on documenting the body through digital photography, drawing, collage and digital rendering, using Adobe Illustrator and various fashion Computer Aided Design programs.

Requisite: Admission to the School

FADE 131
Fashion Concept Development I
Three Credits
This is a core studio in this program. Each student’s primary goal is the development of new fashion concepts. In the first semester students will use their local environment as the site from which ideas will be culled. These ideas will be applied in the development of a collection of a dozen looks. Women’s wear will be stressed. Clothing designed in this course will be basis for clothing production undertaken in the second semester’s Studio Methods and Structures. This course will focus on the economies and production standards of the prêt-à-porter industry.

Requisite: Admission to the School

FADE 132
Fashion Concept Development II
Three Credits
This is a core studio in this program. Each student’s primary goal is the development of new fashion concepts. In the second semester, the research focus of this course will be on global trends in the sportswear and active wear industries and their niche markets. These ideas will be applied in the development of a collection of a dozen looks. Men’s wear and children’s apparel will be stressed. The collection designed in this course will be basis for production in Studio Methods and Structures. This course will focus on the economics and production standards of the prêt-à-porter industry.

Requisite: FADE 131

FADE 140
Fashion Drawing
Two Credits
In this studio students will continue to build upon skills developed in Representing the Body and will employ those skills in special assignments related to the development and production of a collection of poses and bodies. Textiles illustration will be addressed. The primary work of this class...
will be drawing from the live clothed model to develop industry-standard fashion illustration skills. The maintenance of a sketchbook and the production of sketch drawing will be stressed.

Requisite: FADE 125

FADE 150
Studio Methods & Structures
Four Credits
The basis of work in this course will be traditional tailoring techniques, from draping to the technology of using various materials. The creation of forms that interact with the human body will be explored. Experimental approaches suggested by students’ designs produced in Fashion Concept Development I will also be explored. This course is a hands-on clothing construction studio. Sewing skills will be stressed and patternmaking skills will be introduced.

Requisite: FADE 131

FADE 200
Patternmaking
Three Credits
Traditional patternmaking skills will be the focus of this course. The instructor will take students through a series of exercises that develop these skills. Primary focus will be placed on the development of patterns for designs created by the students as part of program coursework.

Requisite: FADE 150

FADE 210
Construction Techniques I
Three Credits
The work of this course will be linked to designs developed in Core Studio Concept Development and Realization I. Students will continue to develop their sewing, patternmaking and construction skills with a particular focus on collaboration with other technicians and craftspeople. This course will introduce the students to the sewing techniques practiced in the finest haute couture ateliers around the world and provide the basis for understanding couture. Students will learn couture techniques in cutting, hand stitching, seam and hem finishes, pocket construction, pressing, and finishing.

Requisite: FADE 132

FADE 215
Digital Fashion Design
Two Credits
This course will focus on the range of digital technologies used in the fashion industry. With a primary focus on Computer-Aided-Design software, students will learn flat pattern drafting, and fashion illustration technologies that will enhance the accuracy of their construction skill and increase their ability to visualize color and other potential variations in their designs.

Requisite: FADE 132

FADE 220
Introduction to Costume Design
Three Credits
In this studio the students will be introduced to the costume design world of the theater, film and television. The course includes a historical analysis of clothing and textiles, a research phase and an evaluation phase, leading the student to the design of the graphic project. This design is supported by the practical portion of the course, the laboratory. In addition to historical costumes, other costumes will be created according to the student’s inclinations, through the personal interpretation of various themes. Encounters with experts from the field of theater, film and television are also included in this course.

Requisite: FADE 132

FADE 240
Portfolio Studio
Three Credits
This studio will focus on the preparation and refinement of a portfolio that encompasses the student’s work in the program and any other distinguishing activity. The goal will be the production of a refined, multifaceted presentation of the student’s goals and creative vision, and his or her ability to engage in professional practice.

Requisite: Complete second year, second semester
Co-requisite: FADE 260

FADE 260
Concept Presentation
Two Credits
Presentation is essential to understanding and marketing fashion. In this course students will address the marketing of their designs. They will develop branding for themselves as unique designers that will include marketing strategies and the production of a runway show. This show will be a by-invitation event designed to introduce the designer to the general public.

Requisite: FADE 132

FADE 270
Internship
Two Credits
All students will be required to take part in a professional internship that employs a wide range of skills and knowledge developed in this degree program. Each student will work with a department advisor to fully realize the
potential of this experience in a fashion design industry or by giving professional services to an industry in fashion realization.

Requisite: FADE 132

**GRAD 201**
**Graphic Communication Media**
**Three Credits**
This is an introductory course on the fundamentals and concepts of the media of graphic communication. Students study the different graphic communication media, such as digital video for multimedia work, graphic design and typography, effective communication for printing, design and composition of pages, and illustrations, as well as the fundamentals of design. Students must stay current and study the aspects and new developments in the publishing industry. They also analyze technological development and its relationship with traditional operations and with emerging demands in methods and creations of design, management, programming and distribution.

Requisite: Admission to the School

**HIDE 100 @**
**History of Art**
**Three Credits**
This course surveys the history of the representation of the human body as a record of the social, technological, environmental and political circumstances of a period. The goal of this course is to establish an understanding among young designers of art as an expression of the desires, aspirations, needs, esthetics, and available resources of subjects/users throughout history. From earliest representations of humans through current film and digital media that envision the future, human beings and their representations of environment will be examined.

Requisite: Admission to the School

**HIDE 105 @**
**Fashion History**
**Three Credits**
This seminar course traces the development of fashion and body adornment in Asia, Africa, Europe, Greece and the Roman Empire through the establishment of Paris, Milan, New York and Latin America as distinct fashion capitals, as well as the establishment of independent fashion centers across the globe. Economic, political, technological, environmental and cultural history will be discussed in relation to the evolution of fashion.

Requisite: Admission to the School

**INDI 316**
**Business Practice**
**Three Credits**
This course will focus on business practices that impact design industries. Topics to be covered will include: team practices, organizational structures, market size, penetration and shares, competitive analysis, product lineup, licensing, copyrights, patents, intellectual property, pricing and branding. Students will also be introduced the process of plan development, as well as to the uses and implementation of business plans.

**WEDE 100**
**Introduction to Internet & XHTML**
**Four Credits**
This course covers issues such as computers versus software, as well as performance issues. Types of connections to the Internet are discussed in detail. Safety, security troubleshooting, composing effective mail, net-etiquette, organizing information, introduction to e-commerce, customizing tools, chat and online synchronous communications, forums, and blogs. Finally, it covers basic design publishing language, HTML and XHTML and introduces Web design and publishing concepts.

Requisite: Admission to the School

**WEDE 200**
**Web Design Graphic**
**Four Credits**
This course focuses on the principles of Web usability, client purpose and needs as the key element in successful Web Design. Simplicity of design is introduced as a practical Web Design principle. Some of the topics covered are: age loading time, graphic design for the Internet, writing for the Web, document size and readability, fonts for the Web, color schemes and visual impact, and .site architecture vs. content Students will also be introduced to some software tools and effective web site navigation strategies.

Requisite: WEDE 100

**WEDE 250**
**Interactive Media Design**
**Four Credits**
The student begins the course learning the fundamentals of digital imaging, and audio combined with Web technologies. The course will also introduce the student to interactive media authoring and video technology. Students will learn programming and scripting techniques using Flash, JavaScript and ActionScript for design, animation, and data handling. They will study 2D and 3D animation using computer modeling and an animation software program as the primary tool. This course will emphasize the creation of animated sequences and GIF animation for multimedia applications. Requisite: WEDE 200
VISION

To be the first choice as a School of Health Sciences in Puerto Rico offering innovative opportunities for a formation of excellence.

MISSION

To prepare excellent human resources in the Health Sciences with innovative academic offerings across the curriculum which can respond properly and rapidly to the needs of local and global communities.

OBJECTIVES

Our main objectives are:

1. To respond to the needs of health professionals in our catchment area.
2. To establish a continuous improvement system in our programs to ensure their relevance and applicability to our society.
3. To develop health professionals capable of working in Puerto Rico, as well as in other Spanish-speaking and English-speaking communities.
4. To contribute significantly to the development of students with high humanistic values.
5. To establish academic offerings with the participation of customers, students, health services providers, and accreditation agencies to ensure an effective professional practice that responds to the needs of the community.
6. To effectively implement technology integration in all of our programs.
7. To maximize the relevance of our academic offerings utilizing innovative strategies that will facilitate the transfer of knowledge to the practice of health professions and promote the acquisition of an integrated body of knowledge to be used in solving problems.
8. To establish local and international strategic alliances with health care institutions that can provide practice settings for faculty development and for exchange of resources in the areas of teaching and research.
9. To establish local and international alliances with other universities to increase our students’ opportunities to participate in exchange programs that will broaden their vision of the health professional role.
10. To develop basic and applied research projects in the area of health, geared to the improvement of the quality of life in Puerto Rico and other communities.

GOALS

1. Respond to the health needs of our communities within a global perspective.
2. Provide an educational setting with balanced efforts among academic offerings, clinical services, and research endeavors.
3. Establish a system of continuous improvement in our programs to ensure their relevance and applicability.
4. Develop highly trained health professionals prepared to serve individuals and groups from diverse cultural, social and economical backgrounds.
5. Develop health professionals with high humanistic values.
6. Integrate technology in all of our administrative, academic, research and clinical activities.
7. Facilitate transference of scientific knowledge to the practice of the health professions.
8. Establish national and international alliances for faculty development, exchange of resources, and student exchange programs.
9. Foster a high degree of professionalism as health care providers within an interdisciplinary perspective.
10. Establish innovative programs prepared with the collaboration of community stakeholders, students, patients and accreditation agencies.
11. Promote an evidence-based practice setting.
12. Utilize service learning as the primary educational methodology for all academic programs.

STAFF

Ángel L. Rivera / Dean
Carmen M. Pérez Velázquez / Associate Dean for Academic Affairs
Nilda I. Boria / Associate Dean for Administrative Affairs
María E. Rosa / Director, Nursing Department

### AVET 101  
**Veterinary Math**  
**Three Credits**

Review of basic math concepts that are carried out daily in the practice of the profession. Discuss the concept of ratio and proportion, estimation and significant figures, as well as the method for augmentation and reduction formulas, preparations and expressed the percent dilution and concentration. Emphasis in the International System of Units, the English System and equivalents that are used to convert between them. Basic mathematical operations are performed and their application to quantitative problem solving as part of professional roles for the veterinary technician.
AVET 110
Introduction to Veterinary Sciences
Three Credits
This course describes the roles and responsibilities of the veterinary technician and studies alternatives, labor and professional organizations. Includes safety rules, ethics and laws that apply to the exercise of their profession and the welfare of animals in Puerto Rico. This course also describes medical terms and economics concepts for the veterinary hospital and veterinary clinics. It identifies the main breeds of domestic animals and defines the concepts of behavior, restraint, and security. It also shows the basic techniques of assessment, physical examination, sampling and vaccination protocols.

AVET 120
Anatomy and Physiology of Domestic Animals
Five Credits
Histological, anatomical, physiological, skeletal system, muscular, epithelial, respiratory, cardiovascular, urinary, endocrine, nervous and immune systems study. Emphasizes in the interrelation between the systems for normal body functioning. Studies the terminology relating to anatomy and animal physiology. The course is modeled after the dog and compared with other domestic animals using skeletons, models, audiovisual dissection specimens and laboratory experiences.
Prerequisite: AVET 110

AVET 130
Introduction to Nursing Veterinary
Three Credits
This course will provide the student with patient monitoring techniques in their work scenarios, particularly the hospitalized patient. It will demonstrate therapy techniques, housing and nutrition in a comprehensive manner. Instructs in the ways of securing, therapy and medication management. Presents the preparation and practice and patient care before, during and after different surgical procedures.
Prerequisite: AVET 110

AVET 220
Common Diseases in Domestic Animals
Three Credits
This course exposes students to the pathophysiological processes of common infectious diseases. Relates the respective clinical symptoms with the main forms of diagnosis and therapy in large clinical scenarios. It will focus on practical concepts of immunity and prevention of infectious diseases in domestic animals, besides familiarizing students with the prevention and diagnosis of zoonotic diseases.

Prerequisites: AVET 120, AVET 130, AVET 101

AVET 230
Techniques and Protocols of Veterinary Technology I
Three Credits
This course instructs in the collection, analysis and interpretation of blood samples (CBC, microscopic evaluation, coagulation, chemical and serological) and urine. Discusses diagnostic tests and treatments for anemia. Further instructs the student in the preparation of cytology samples (exudate, transudate, aspiration, printing, bone marrow, ear, and vaginal). It also discusses methods and tests for pregnancy diagnosis, ocular diagnostic tests (including tonometry, fluorescinge staining, and tear production test - Schirmer tear test). In this course we will be working with simulators instead of live animals to enhance the skills and expertise in the techniques and protocols of veterinary technology.
Prerequisites: AVET 120, AVET 130, AVET 101

AVET 231
Techniques and Protocols of Veterinary Technology II
Three Credits
"This course discusses techniques and protocols for medical emergencies, poisonings and intensive care. The student is instructed in basic necropsy techniques and procedures. It discusses and demonstrates the effective management and patient safety in all phases of anesthetic procedures. Instructs in the handling of laboratory animals, exotic birds, small mammals and fish. In this course we will be working with simulators instead of live animals to enhance the skills and expertise in the techniques and protocols of veterinary technology.
Prerequisite: AVET 230

AVET 240
Animal Pharmacology and Toxicology
Three Credits
This course provides students the opportunity to develop critical thinking concepts related to pharmacology and applied to the process of veterinary medicine. We describe the pharmacological principles of prescription drugs in the field of veterinary medicine. Students will understand the veterinary products and the latest drug developments. Training the student in the various techniques of administration and dosage of medicine for patients in veterinary care.
Prerequisites: AVET 120, AVET 130, AVET 101, BIOL 103, CHEM 101

AVET 250
Grooming and Veterinary Psychology
Three Credits
Description of the domestic animal characteristics and their respective grooming styles for the most common breeds. Discussion of the different ways of categorizing domestic animals (size, color, characteristics, coat type). Review of grooming subjects including equipment, techniques, cares, preparation, bath, drying, and clipping.

AVET 260
Management, Practice and Farm Animal Disease
Three Credits
This course discusses the husbandry of farm animals including breeds, behavior, reproduction, nutrition, and support. It discusses the best practices for proper management of farm animals. Demonstrate medical and surgical nursing for large species. It also discusses techniques in therapy, necropsy, dentistry, and assisted reproduction for farm animals.

Prerequisites: AVET 220

AVET 280
Clinical Practice I
Three Credits
This course and lab integrate the knowledge acquired by placing students in practice ruled centers. Students will be working directly with a veterinarian, executing the procedures requested and needed to diagnose and treat small animals. They will be monitored and evaluated in carrying out their duties as future veterinary technician. The veterinarian and vet technicians will be serving as supervisors, counselors, and advisors. The clinical portion of the course will consist of 14 hours per week making a total of 200 hours.

Prerequisites: AVET 120, AVET 130

AVET 281
Clinical Practice II
Three Credits
This course and lab integrate the knowledge acquired by placing students in practice ruled centers. Students will be working directly with a veterinarian, executing the procedures requested and needed to diagnose and treat animal’s farm. They will be monitored and evaluated in carrying out their duties as future veterinary technician. The veterinarian and vet technicians will be serving as a supervisors, counselors, and advisors. The clinical portion of the course will consist of 14 hours per week making a total of 200 hours.

Prerequisite: AVET 280
The School of Science and Technology (SST) at Universidad del Turabo responds to the educational needs of a society undergoing rapid economic growth and technological development. The School provides a rich learning environment in which students may pursue programs of higher education that will advance their career objectives while at the same time motivating them to continue to learn and grow intellectually throughout life. The Institute of Chemical and Biological Technology is located in the School.

It is the mission of the School to foster liberal education, to encourage the generation of knowledge and to contribute to the well being of the community. The School promotes lifelong learning, research, social and professional responsibility and growth. To these ends, the School challenges students to think critically and intuitively, recognize and value diverse perspectives, and to solve problems creatively and with perseverance.

Four majors in natural sciences are offered: general science, biology, chemistry and environmental chemistry. Each major offers basic courses as well as courses in biology, chemistry, physics and mathematics. A variety of electives are offered to ensure a well-rounded and complete education.

The objectives of the School are to:

1. Develop within graduates a broad proficiency in scientific knowledge and professional competence.
2. Provide high quality academic and practical training that will enhance the learning experience.
3. Develop in graduates the ability to think and analyze solutions to contemporary scientific problems, using the scientific method.
4. Promote and develop research at all levels.
5. Prepare students to use modern technology and instruments in their careers.
6. Establish joint research projects with other institutions, national laboratories and industries, thus promoting diversity among students and faculty.
7. Foster lifelong learning and intellectual growth.
8. Instill in graduates a sense of values which will foster responsible participation in civil and public affairs.

PROGRAMS OF STUDY

ASSOCIATE DEGREE IN PHARMACEUTICAL AND CHEMICAL OPERATIONS

PROGRAM OBJECTIVES
The objectives of the proposed Pharmaceutical and Chemical Processes program are consistent with the objectives of the School of Science and Technology, as spelled out in the UT “Proposal for the Establishment of a School of Science and Technology” submitted in July, 1989 to the Higher Education Council. As stated in this document, the SST is committed to establishing science programs with high standards that will increase the capabilities of the University, expand student career...
opportunities, and enhance the relationship between the University, the community, and industry.

Specifically, the program will:
• Deliver instruction using current technology, equipment, test instruments and computers;
• Help fulfill the need for technicians in the fields of Pharmaceutical and Chemical Processes, particularly in the eastern and southeastern regions of Puerto Rico;
• Ensure the intellectual development of students enrolled in the program;
• Develop technicians capable of undertaking leadership roles in professional, civic, and social environments.

SPECIFIC OBJECTIVES

Upon completion of the Associate degree in Pharmaceutical and Chemical Processes, the student will be able to:
• Operate basic pharmaceutical equipment.
• Use teamwork to solve real problems encountered in the industrial workplace.
• Monitor basic processes and operations, automatic controls and data analysis.
• Prepare simple basic written and oral reports in English and Spanish.

PHOP 268 Semi-Solid and Liquid Dosages: Manufacturing and Packaging 3
PHOP 275 Principles & Operation of Chemical Processing 3

ASSOCIATE DEGREE IN BIOTECHNOLOGY

PROGRAM OBJECTIVES

The objectives of the proposed Biotechnology program are consistent with the objectives of the School of Science and Technology (SST). The SST is committed to establishing science programs with high standards that will increase the capabilities of the University, expand student career opportunities, and enhance the relationship between the University, the community, and industry.

Specifically, the program will:
• Deliver instruction using current technology, equipment, test instruments and computers;
• Help fulfill the need for technicians in the fields of Biotechnology, particularly in the eastern and southeastern regions of Puerto Rico;
• Ensure the intellectual development of students enrolled in the program;
• Develop technicians capable of undertaking leadership roles in professional, civic, and social environments.

Specific Objectives

Upon completion of the Associate degree in Biotechnology the student will be able to:
• Operate basic biotechnology equipment.
• Use teamwork to solve real problems encountered in the industrial workplace, following ethical guidelines.
• Monitor basic processes and operations, automatic controls and data analysis.
• Prepare simple basic written and oral reports in English and Spanish.

COURSE DESCRIPTIONS
(Courses marked with @ could be offered in both modalities, traditional or on-line.)

BIOL 100
Applied Microbiology
Three Credits
The course emphasizes the fundamental principles of microbiology and the role of microorganisms in industrial processes. Topics included are: characteristics of microorganisms, emphasizing structure and identification, use of microscope and staining techniques, isolation of bacteria in pure cultures, handling and cultivation of aerobic and anaerobic bacteria, biochemical tests, and semi-automatic and automatic techniques for identifying bacteria.

Requisite: MATH 100

BIOT 101
Introduction to Biotechnology Industry
Three Credits
This course provides an overview of industrial biotechnology, pharmaceutical technology, agro-technology and chemical processes. In addition, the course will include laboratory safety and documentation.

BIOT 210
Regulations and Good Manufacturing Practices
Three Credits
In a general way, this course covers the current regulations that apply to Puerto Rico, including overview of OSHA, PROSHA, and EPA/EQB, with the major focus on FDA rules and regulations. Course emphasis will be on Good Manufacturing Practices (cGMP's), quality awareness, record integrity, documentation, 483's, business impact in dollars and jobs.

Requisite: CHEM 100 or BIOL 100

BIOT 220
Plant Design and Process Support
Three Credits
This course provides basic instruction in plant design process support in industrial biotechnology. Topics to be covered include general building design, water systems, HVAC, utilities, instrumentation, process control systems and external environmental effects. Topics will also include small parts and labware preparation, labware washing, theory/use of autoclaves, CIP, SIP, validation testing and preventive maintenance.

Prerequisite: CHEM 100 or BIOL 100

BIOT 231
General Manufacturing Biotechnology I
Three Credits
This course covers the basic principles and experiences related to cell culture, sterilization, media preparation and recovery.

Prerequisite: CHEM 100 or BIOL 100

BIOT 240
Validation
Three Credits
The course provides an introduction to the topics of installation qualification, operational qualification, performance qualification, process qualification, cleaning validation, sterilizing filter validation, SPC and continuous process validation, validation testing, preventive maintenance, and principles of metrology. A laboratory validation project is included in the course.

Requisite: BIOT 210

BIOT 250
General Manufacturing Biotechnology II
Three Credits
This course covers the basic principles and experiences related to cell culture, microbes, fermentation, production, recovery, and packaging.

Prerequisite: CHEM 100 or BIOL 100

BIOT 251
Cleaning and Sterilization in Bioprocess Engineering
Three Credits
The course will focus on the support equipment found in bioprocessing plants, such as steam generators for sterilization, water systems, biowaste decontamination
systems, as well as heating, ventilation, and air conditioning.

Prerequisite: CHEM 100 or BIOL 100

**BIOT 255**  
**Water Treatment Membrane Processes**  
**Three Credits**  
The course covers the major aspects related to membrane processes for water purification and treatment. Emphasis will be on membrane applications, bio-fouling, reversing osmosis and ultra filtration.

Prerequisite: CHEM 100 or BIOL 100

**CHEM 101**  
**Applied Chemistry**  
**Four Credits**  
The class is designed to provide students with a general knowledge of matter, chemical compounds and molecules, gases and solutions, preparation of solutions and dilutions, solubility, density, colligative properties, acids and bases and in general the main inorganic and organic chemical processes used in industry. This course will complement the student’s knowledge by using modern laboratory techniques including measurements of pH and conductivity, UV-visible and fluorescence spectroscopy.

Requisite: MATH 121

**ENG 121**  
**Introduction to Computers**  
**Three Credits**  
The course presents an introduction to the history of computers and familiarizes students with basic computer software and hardware, as well as the use of software packages such as Word, Excel, PowerPoint. The course also introduces students to the Internet and to webpage design.

**MATH 100 @**  
**Basic Mathematics**  
**Three Credits**  
This course is an introduction to mathematics intended for students who need to develop basic skills. The following topics are included: Fundamental operations with natural and cardinal numbers, fractions, decimals, ratios and proportions, percentages, and measurements.

**MATH 102**  
**Applied Basic Mathematics**  
**Three Credits**  
This is an introductory course which includes, among other topics, fundamental operations with natural and whole numbers, fractions, decimals, ratios and proportions, percentages, measurements, and the effective use of the calculator. The course is oriented towards problem solving and the development of skills needed to perform mathematical operations.

**METE 251**  
**Introduction to Industrial Mechanics**  
**Three Credits**  
This course provides basic mechanical skills and repair techniques common to most fields of industrial maintenance. It includes topics such as precision measuring, instruments and general safety rules common in industry, as well as lock-out/tag-out. This is a hands-on course which includes troubleshooting and overhaul of mechanical systems such as pumps, assembly lines, conveyors, and associated industrial machinery.

Requisite: BIOT 101

**PHOP 250**  
**Aseptic Techniques in Pharmaceutical & Chemical Processes**  
**Three Credits**  
The course will focus on the step-by-step use of aseptic techniques, including actual laboratory practices for various cleaning room classifications, sample handling, laminar flow hoods and gowning. Methods of sterilization, sanitation, and disinfection are discussed.

Requisite: CHEM 100 or BIOL 100

**PHOP 255**  
**Water Purification and Treatment Systems in Pharmaceutical & Chemical Processes**  
**Three Credits**  
The course covers the major aspects related to high purity water system use in the chemical and pharmaceutical industries. Emphasis will be on equipment set-up and maintenance, multimedia filtration, chlorination, softening, carbon adsorption, filtration, distillation, storage and distribution, and steam in place.

Requisite: CHEM 100 or BIOL 100

**PHOP 265**  
**Solid Dosage: Manufacturing & Packaging**  
**Three Credits**  
This course covers solid dosage, pharmacy reweighing, formulation, blending/mixing, and formulation. It emphasizes granulation, powdering, lubrication, milling, and sieving. The course also focuses on tablet compression and tablet coating. In addition, the course exposes the students to the practices of WIP, CIP, SIP and the industrial regulations and the packing processes needed.

Requisite: CHEM 100 or BIOL 100
PHOP 268
Semi-solid and Liquid Dosages: Manufacturing and Packaging
Three Credits
This course covers semi-solid and liquid dosages, preparation of solution suspensions and colloids, as well as Pharmacy-reweighing, formulation, compounding sterile filtration, component preparation, container sterilization, dehydrogenation, stopper washing, siliconizing, sterilizing, filing, stoppering. Lyophilization, lyophilize set-up and maintenance. In addition, the course addresses the packing packaging processes needed.
Requisite: CHEM 100 or BIOL 100

PHOP 275
Principles and Operation of Chemical Processing
Three Credits
The class is designed to provide students with a general knowledge of those methods and analytical techniques whose principles should be understood. This course will be focused on the most useful and conventional procedures of chemical processes, such as distillation, centrifugation, crystallization, and, in general, purification and separation techniques used in chemical processes. The laboratory work emphasizes the preparation of solutions, physical-chemical measurements, and separation and purification techniques. Students will perform a variety of activities focused on different topics treated in the classroom. Due to its importance as a tool for learning the proper formal presentation of experimental information, a laboratory report corresponding to each session will be required from each laboratory group.
Requisite: CHEM 100 or BIOL 100

PHSC 120
Technical Science
Three Credits
The course provides students with an introduction to the basic principles and applications of mechanics, electricity and magnetism in matter.
Requisite: MATH 100

PTTE 200
Internship in Technology
Three Credits
This course extends classroom activities to a supervised, on-the-job learning experience directly connected to the student’s educational or occupational goal. The student will be under the direct supervision of a college faculty member as well as industrial personnel. Participants must attend orientation activities to familiarize themselves with internship program requirements and workplace habits. In addition, they must comply with pre-internship consultation with the faculty supervisor and complete 10 hours per week of training for a period of 6 weeks during the summer. The student will receive written evaluations from the industrial and faculty supervisors.
Requisite: PHOP 250, PHOP 255, PHOP 265, PHOP 268

QETE 232
Continuous Improvement Tools
Three Credits
The course defines the philosophy and presents the benefits of the concepts of quality, continuous quality, and quality improvement. The course covers total management, quality and productivity improvement tools, supplier processes, and customer relationships, as well as internal and external customer satisfaction. In addition, lean manufacturing and six sigmas for continuous improvement are presented.
Requisite: MATH 100

SCIE 250
Communication and Teams in the workplace
Three Credits
This course will provide the student with the basic skills necessary to work as a member of a team in business or organizational environments.
The School of Social and Human Sciences of Universidad del Turabo offers degree programs which enable students to compete optimally in the workplace. At the undergraduate level, the School offers a Bachelor of Arts degree in social sciences, with majors in criminology, psychology, social work and communications. It also offers a Bachelor’s Degree in Humanities, with majors in socio-humanistic studies and graphic arts. In addition, the school offers a Master’s Degree in Public Affairs, with specialties in criminal justice, human services, arts administration, and forensic sciences, as well as a Master’s Degree in Psychology, with a specialty in counseling psychology.

VISION
To develop productive and effective members of the global community with a professional, social, ethical and humanistic foundation.

MISSION
The School of Social and Human Sciences is characterized by its dual mission.

The school provides high quality academic programs at both the undergraduate and graduate level. The School undertakes this in a setting where excellence in teaching and learning are encouraged in the classroom, in practical internships, and in strong relationships with projects in the community at large. The basic goal is to provide our graduates not only with competence in their chosen field, but also with the diversity of experience needed to understand and appreciate the contributions of other disciplines.

The School is also responsible for the general social and humanistic foundation of all students at the Universidad del Turabo. The General Education curriculum is student-centered, emphasizing the importance of global interdependence and language competence. To this end, the school has established a Language Center to develop students’ ability to understand and express ideas in an articulate fashion. Moreover, the School has developed an interdisciplinary curriculum geared toward the analysis of human and social problems and the search for solutions through an understanding of human diversity.

General Objectives in all School Curriculum and Programs:

Maintain academic excellence by studying, teaching and social research.

SCHOOL OF SOCIAL AND HUMAN SCIENCES

Promote the knowledge and preservation of Puerto Rican and universal cultural values.

Develop communicative competency in Spanish and English.

Develop the capacity to analyze problems and find solutions.

Develop the understanding that is necessary for collaboration resulting in the sharing of ideas within disciplines, institutions, communities and nations.

Promote understanding of the human condition, enabling students to view the world with compassion and to act responsibly.

STAFF

Marco A. Gil de Lamadrid / Dean

Tomasita Pabón / Associate Dean

Edward Fankhanel / Associate Dean for Psychology and Social

Félix R. Huertas González/ Associate Dean of General Studies

Phillip Murray / Director of Language Department

Víctor Manuel García / Director of Communications Department

Maria M. Ortiz / Director Social Work Department

Jessica Velázquez Rodríguez / Out Patient Clinic Director

Rosa M. Rodríguez / Administrative Director

AREA OF SOCIAL SCIENCES

Description

The Area of Social Sciences focuses on the study of human nature, culture, ideas, institutions, human relations, social change and the relationship of human beings with the environment.

The School offers a Bachelor of Arts Degree, with majors in psychology, criminology, public administration, social work, general social sciences and communications. The school
also offers the Associate of Arts Degrees, with majors in public administration and general social sciences.

Two graduate degrees are offered. The first of these is the Master’s Degree in Public Affairs, with four specialties: criminal justice, human services administration, arts administration and forensic sciences. The second is the Master’s Degree in Psychology with a specialty in counseling psychology.

Objectives:
Provide students with interdisciplinary knowledge leading to an understanding of modern society and its principal social problems.
Help students obtain a scientific and philosophical education which promotes a critical attitude towards human and organizational behavior.
Foster critical analysis and research of the economic, social and political situation in Puerto Rico, and encourage interest in seeking alternatives.
Prepare the student to pursue graduate studies in the social sciences and related fields.

COURSE DESCRIPTIONS
(Courses marked with @ could be offered in both modalities, traditional or on-line.)

**ECON 121-122**
Economic Principles and Problems I and II
Six Credits
The course focuses on economic theories and practice. The topics covered include value and price, exchange, distribution, production, employment, national income, international commerce, public expenses, economic cycles, social welfare, and the influence of government on the economy.

Requisites: SOSC 101-102

**ECON 123**
Economic Principles and Problems (Compendium)
Three Credits
The course centers on economic theories, and covers topics such as value and price, distribution, protection, and the role of government in the economy.

Requisites: SOSC 101-102

**ENGL 151**
Basic Communicative English I
Three Credits
This is the first semester of first year English. The course features four hours of instruction and one hour of laboratory weekly. Listening skills are emphasized and the goal is for students to understand spoken English.

**ENGL 152**
Intermediate Communicative English II
Three Credits
This is the second semester of first year English. The course features four hours of instruction and one hour of laboratory weekly. Speaking skills are emphasized and the goal is for students to express themselves correctly.

Requisite: ENGL 151

**ENGL 231**
Research and Writing
Three Credits
The focus is on writing essays, monographs, reports, and conducting academic research. It focuses on the writing process, collecting data, and using references to sustain writing.

Requisites: ENGL 151-152

**ENGL 331**
Speech Communication
Three Credits
The course deals with the theory and practice of public speaking. It emphasizes the importance of nonverbal communication and verbal techniques. Cross-cultural differences in the art of communication are discussed. Students practice delivering a variety of speeches. Some speeches may require the use of visual aids.

**GEOG 201**
Physical Geography
Three Credits
The course centers on the principles of geography and their application to the environment, climate, soil, vegetation and natural resources.

Requisites: SOSC 101 - 102

**HIST 251-252**
History of Puerto Rico I and II
Six Credits
The course traces the historical evolution of Puerto Rico from the Taíno culture to the present. Emphasis is placed on the XVIII, XIX, and XX centuries.

**HUMA 111-112**
Introduction to Western Civilization I and II
Six Credits
Study of the development of the human beings with emphasis on culture arts, philosophy, religions and ideas, encouraging the individual to understand of the differences between countries and the societies of the world.

**POSC 201-202**
Introduction to Political Science I-II
Six Credits
The course explores the history of political thought, including the formation of the modern state, contemporary political ideology, theory of political institutions, international relations, and the means created in the modern state for the participation of citizens.

Requisites: SOSC 101 – 102

**POSC 203**
Principles of Political Science (Compendium)
Three Credits
The course analyzes the modern state, its structure, and citizens participation. Political decision-making in contemporary societies is discussed.

Requisites: SOSC 101 – 102
POSC 253
Political System of Puerto Rico
Three Credits
The course centers on political institutions in Puerto Rico from 1870 to the present. It traces legal and political evolution from the “Carta Autonómica” to the legislation establishing the elected governorship and the Commonwealth.
Requisite: SOSC 101 – 102

POSC 358
Administrative Law
Three Credits
The course traces the development of administrative law, as well as administrative action, procedures and agencies, court reviews, interpretation of legislation, regulations and retroactivity. Areas discussed include administrative discretion in policy-making, jurisdiction and investigative powers, as well as notification and hearings, the decision-making process and other related topics.
Requisite: POSC 253

PSYC 121-122
Psychology I and II
Six Credits
The course is a general introduction to basic theories of human behavior and their relation to social progress and individual growth.
Requisite: SOSC 101-102

PSYC 123
Survey Course in Psychology
Three Credits
Condensed version of PSYC 121-122.
Requisites: SOSC 101-102

PSYC 205
Personal Growth and Development
Three Credits
The course emphasizes the dynamics of human behavior and techniques for effective interpersonal relations. Human activity and mechanisms for personal and social adjustment are analyzed in order to achieve understanding of self and of others.
Requisites: PSYC 121-122

PSYC 225
Social Psychology
Three Credits
The course centers on the relationship between the individual and society. Analyses include attitudes, perception of group behavior, prejudices and conformity.
Requisites: PSYC 121-122

PSYC 305
Human Relations and Public Service
Three Credits
The course examines the complexity and the dynamics of human relationships. It includes a study of the variables that influence individual behavior in group situations as well as motivation, leadership, communication, resistance to change and the importance of good human relations in public service.
Requisites: PSYC 121-122 or PSYC 123

PUAD 201
Introduction to Public Administration
Three Credits
The course introduces the theory of public administration and the field of organizational science. Problem identification and classification, as well as the use of models for analyzing different structures are also presented.
Requisites: SOSC 101-102

PUAD 203
Public Personnel Administration
Three Credits
The course presents theoretical, legal and practical aspects of personnel administration. The Personnel Law and regulations of the Commonwealth of Puerto Rico are studied, so as to gauge their impact on public administration practices.
Requisites: SOSC 101-102

PUAD 215
Communication and Writing in Public Service
Three Credits
The course centers on communication levels in public administrations, departments and agencies. The different types of documents that public officials must produce are studied. Writing exercises are emphasized.
Requisites: SPAN 101-102
PUAD 315
Organizational Psychology
Three Credits
Human behavior in the organization. Main theories of organization and organizational development. Research on structure and organizational climate.
Requisite: PSYC 123

PUAD 325
Municipal Government Administration
Three Credits
The course presents the structure and operation of Puerto Rico’s municipal government. Problems of municipal administration, as well as laws governing the municipalities and their agencies are also studied.
Requisite: POSC 203

PUAD 360
Labor Relations and Government Collective Bargaining
Three Credits
The course centers on labor relations in Puerto Rico, as well as legislation and case law in local and federal jurisdictions.
Requisite: POSC 358

SOCI 201-202
Principles of Sociology I and II
Six Credits
The course discusses the individual in the social environment, social organization, social change and control. Mental health, juvenile delinquency, crime, unemployment and racial conflict are also presented. The influence of institutions such as the family, the school, the church, and state is also analyzed.
Requisites: SOSC 101-102

SOCI 203
Principles of Sociology (Compendium)
Three Credits
The course is a compendium of SOCI 201-202 directed to criminology students. Topics discussed include social organization, cultural phenomena, and socialization. Also studied are basic institutions, social deviation, stratification, social mobility, social and cultural change.
Requisites: SOSC 101-102

SOSC 101 - 102
Introduction to the Study of Social Sciences I - II
Six Credits
The course examines human society, including the individual and his or her relation to society, collective behavior, as well as Puerto Rico and its relation to the social and historical development of Western Civilization. Economic, psychological, sociological, anthropological and political problems of the contemporary world are discussed.

SOSC 320
Social Research Techniques
Three Credits
The course presents research methods and techniques for the social sciences.

SPAN 151
Introduction to Language
Three Credits
Spanish 151 is a basic course that will cover the following themes: origin, evolution, and characteristics of Puerto Rican and Hispano-American Spanish, orthography, oral expression, and reading comprehension.

SPAN 152
Introduction to Reading and Writing
Three Credits
Spanish 152 is a basic course that will cover the following themes: morphosyntax, punctuation, and includes an introduction to writing.
Requisite: SPAN 151

SPAN 250 @ Writing Techniques
Three Credits
Emphasizes the development of the skills needed to write logically and correctly, including research techniques.
Requisites: SPAN 151-152
VISION
The vision of the School of Technical Studies and Continuing Education (STSC) is to make the Ana G. Méndez University System (SUAGM) the first choice and the model for technology education and continuing education programs.

The STSCE will become an important component of support to strengthen the undergraduate enrollment at SUAGM and its institutions.

MISSION
The mission of the School of Technical Programs and Continuing Education is to offer high quality education in technology. The students will be able to pursue a university technical certificate or an associate degree and will receive the proper training to satisfy the employment market. The STSCE programs are committed to providing the students with life-long and technical skills needed to find a job for their professional development, or to continue studies at the university level.

OBJECTIVES
In order to accomplish our mission, the School must comply with the following objectives:

1. Provide technical education that will respond to the present and future demands of the employment markets.
2. Train and develop in the students the skills and knowledge related to their profession, in accordance with the demands of the human resources of the community we serve.
3. Provide support services that will facilitate student retention in the program and that will contribute to academic and professional success.
4. Develop in the students the necessary skills and attitudes needed in the use of learning resources, including recent developments in the area of educational technology.
5. Provide students with real life laboratory experiences, so that they will familiarize themselves with the nature of their future job.
6. Develop students’ competence in small business management, so that they are prepared to create employment for themselves as well as for other persons.
7. Develop proposals and continuing education courses that can be offered in different modalities at the workplace or at home.
8. Incorporate emergent technologies in technical studies programs and continuing education, according to the available resources.
9. Offer technical programs and continuing education at the off-campus centers that will respond to the necessities of the geographic zone and communities they serve.

ADMINISTRATIVE STAFF
José R. Del Valle-Rodríguez / Assistant Vice President & Dean
María Elena Flores-Aponte / Associate Dean
Vivian Cordero / Academic Coordinator
Glamaris Díaz-Figueroa / Integrated Services Coordinator
María de los A. Rodríguez / Administrative Assistant
Virmarie Flores / Administrative Assistant

FACULTY
Nancy Sánchez / Lecturer
MA, Universidad Metropolitana
BS, Biology, Interamerican University

Angel Alvarez Concepción / Lecturer
MVA, EDP College

Wilfredo Centeno / Lecturer
MBA, Management, Universidad del Turabo

Nelly Figueroa / Lecturer
MBA, Human Resources, Universidad del Turabo
PROGRAMS OF STUDY

CERTIFICATE IN COMPUTERIZED SYSTEMS

The courses required for this certificate offer the students the essential knowledge to work with software programs in a business setting. The students master the technical skills of the computer keyboard as a basis for working rapidly and effectively with the application programs. The students become familiar with the following software programs: Word, Excel, Power Point, and Access, among others.

OBJECTIVES
At the conclusion of the certificate program, the students will be able to:
1. Demonstrate knowledge of the concepts, applications and uses of computers as important tools for information processing in the office setting.
2. Produce different styles of business documents with speed and accuracy.
3. Use correctly various computer software packages such as Word, Excel and Power Point.
4. Apply proofreading skills to the editing of documents.

CERTIFICATE IN INFORMATION PROCESSING FOR MEDICAL BILLING

This certificate will prepare support personnel to collaborate with medical personnel according to the laws in Puerto Rico.

OBJECTIVES
At the conclusion of the certificate program, the students will be able to:
1. Demonstrate knowledge in the concepts, applications and uses of the computers as an important tool in information processing.
2. Apply the basic elements of medical terminology in the elaboration of words using roots, prefixes, suffixes, and compounds.
3. Demonstrate the skills necessary in completing HCFA forms and mastering the insurance claims form cycle.

PARALEGAL TECHNICIAN CERTIFICATE

The Paralegal Technician Certificate Program trains the students to provide support services to lawyers, judges, investigators and other legal professionals.

OBJECTIVES
At the conclusion of the certificate program, the student will:
1. Demonstrate knowledge and skills in legal research and writing.
2. Prepare their own documents using research skills and necessary legal terminology in Spanish, English and Latin.
3. Utilize computer software in legal research.
4. Be familiar with the original client interview, the drafting of the complaint, the summons, and all the
other stages of civil procedures in the Puerto Rican judicial system.

**ASSISTANT TEACHER CERTIFICATE IN EARLY CHILDHOOD EDUCATION**

This certificate provides students with the activities, information, and the necessary strategies to assist the preschool teacher in the classroom.

**OBJECTIVES**

At the end of the certificate program, the students will be able to:

1. Identify the characteristics of early childhood, patterns of development and growth in physical, social, intellectual and emotional aspects.
2. Discuss current legislation related to the operation of preschool facilities.
3. Use play and game activities as teaching strategies in preschool education.

COURSE DESCRIPTIONS

ACCO 100  
Introduction to Accounting  
Three Credits

The course presents the basics of accounting needed in the workplace. It includes the nature and purpose of basic accounting procedures, internal control, planning the use and purpose of payroll, and the accounting cycle in an enterprise. Three hours per week.

ART 017  
Art Appreciation  
Three Credits

This course introduces the students to art appreciation and architecture. It includes an introduction to the arts, aesthetic organization, and a variety of architectural and artistic masterpieces. Three hours per week.

COAP 103  
Programming Principles  
Three Credits

The main approach of this course is to provide students the essential foundations to understand the new bases of communication technologies. Students are offered a firm introduction to the connectivity of networks. In this way, they will gain an understanding of the different forms of networks and components that constitute (LAN) local networks, (WAN) extended networks, (MAN) metropolitan networks, and other common types of networks.

COAP 104  
Databases  
Three Credits

The course is an introduction to the concepts and applications of databases. Students will learn to create and manage database programs, data files, and produce documents and reports. Three hours per week.

COAP 106  
Computer Networks  
Three Credits

This course in telecommunications and computer networks is designed for individuals in the field of computerized information systems. The historical development, concepts, terminology and modern products related to computer networks are described. Criteria for planning, acquisition and installation of computer networks are emphasized. It also includes the study of protocols, software, topologies, and products available. Strategies of centralized and distributed processing are compared.
COAP 107
**Keyboarding and Basic Computer Applications**
*Four Credits*
This course introduces students to the electronic alphanumeric keyboard system. The course will provide basic skills to those students who will need to operate a computer terminal keyboard, and allow them to input information into a computer in a swift and efficient manner. This course also introduces the students to the basic concepts and applications of spreadsheet and graphic presentations. The students will learn to use various electronic spreadsheet applications, as well as create documents such as brochures, bulletins, graphic and other types of presentations. Four hours per week.

COAP 202
**Programming in C++**
*Four Credits*
Through the study of the programming language of C++, the course analyzes how to solve problems that are described initially in general terms. In an organized way, the student will learn how to sketch and outline C programs. The numerous problems and sample exercises included in the course will permit the student to clarify concepts and details.

COAP 203
**Programming in Visual BASIC**
*Four Credits*
The course centers on the study of the theory and practice of the language of BASIC. It includes the elements of the language for handling entrance and exit components, arithmetic, logic, structure, codification, test, correction of logic and syntax errors and use of the interpreters of the language. The applications developed will be based on a commercial approach, without dismissing their use in management and statistical processes.

Requisites: COAP 103, COAP 104

COAP 204
**Systems Analysis and Design**
*Three Credits*
The course analyzes principally commercial situations, using the correct steps of the process. It also centers on the determination of requirements for system analysis, among them, designs of a system, implantation, and selection of equipment and programs.

Requisites: COAP 103, COAP 104

COAP 205
**Systems Development Project**
*Three Credits*
Students will develop an implementation project with a commercial approach. They will consider all the aspects: situation analysis, design, test, revision, as well as programming, using the languages they have learned. Students will apply the concepts for designing and implanting computerized systems, in agreement with the requirements of a modern system.

CRIM 015
**Evidence**
*Three Credits*
The course presents the rules of evidence and their applications in criminal cases. Techniques of presentation of evidence, preparation of evidence, preparation of cases, and court testimony will be studied. Three hours per week.

CRIM 030
**Strait Penal and Special Penal Law**
*Three Credits*
Students will study and analyze the General Part of the Puerto Rico penal code and some of the most important crimes in the Special Part of the code, as well as some of the most important Special Criminal Law Statutes. The historical background of the Puerto Rico penal code and of the Special Criminal Law Statutes, as well as the general principles of law applicable to them, will be examined. Leading jurisprudence relevant to the topics discussed will be read and discussed in class. Three hours per week.

ECOT 001
**Economic Fundamental**
*Three Credits*
Students will study methods, theories and practice of economics and its effects on the individual, the firm and society. Special emphasis will be placed on micro analysis of the individual decision-making economic units and the application of the theory and principles in managing public and private enterprises.

Requisite: MATH 010

ENGT 001
**Introduction to English I**
*Three Credits*
This is a listening-speaking course in which students practice oral communication skills that can be put immediate use. Students will learn the appropriate language for different social and professional situations, including formal and informal speech. The curriculum has an audio-oral focus, moving from listening to a fuller command of integrated listening and speaking skills. Three hours per week.
ENGT 002
Conversational English I
Three Credits
This is a communicative English course designed to develop the oral communication skills of basic-level students of English as a Second Language. It develops student's oral fluency by focusing on speaking and listening skills. Students are engaged in purposeful use of the language rather than learning about the language. Students will learn appropriate language for different social and professional situations, including informal and formal speech.

ETIC 010
Fundaments Ethics
Three Credits
The nature of moral philosophy and the evolution of the principal ethics and bioethics theories will be analyzed. The professor and students will jointly discuss and analyze all theories. Three hours per week.

GEOG 025
Geography Puerto Rico
Three Credits
Basic notions of general geography and related sciences. The location of America in relation to other continents, as well as the situation of Puerto Rico within the America’s are major topics of study. Several aspects of physical and human geography of Puerto Rico are studied, among them the island’s topography, hydrography, climate, ethnic composition, folklore and demographic growth. Three hours per week.

INET 001
Introduction to Enterprises
Three Credits
This course is designed to provide students with understanding and overview of the business world. The student will develop analytical skills while being exposed to a variety of alternatives in a business career. This includes the establishment, acquisition and development of a business.

MATH 010
Basic Mathematics
Three Credits
This course fulfills student needs in mathematics. It includes practice in the following skills: numeral operations with cardinal numbers, fractions, decimals, percents, and whole numbers. Three hours per week.

MATH 011 – DRAF 211
Introduction to Mathematics
Four Credits
The course covers fundamental mathematical concepts. It includes basic operations, fractions, decimals, proportions, percents, units and conversion, and basic concepts in geometry. Four hours per week.

NURT 001
Introduction to Microbiology
Three Credits
An introduction to the microbial world including the basic characteristics of fungi, bacteria and viruses. Special emphasis is placed on microorganisms pathogenic to humans.

NURT 002
Principles of Nursing
Five Credits
This course is designed to develop the knowledge base and the basic nursing skills to enable the learner to perform satisfactorily during the course and also in future clinical experience. The fundamentals of nursing care and basic skills are discussed so that learner can lead the client towards the satisfaction of his basic needs such as hygiene, physical and psychological comfortable, safety, prevention and control of infections.

NURT 003
Nutrition Fundamentals
Two Credits
The course centers on a discussion of nutrition with emphasis on the role of carbohydrates, fiber, proteins, fats, vitamins and minerals in the human body. We evaluate the interrelationship between nutrients and health. The course reflects critically on nutrition for a better quality of life, as proposed in the food pyramid. Data on the nutritional content of processed versus unprocessed foods and nutritional legislation are included in the theme of the course. Topics are developed through lectures, research, and cooperative work.

NURT 004
Primary Nursing Care for Mothers and Newborns
Five Credits
This course centers on applying the skills students need to be proficient practical nurses by using the nursing process to interact with the pregnant woman and her family during the last stages of pregnancy, childbirth, and postpartum. It emphasizes the involvement of preventive nursing, curative and rehabilitative nursing, as well as filling the health needs of a dynamic and changing community. The course includes acquiring the skills needed in the nursing intervention with the newborn in the delivery room and in the nursery. In
addition, we selected those skills applicable in patients with gynecological conditions, emphasizing self-care. Clinical practice will be made in institutions offering primary, secondary, tertiary care, and others in other institutions providing community service to this group of patients.

Requisite: NURT 001, NURT 002

NURT 005
Primary Nursing Care for Children and Adolescents
Five Credits
In this course the student will practice skills learned caring for children and adolescents, applied according to the children's stages of growth and development. Students will apply nursing processes for interventions with children, adolescents, families and the community. The course emphasizes the involvement of preventive, curative and rehabilitative nursing. It also integrates the principles of teaching-learning and stresses effective communication in the students' speech. The student will apply the process of communication and interpersonal skills to intervene effectively with the infant, child, adolescent and family, in coordination with the health team.

Requisite: NURT 001, NURT 002

NURT 006
Primary Nursing Care for Adults and the Elderly
Five Credits
This course is designed to develop the knowledge and skills in the nursing care of the adult and the elderly. The learner is presented with the physiological and pathological changes that occur holistically in the different systems that affect the adult and the elderly, their families and the community. The course includes three (3) lecture hours and six (6) hours of clinical practice a week, where the learner is able to put into practice his knowledge base and skills in a variety of settings, under the supervision of a professor.

Requisite: NURT 001, NURT 002, NURT 004, NURT 005

NURT 007
Primary Nursing Care for the Psychiatric Patient
Five Credits
This course is designed to develop the basic nursing care skills in psychiatric nursing. Medical-legal aspects of mental health care are also discussed. It focuses on the alterations in mental health such as stress and crisis intervention, anxiety, somatomorphic, cognitive, affective, schizophrenic, auto-destructive, and eating disorders.

NURT 008
Community Nursing Practice
Two Credits
This course provides students with knowledge and appreciation of aspects of management and leadership in nursing. Critical thinking is promoted through discussion and group dynamics, as well as through oral and written activities related to the course content. We discuss the roles of professional nursing leadership, the criteria for continuing education, and graduate studies. The course promotes communication skills essential to perform the roles required by the nursing profession.

Requisite: NURT 003, NURT 004, NURT 005

OFAD 002
Medical Terminology of Human Systems, Organs and Body Functions
Three Credits
The course presents medical terminology used in laboratories, by radiologists, and in prescriptions. It also studies the basic elements of medical terminology in the elaboration of words using roots, prefixes, suffixes, and compounds. It includes definitions and vocabulary related to terminology used in the health professions. Three hours per week.

OFAD 006
Administrative Procedures for Medical Offices
Three Credits
This course is designed to provide students with advanced knowledge in word processing. Students review how to create, edit and print a document, and to format commands to create a multi-page document. The students learn to merge documents, create reports and basic desktop publishing. Four hours per week.

Requisite: OFAD 042

OFAD 008
Billing Systems for Health Care Procedures
Three Credits
The course presents the dynamics of medical billing and collections. Areas covered include completing HCFA forms
and mastering the insurance claim form cycle. Practical information will be given on the features that are common to all insurance carriers and features specific to Medicare, Medicaid, Blue Cross/Blue Shield, and others. Three hours per week.

Requisite: OFAD 002

OFAD 022
Coding of Diseases, Medical and Dental Procedures
Three Credits
Classification of diseases and ambulatory procedures using numeric coding. Three hours per week.

Requisite: OFAD 002

OFAD 024
Electronic Billing
Three Credits
The course presents medical billing and collections using a computer software package. It will provide the skills necessary for completing HCFA forms and mastering the insurance claims form cycle. Practical information will be given on the features that are common to all insurance carriers and features specific to Medicare, Medicaid, Blue Cross-Blue Shield and others. Three hours per week.

Requisites: OFAD 002, OFAD 008, OFAD 022

OFAD 025
Practice and Theory in Medical Facilities
Three Credits
The course offers the student the opportunity to apply the knowledge already acquired in the academic program in a real work environment. The student will work 4 days of the week in a practice center and his or her performance will be evaluated by the assigned supervisor in the practice center. One day a week, the student will meet with the practice coordinator to discuss the work done, his or her performance and experiences and to identify any areas that need reinforcement.

OFAD 042
Word Processing II
Four Credits
The course offers practical information and hands-on experience using current word processing software packages. Students practice document preparation and functions such as: creating tables, columns, merge, macros, page headers, and footers. Four hours per week.

Requisite: OFAD 001

PALE 010
Mortgage Law
Three Credits
This course will introduce the paralegal technician to the general principles of the mortgage law and regulations. Special study will be given to the daily operations of the Property Registry and the role the paralegal technician plays in its operations. Title searches, filing of documents, fees other practical details will be discussed. Leading jurisprudence about specific topics regarding mortgage law and of the property register will be read and discussed in class. Three hours per week.

PALE 011
Civil Procedures
Three Credits
The course presents the most important stages in civil procedure rules as used in our legal system. Students will be trained in the original client interview, the drafting of the complaint, the summons, and all the other stages of civil procedure. The second part of the course will introduce the most important stages in the Criminal Procedure Rules, beginning with the arrest, the determination of probable cause for arrest, and so on. Leading jurisprudence on the important topics studied will be read and discussed in class. Three hours per week.

PALE 012
Professional Conduct Code
Three Credits
The course discusses the responsibilities of members of the legal profession to comply with the code of professional conduct in all legal processes in society. The student will learn the obligation of all lawyers or citizens acting as judge, district attorney, and advisor or in any other capacity, to act in accordance with the regulations of the code of professional.

PALE 015
Legal Research
Three Credits
In this course students will learn the theory of legal sources and the methodology of legal research. They will study the structure, utility and citation of the main bibliographic references: primary, secondary and legal findings. The study and practice of writing legal documents will complete students’ academic preparation to become researchers in the field of law.

PALE 020
Public Law
Three Credits
Students will learn public law through the study of administrative law, the discipline that studies the genesis,
development, organization, and power of administrative agencies, as well as the norms that guide the processes of: investigation, regulations and judgment of those organisms. They will also study different forms of administrative discretion through procedural norms, judicial principles and constitutional statutes, guided to protect the citizen and commerce against the arbitrary acts of administrative agencies.

**PALE 025**  
Private Law  
Three Credits  
Students will learn about family law, contracts and obligations, and the rights of inheritance. They will understand the judicial concepts of person, legal capacity, marriage and its effects, properties, obligations, contracts, inheritance and legacy.

**PALE 035**  
Preparation and Analysis of Cases  
Three Credits  
The student will examine the fundamental stages in the preparation of a case. In general terms, the student will learn to carry out a research study of the events, evidence, trial, and judgment of a case.

**PALE 075**  
Practicum  
Three Credits  
The course offers students the opportunity to apply knowledge already acquired in the academic program in a real work environment. Students will work 4 days a week in a practice center and individual performance will be evaluated by the supervisor assigned in the practice center. One day of the week, the student will meet with the practicum coordinator to discuss the work done, performance and experiences and to identify any areas that may need reinforcement.

**PHAT**  
Principles of Human Anatomy and Physiology  
Three Credits  
Study of the human anatomy and physiology, particularly skeletal, muscular, nervous, digestive, respiratory, cardiovascular, lymphatic, endocrine, urinary and reproductive systems.

**PHAT 002**  
Pharmaceutical Calculations  
Four Credits  
This course discusses the format and content of prescriptions and medical orders. It also includes abbreviations, acronyms and symbols used by physicians, so that for students learn to interpret, analyze and evaluate these documents during the course of their duties as a pharmacy technician. The topics discussed include the international system of units, the common apothecary system and the avoirdupois system, and equivalents that are used for conversions among them. Students perform basic mathematical operations and apply them to the solution of quantitative problems that are part of professional duties in the pharmaceutical community, as well as in institutional and industrial areas.

**PHAT 003**  
Clinical/Pharmaceutical Terminology  
Two Credits  
This course consists of two parts, the first part of the course is discussed in logical order and sequential parts of a word, medical term and concepts pertaining to structures, fluids and body cavities. It looks at the etymology of words based on Latin and Greek roots and the use of prefixes and suffixes, among others. In the second part of the course explores the terms based on a review of body systems with emphasis on anatomy, physiology, diagnostic tests and procedures, conditions and terms of systems and related surgical interventions and treatment.

**PHAT 004**  
Supervised Practice I (Community)  
Three Credits  
Supervised practice will enable the student to maximize learning and formalize conducting a portion (250 hours) of internship in a pharmacy in the community. In addition, the student will conduct special projects related to pharmacy in a community, with the aim of focusing on special events such as: general plan of the pharmacy level, specific area of medicines over the counter, the prescription plan, organization of medications, prescription files, prescription flow from receipt to delivery to patients, equipment composition, reference books, electronic systems, or automated information and the HIPAA Act.

**PHAT 006**  
Over-the-Counter Medicines  
Three Credits  
This course will discuss medications available without a prescription, or over-the-counter medicines, which are used in the prevention and/or treatment of the most common conditions affecting persons. It also discusses the use of equipment and common accessories available for sale in community pharmacies that are used for testing or monitoring some common medical conditions or treatments. The course also includes a section on homeopathy, in response to the popularity it has attained in recent years.
PHAT 007
Medication Compounding I
Three Credits
This course examines the equipment, tools, techniques, procedures, packaging and preservation methods of often extemporaneous preparations made in community pharmacies and hospitals. In addition, we discuss the regulations relevant to the preparation of sterile and non-sterile forms, which are published under the "General Chapter 795, Pharmacy Compounding" and "Chapter 797" in both the United States Pharmacopeia and National Formulary.

PHAT 008
Supervised Practice I (Community)
Three Credits
Supervised practice will enable students to maximize learning and formalize conducting a portion (250 hours) of internship in a pharmacy in the community. In addition, students will conduct special projects such as inventory control, DACO dispatch price, medical billing plans, orders, medications, and pricing checks. They will also prepare clinical profiles of patients, control the sale of syringes and certain special "over-the-counter" medicines, which are released without prescriptions, and perform patient consultations, either face to face or on the telephone the proportion of pharmacists to pharmacy technicians, primary functions of the pharmacy technician, the pharmacy where students will eventually practice, as well as significant events learned.

PHAT 009
Pharmaceutical Legislation
Pharmacology is the science that studies the origin, the mechanisms of action, and the physical and chemical interactions between drugs and animals, including humans. The field studies how drugs are absorbed, distributed, metabolized and eliminated by the human body and their clinical application in treating diseases, conditions and symptoms that affect different body systems. This course offers a general introduction to the laws and the judicial system in Puerto Rico and the United States. It explores state and federal laws governing research, development, manufacturing, packaging, marketing, sale and distribution of drugs and medical devices. It also includes the laws governing the exercise of the profession of pharmacy and of Pharmacy Technicians.

PHAT 010
Pharmacology I
Three Credits
Pharmacology is the science that studies the origin, the mechanisms of action, and the physical and chemical interactions between drugs and animals, including humans. The field studies how drugs are absorbed, distributed, metabolized and eliminated by the human body and their clinical application in treating diseases, conditions and symptoms that affect different body systems. This course is an introduction, a discussion of basic concepts which then proceeds to studying the different drugs according to their category, based on clinical applications, e.g., antidepressants, antihistamines, expectorants, antibiotics, etc. Their study includes the indications, contraindications, precautions, warnings, interactions with other substances, incompatibilities, surveillance, pharmacokinetics, pharmacodynamics, dosage, side effects and toxicology of drugs.

Requisite: PHAT 005

PHAT 012
Supervised Practice III (Hospital)
Three Credits
Supervised practice will formalize and maximize student learning by making a portion (250 hours) of internship in a hospital pharmacy. In addition, students conduct special projects related to pharmacy in a hospital for the purpose of focusing specially on common events, such as: producing a map of the hospital pharmacy, outlining its organizational structure, service to inpatients vs. ambulatory equipment, sterile preparation, organization of the drugs, serums, lines, etc. In addition, students map the flow of orders released by doctors and the hospital information system.

PHAT 013
Pharmacology II
Three Credits
Pharmacology is the science that studies the origin, the mechanisms of action, and the physical and chemical interactions between drugs and animals, including humans. The field studies how drugs are absorbed, distributed, metabolized and eliminated by the human body and their clinical application in treating diseases, conditions and symptoms that affect different body systems. In this course, students learn more uses of drugs belonging to the following categories, based on their clinical application as agents for the treatment of conditions affecting the respiratory system, such as smoking cessation medications, agents for the treatment of gastrointestinal conditions, renal conditions, cardiovascular conditions, muscle relaxants, non-narcotic analgesics, hormones, topical agents, ophthalmic, and OTICO. Topics include contraindications, precautions, terms, interactions with other substances, incompatibilities, monitoring, pharmacokinetics, pharmacodynamics, dosage, toxicology, and adverse effects of drugs.

Requisite: PHAT 010
PHAT 014
Supervised Practice IV (Hospital)
Three Credits
Supervised practice will enable the student to maximize learning and formalize conducting a portion (250 hours) of internship in a hospital pharmacy. In addition, students will conduct special projects related to pharmacy in a hospital for the purpose of focusing on special events such as existing technology, electronic records, codes of arras, automated office systems, administration of intravenous drugs, standards of Joint Commission for Accreditation of Hospital billing, the HIPPA Act applied to patients in the hospital pharmacy, returns to the inventory, a measure to reduce medication errors, systems of injection and release of pre-mixed, as well as significant events learned in the hospital pharmacy.

Requisite: PHAT 012

PHAT 015
Pharmacy Technician Review
Three Credits
This is a refresher course on those competencies that are part of the specific content of national examinations in revalidation techniques offered by the Pharmacy Board of Certification of Pharmacy Technicians, PTCB, for its acronym in English (Pharmacy Technician Certification Board) and the Examining Board of Pharmacy Technicians in Puerto Rico. The course emphasizes knowledge of the roles of assistant pharmacy technician, Pharmacy related to interpretation, composition, release of prescriptions, legal issues, and so on. The course also covers the ability to solve technical problems associated with the release of quantitative requirements and reviews the basic information of the 200 drugs most used in Puerto Rico and the United States.

Requisite PHAT 012

PORT 001
Introduction to Port Operations
Three Credits
This course presents a broad perspective of all the operations inside a port: Elements of a port, types of ports and their logistics. It introduces basic components and terminology of the industry essential for understanding different elements of trade.

PORT 002
Logistics and Supply Chain I
Three Credits
The course will give students basic knowledge of the supply chain, the logistics subsystems, and the planning of the logistic process. It establishes that logistics tries to achieve an efficient transfer of materials, through the supply chain, while providing an acceptable level of service to the client.

PORT 003
Logistics and Supply Chain II
Three Credits
This second part of the course will focus on the manufacture, warehousing and transportation processes as part of the management of the logistics and supply chain. It emphasizes the most modern systems and more efficient processes of the supply chain, including basic information necessary for the decision making process on transportation choices.

Requisite: PORT 002

PORT 004
Transportation Security
Three Credits
This course is divided in two parts: the first focuses on current transportation security practices, including laws, regulations, and agencies established after the events of September 11. The second part of the course works with a Model of Global Transportation Security, which establishes a practical guide for creating added value for companies through transportation security management.

PORT 005
Technology Workshop Port Clusters
Two Credits
The course is a visual introduction to the transportation industry and other related activities. It is composed of a series of guided visits where the students will have direct contact with industry professionals, which include presentations and question and answer session.

PORT 006
Development of Port-Cities
Three Credits
This course presents the fundamental elements for the incorporation of a port, based on established policies. These policies, vital for the development of the port-city, depend on the synergic integration of the public and private sectors.

PORT 007
Tourism in Port Cities
Three Credits
This course presents an extremely useful introduction to the broad scope of tourism, from history through interindustry links and impacts, to the government role and the future of this rapidly changing phenomenon.
PORT 008
International Shipping
Three Credits
Shipping lines operate under unique circumstances in this industry. This course introduces students to the different participants in the industry and the idiosyncrasies of their intervention in international shipping. It also presents basic concepts of ship design and operations.

POSC 085
Civil Rights in Puerto Rico
Three Credits
The course presents statutory, constitutional and Supreme Court case law sources of civil rights guarantees in Puerto Rico. Case studies of contradictory government actions including legislation limiting rights will be studied. Three hours per week.

PRES 002
Health, Hygiene and Nutrition
Three Credits
The course is designed to train education students with the required competence in the areas of health, hygiene and nutrition applicable to all students to enable them to obtain a better quality of life.

PRES 035
Introduction to Education
Three Credits
This course is based on the constructivist paradigm. The goal of the course is to provide future education professionals with a highly pertinent formative skill: Mastery in goal conceptualization and evaluation of their strengths and weaknesses. Special attention will be given to the observation and analysis of the scholastic scene, as well as to the processes of education and learning. The course entails 15 hours of clinical experience in schools. The student becomes an active thinking subject capable of constructing his own knowledge.

PRES 071
Human Growth and Development
Three Credits
Growth and development of children from birth through adolescence and the implications for teachers and school personnel. Three hours per week.

PRES 072
Educational Psychology
Three Credits
This course provides an overview of concepts learning and intelligence and their relationship to human development. It examines the theoretical frameworks related to learning and intelligence and different learning styles. We discuss the theories of learning and their relationship to the functions of the teacher.

PRES 076
Classroom Management
Three Credits
This course aims to promote the comprehensive development of the student within a constructivist approach, along with the development of critical thinking and a philosophy of total quality. We will study the theories and models of classroom management. The course will investigate the techniques and strategies for group control and behavior modification.

PRES 102
Teaching Materials and Learning Devices
Three Credits
In this course, the future teacher studies, analyzes, plans, designs and produces multiple materials for teaching. The course relies on communication processes and the intellectual processes categorized by Benjamin Bloom in the planning, design and production of materials. It uses Ralph Tyler’s model for the systematic organization of cognitive development to produce a teaching module. The course is useful in the preparation program for teachers in elementary and secondary education, special education, physical education and other areas. It introduces the students to the integration of educational technology in education.

PRES 107
The Teaching of Writing from Kindergarten to Third Grade
Three Credits
The course studies and analyzes the theory and practice used in the teaching of writing from kindergarten to third grade. Development of teaching techniques and strategies used to teach writing to young children are emphasized. It includes the diagnosis and correction of writing difficulties.

PRES 114
Computers in Education
Three Credits
The course studies issues relating to the use and impact of computer education and the theories that support its integration into the educational field. Constructivist methodology will be used to refine humanistic skills related to the development of thinking skills and problem solving in the school environment. Students become familiar with computer programs from a practical perspective.
PRES 119
Theory, Practices and the Game-like Education Strategy
Three Credits
Study, practice and assessment of theories related to play activities and the use of play and game activities as teaching strategies in preschool education. Topics to be discussed include the role of play and game activities in child development. Three hours per week.
Requisite: PRES 123

PRES 123
Children's Literature
Three Credits
This course offers the future teacher aid, in a theoretical and practical form, by presenting the most essential material related to children’s literature within the preschool program. In this course books, works of art, fiction, folklore, poetry and games will be studied. Three hours per week.

PRES 136
Curriculum and Teaching Methods
Three Credits
The course presents the physical environment, educational materials and resources, and the curricular content of the preschool program. It examines different approaches to preschool education. Three hours per week.
Requisites: PRES 124, PRES 119

PRES 139
Education for Exceptional Children
Three Credits
The course studies widespread intellectual deviations brought about by psycho-neurological disorders of learning, emotional problems and social adjustment. It also studies communicative disorders such as deafness, speech and/or language problems, visual impairments, neurological and orthopedic problems, as well as health problems.

PRES 143
Practical Experiences at Preschool Level for Assistant of Teachers
Three Credits
This is a clinical experience in which student-teacher experiment and practice the knowledge, skills and attitudes obtained in their preparatory courses. The student-teacher will be responsible of conducting learning experiences of a group of children in a preschool program and will attend the preschool center for twenty hour a week and concurrent weekly seminars.

PRES 144
Administration of Educational Programs for Infants, Toddlers and Preschool Children
Three Credits
The course studies and analyzes knowledge content and skills required in planning, managing and coordinating educational programs for infants, toddlers and preschool children. Topics discussed are: types of programs, planning and evaluation of goals, selection and supervision of human resources, use and maintenance of physical resources, the role of parents in the education of young children, government agencies that regulate programs and facilities, and current regulations regarding these programs. Clinical experiences are required amounting to at least 15 hours per semester.

PRES 166
Child Care in Early Education
Three Credits
The course examines the different tasks of caregivers of young children in school or daycare facilities; their roles, their responsibilities over the education of young children, and what they should know about their relationship with the children and their parents. Three hours per week.
Requisite: PRES 119

PSYC 005
Personal, Academic and Labor Development
Three Credits
The course provides students with a series of technical and educational experiences designed to demonstrate how to identify and develop personal and skills to facilitate the successful performance in personal, academic and work areas. We give importance to processes in decision making, gaining self-knowledge, a clear self-concept, and developing healthy self-esteem, to achieve a high level of professionalism. Emphasis is placed on the techniques of teamwork, interpersonal relationships, ethics, channels of communication, motivation, job satisfaction, performance, professional development and organizational culture.

SPAT 001
Spanish I
Three Credits
The course is directed toward the development of the basic skills of oral communication, reading and writing. The study and analysis of readings and texts will provide the tools necessary to develop the skills of oral and written expression, which will then be the bridge to writing practice. The development of the course has an interdisciplinary perspective.
EETP 001  
Freshman Seminar  
Three Credits  
This course aims to strengthen the basic knowledge and skills at the personal, intellectual and technological developments needed for effective performance in activities leading to academic performance and adjustment to college life. Students will participate in mentoring activities aimed at the acquisition of skills and knowledge to enable it develop in the academic area. It emphasizes the importance of integral human development and its relationship to academic success. The student is guided through a series of activities on campus to expose you to the services offered by our institution and the School of Professional Technicians. It is intended that students develop greater security and confidence when handling and solving academic and personal situations.

VEAT 001  
Principles of Animal Biology  
Prepares students in fundamental concepts of Biological Sciences as the characteristics of matter, the cell, the introduction to Human and Introduction to Genetics.

VEAT 002  
Fundamentals of Veterinary Science  
Three Credits  
This course describes the roles and responsibilities of veterinary assistance and alternatives to study, work and professional organizations. Includes safety rules, ethics and laws that apply to the exercise of their profession and the welfare of animals in Puerto Rico. Also, this course describes medical terms and economic concepts veterinary hospital and veterinary clinics. It identifies the main breeds of domestic animals and defines the concepts of behavior, restraint, and security. Furthermore, it demonstrates the basic techniques of assessment, physical examination, sampling and vaccination protocols.

VEAT 003  
Veterinary Chemicals  
Four Credits  
Study of basic concepts of composition, structure, properties and behavior of matter. Emphas on theoretical aspects of inorganic aspects of inorganic chemistry and organic chemistry that are helpful to understand the processes of the body and substances of biological and pharmaceutical importance with which it interacts in daily life.  
Requisites: Veat 004

VEAT 004  
Veterinary Math  
Three Credits  
Review of basic math concepts that are carried out daily in the practice of the profession. Discuss the concept of ratio and proportion, estimation and significant figures, as well as the method for augmentation and reduction formulas, preparations and expressed the percent dilution and concentration. Emphasis in the International System of Units, the English System and equivalents that are used to convert between them. Basic mathematical operations are performed and their application to quantitative problem solving as part of professional roles for the veterinary technician.

VEAT 005  
Anatomy and Physiology of Domestic Animals  
Five Credits  
Histological, anatomical, physiological, skeletal system, muscular, epithelial, respiratory, cardiovascular, urinary, endocrine, nervous and immune systems. Emphasizes the interrelation between the systems for normal body functioning. We study the terminology relating to anatomy and animal physiology. The course is modeled after the dog and compared with other domestic animals using skeletons, models, audiovisual dissection specimens and laboratory experiences.  
Requisite: VEAT 001

VEAT 006  
Principles of Veterinary Nursing  
Three Credits  
This course will provide the student in patient monitoring techniques in their work scenarios, particularly the hospitalized patient. Therapy techniques will be demonstrated, housing and nutrition in a comprehensive manner. Be instructed in the ways of securing, therapy and medication management. We report the preparation and practice and patient care before, during and after different surgical procedures.  
Requisites: VEAT002

VEAT 007  
Common diseases of domestic animals  
Three Credits  
This course familiarizes and exposes students to the pathophysiological processes of common infectious diseases. The respective clinical symptoms associated with the main forms of diagnosis and therapy in large clinical scenarios. It will focus on practical concepts of immunity and prevention of infectious diseases in domestic animals, besides familiarizing students with the prevention and diagnosis of zoonotic diseases.
VEAT 008
Techniques and Protocols Veterinary Assistant I
Three Credits
The course instructs in the collection, analysis and interpretation of blood samples (CBC, microscopic evaluation, coagulation, chemical and serological) and urine. We discuss diagnostic tests and treatments for anemia. Further instructs the student in the preparation of cytology samples (exudate, transudate, aspiration, printing, bone marrow, ear, and vaginal). It also discusses methods and tests for pregnancy diagnosis, ocular diagnostic tests (including tonometry, fluoresceina staining, and tear production test - Schirmer tear test)
Requisites: VEAT 001, VEAT 002, VEAT 004, VEAT 005

VEAT 009
Fundaments of Animal Pharmacology and Toxicology
Three Credits
This course provides students the opportunity to develop critical thinking concepts related to pharmacology and applied to the process of veterinary medicine. We describe the pharmacological principles of prescription drugs in the field of veterinary medicine. It relates to the student with the products and the latest drug developments. Train the student in the various techniques of administration and dosage of medicine for patients to veterinary care.
Requisites: VEAT 002, VEAT 005, VEAT 006, VEAT 004, VEAT 001, VEAT 003

VEAT 010
Techniques and Protocols Veterinary Assistant II
Three Credits
It discusses techniques and protocols for medical emergencies, poisonings and intensive care. The student is instructed in basic techniques and procedures necropsy. It discusses and demonstrates the effective management and patient safety in all phases of anesthetic procedures. Instructed in the handling of laboratory animals, exotic birds, small mammals and fish.
Requisite: VEAT 008

VEAT 011
Principles of management practices and farm animal diseases
Three Credits
This course discusses the husbandry of farm animals ADDED breeds, behavior, reproduction, nutrition and support. Will discuss best practices for proper management of farm. We demonstrate the medical and surgical nursing major species. Besides therapy techniques, necropsy, dentistry and assisted reproduction for farm animals.

VEAT 012
Veterinary Psychology and Grooming
Three Credits
Description of the domestic animal characteristics and their respective grooming styles for the most common breeds. Discussion the different way of categorizing domestic animals (size, colour, characteristics, coat type). Review of grooming subjects including equipment, techniques, cares, preparation, bath, drying and clipping.

VEAT 013
Clinical Practice Veterinary Assistant
Three Credits
In this course and practical laboratory integrates concepts acquired by placing students in practice centers. They will be working directly with a veterinarian, carrying out the procedures requested and needed to diagnose and to treat animals. It will be noted and evaluate the student in the performance of their duties as future veterinary technician; serving veterinary medical as a supervisor, counselor and adviser.
Requisites: VEAT 001, VEAT 002, VEAT 003, VEAT 004, VEAT 005, VEAT 006, VEAT 007, VEAT 008, VEAT 009
